*European-Russian Energy Relations: from Dependence to Interdependence* Karina Galytska, 2021-11-11 Due to the exploitation of international reservoirs, natural energy sources have become rare, disputed among States and therefore strategic. The reliance on these resources is linked to energy security and dependence in both terms of energy imports or exports. Furthermore, the access and reallocation of energy flows entail an alteration of the balance of power among States as well as the raise of national energy security strategies and debates. The aim of this volume is to analyze the evolution of energy relations between the European Union and the Russian Federation from a state of pure Dependence to the establishment of a balanced Interdependence, underling also the challenges facing the EU in terms of dependence and diversifications in the framework or the EU-Russian energy cooperation.

*The Virtual Public Servant* Stephen Jeffares, 2020-11-30 With recent advances and investment in artificial intelligence, are we on the verge of introducing virtual public servants? Governments around the world are rapidly deploying robots and virtual agents in healthcare, education, local government, social care, and criminal justice. These advances not only promise unprecedented levels of control and convenience at a reduced cost but also claim to connect, to empathise, and to build trust. This book documents how—after decades of designing out costly face to face transactions, investment in call centres, and incentivising citizens to self-service—the tech industry is promising to re-humanise our frontline public services. It breaks out of disciplinary silos and moves us on from the polarised hype vs. fear discussion on the future of work. It does so through in-depth Q-methodology interviews with a wide range of frontline public servants, from doctors to librarians, from social workers to school receptionists, and from police officers to call handlers. The first of its kind, this book should be of interest across the social sciences and to anyone concerned with how recent measures to digitise and automate our services are paving the way for the development of full-blown AI in frontline work.

**Peace, Conflict and Developments in the Western Balkans. The Role of EU Integration** Reina Zenelaj Shehi, Eglantina Hysa , 2020-09-10 The Western Balkan countries are characterized by an entanglement of different national, ethnic and religious groups. Within all Balkan states, nationalist rivalries have been and are exploited by political leaders as a propaganda tool when faced with internal unrest or unpopularity. Yet, the proximity of ethnic communities to their countries of ethnic origin tie all the Balkan states into a common problem: the spillover effect of regional insecurity. Existing and future disputes require an exhaustive survey of national, ethnic, religious, territorial, economic and political problems, and this is precisely what this volume sets out to do.

**The Handbook of Global Media and Communication Policy** Robin Mansell, Marc Raboy, 2014-03-03 The Handbook of Global Media and Communication Policy offers insights into the boundaries of this field of study, assesses why it is important, who is affected, and with what political, economic, social and cultural consequences. Provides the most up to date and comprehensive collection of essays from top scholars in the field Includes contributions from western and eastern Europe, North and Central America, Africa and Asia Offers new conceptual frameworks and new

methodologies for mapping the contours of emergent global media and communication policy Draws on theory and empirical research to offer multiple perspectives on the local, national, regional and global forums in which policy debate occurs

**Educational Research for Social Justice** Alistair Ross, 2021-06-22 This book presents a series of analyses of educational policies – largely in the UK, but some also in Europe – researched by a team of social scientists who share a commitment to social justice and equity in education. We explore what social justice means, in educational policy and practice, and how it impacts on our understanding of both ‘educational science’ and ‘the public good’. Using a social constructivist approach, the book argues that social justice requires a particular and critical analysis of the meaning of meritocracy, and of the way this term turns educational policies towards treating learning as a competition, in which many young people are constructed as ‘losers’. We discuss how many terms in education are essentialised and have specific, and different, meanings for particular social groups, and how this may create issues in both quantitative survey methods and in determining what is ‘the public good’. We discuss social justice across a range of intersecting social characteristics, including social class, ethnicity and gender, as they are applied across the educational policy spectrum, from early years to postgraduate education. We examine the ways that young people construct their identities, and the implications of this for understanding the ‘public good’ in educational practice. We consider the responsibilities of educational researchers to acknowledge these issues, and offer examples of researching with such a commitment. We conclude by considering how educational policy might contribute to a socially just, equitable and inclusive public good.

*Reading the Riot Act* Rupa Huq MP, 2018-02-02 This lively collection presents a multi-disciplinary, multi-perspectival commentary explaining the what, where, and how of the riots that the austerity-hit UK experienced during the long, hot summer of 2011. It looks beyond London and its Tottenham district where disturbances started, to locations such as Manchester and Birmingham. Parallels are drawn with Cairo during the period of the Arab spring, and even with the Star Wars saga. The book locates the riots in historical context by looking at the previous UK riots of 1981 and 2001, looking at how news cycles and concepts such as that of ‘moral panic’ have changed in the age of social networking. It is essential reading for anyone interested in contemporary debates in social policy, media studies, anthropology sociology, cultural studies, and human geography. This book was originally published as a special issue of the Journal for Cultural Research.

*Russia and the European Union* Cynthia A. Roberts, 2007 Russia and the West have avoided renewed confrontation despite many post Cold War crises, but illiberal trends in Russia rule out any prospect of developing a mutual agenda for closer integration. Russian engagement with the leading Euro-Atlantic institutions on a special, but still subordinate, nonmember basis remains a clever yet suboptimal substitute. Such relationships, as this monograph about Russia and the European Union explains, tend to produce shallow collaboration, symbolic summitry and costly standoffs. Closer cooperation is blocked by an ongoing dispute over terms, which is rooted in asymmetries in power, ambivalent preferences, uncertainty about the distributional costs and benefits of deeper engagement, and Russia's continued unwillingness or inability to lock-in the liberal domestic structures necessary to make credible commitments. Moscow's renewed self-confidence and geopolitical ambitions, bolstered by sustained economic growth and high energy prices, complicate the bargaining and further strain these special relationships which persist for lack of a realistic, superior alternative.

**The Intergovernmental Conference on Political Union** Finn Laursen, Sophie Vanhoonacker, 2023-12-11 The radical changes taking place in the international scene during the late 1980s have presented the European Communities with important new challenges. The twelve Member States agreed that the only way to respond effectively to this new situation was to speed up the European integration process, and in December 1990 two Intergovernmental Conferences were inaugurated, focusing respectively on the development of an Economic and Monetary Union and a Political Union. It was the difficult task of the Luxembourg and Dutch Presidencies to channel the often very diverging positions of the different actors in the process

into one coherent set of amendments to the Treaties forming the European Communities. This publication examines the positions which the different Member States, the Commission and the European Parliament have been defending in the Intergovernmental Conference on Political Union and more particularly with regard to one of the most sensitive topics under discussion, namely the development of a Common Foreign and Security Policy (CFSP). The introduction places the debate on the development of a Political Union and a CFSP in an historical perspective and gives an overview of the progression of the negotiations. The concluding chapter presents a general framework for better understanding of the course and results of the negotiations, and a critical evaluation of the outcome. The annexes reproduce the main proposals on the development of a CFSP submitted to the Conference.

**The Royal Navy and Maritime Power in the Twentieth Century** Ian Speller, 2004-08-02 This book adopts an innovative new approach to examine the role of maritime power and the utility of navies. It uses a number of case studies based upon key Royal Navy operations in the twentieth century to draw out enduring principles about maritime power and to examine the strengths and limitations of maritime forces as instruments of national policy. Individual chapters focus on campaigns and operations from both World Wars and a series of post-1945 crises and conflicts from the Palestine Patrol in the 1940s to Royal Navy operations in support of British policy in the 1990s. Each case study demonstrates critical features of maritime power including: operations during the transition to war; fleet operations in narrow seas; logistics; submarine operations; the impact of air power on maritime operations; blockade; maritime power projection; amphibious warfare; jurisdictional disputes and the law of the sea; and, peace support operations. The contributors to this book all have considerable experience lecturing on these issues at the United Kingdom Joint Services Command and Staff College, where maritime campaign analysis is used to teach the principles of maritime power to officers of the Royal Navy. The book combines an authoritative examination of critical Royal Navy operations during the twentieth century with a sophisticated analysis of the nature of maritime power. As such it is of both historical interest and contemporary relevance and will prove equally valuable to academic historians, military professionals and the general reader.

*A Constitutional Order of States?* Anthony Arnall, Catherine Barnard, Michael Dougan, Eleanor Spaventa, 2011-03-03 This collection celebrates the career of Professor Alan Dashwood, a leading member of the generation of British academics who organised, explained and analysed what we now call European Union law for the benefit of lawyers trained in the common law tradition. It takes as its starting point Professor Dashwood's vivid description of the European Union as a 'constitutional order of states'. He intended that phrase to capture the unique character of the Union. On the one hand, it is a supranational order characterised by its own distinctive institutional dynamics and an unprecedented level of cohesion among, and penetration into, the national legal systems. On the other hand, it remains an organisation of derived powers, the Member States retaining their character as sovereign entities under international law. This theme permeates both the constitutional and the substantive law of the Union. Contributors to the collection include members of the judiciary and distinguished practitioners, officials and academics. They consider the foundations, strengths, implications and shortcomings of this conceptual framework in various fields of EU law and policy. The collection is an essential purchase for anyone interested in the

constitutional framework of the contemporary European Union.

### **International Congress Calendar ,2003**

Dirty Secrets Richard Murphy,2017-02-07 The Panama Papers demonstrated that the superrich hide their wealth from the rest of us. Dirty Secrets shows that this was not by accident, but by design. It was the result of a powerful alliance of the wealthy, their advisers and the state that has undermined all attempts to solve the tax haven problem. This is because tax havens are the unacknowledged heart of globalized capitalism. Their purpose is to provide freedom from regulation. The exponents say this makes markets work and so we all gain. But this argument has now failed. Furthermore democracy itself is being threatened by the political fallout from the mistrust this regime has created. The result is that tax havens are now a threat to the very system that supposedly spawned it. Dirty Secrets is the most revelatory examination of the crisis by a leading expert, but also offers solutions on how governments can regulate havens and what the world might look like without them.

**Blair's Successful War** Andrew M. Dorman,2016-04-08 Andrew Dorman introduces Sierra Leone as Blair's second great military adventure after Kosovo and the first he undertook on his own. It is tied to Blair's 1999 Chicago speech on the 'Doctrine of the International Community', his move towards humanitarianism and the impact of the Kosovo experience. The book links this move with the rise of cosmopolitan militaries and the increasing involvement of Western forces in humanitarian operations and their impact on the international system. Furthermore, it places it within the context of defence transformation and the emerging Western expeditionary capabilities, in particular the European Union's new battle group concept and developments in concepts such as Network Centric Warfare and Networked Enabled Capability. Examining the whole campaign and considering the impact on the Blair Government, this book will prove to be a key reader on the topic.
