The Reluctant Vegetarian Cookbook Sharalyn Pliler,2009-07-08 "Who in their right minds would ever want to be a vegetarian?" Sharalyn Pliler asked just months before she--accidentally--became one. A few days into a camping trip in the woods, she was amazed to experience that instead of getting weaker without meat, just the opposite happened--she felt more energetic, lighter and more clear-headed, needing to eat less than before while enjoying food even more, as if her taste buds had come alive. Reluctant to become a vegetarian but unable to argue with definitive direct experience, she had no choice but to begin the transition from familiar meat cookery to the unknown world of vegetarianism. Not many cookbooks are page-turners but with her light-hearted style, down-home sense of humor and master's level writing skills, readers are carried effortlessly as she tells her story of awakening to the pleasures and techniques of vegetarianism. Once a cook in a vegetarian university kitchen, now with three decades of vegetarian experience, she seems to anticipate every question.

That is so not true. A little bit of planning and this fallacy is going to fall to pieces by the wayside. Those who are grown annuals for years are going to give this statement the lie gladly. Their initial investment must have been just a packet of seeds. The next year, the plants were grown from the seeds collected from the previous years' crop. Do not forget that the life of an annual is limited to just 12 months and so you must not expect them to grow up and bloom again the next year, unless of course you allowed the seeds to lie in the bed without collecting them. That is when they are going to bloom up just like weeds with a little bit of rain, and with the coming of the spring. One of the great advantages of annuals is that they are quite easy to grow and flourish in your garden over a long period. The most common are well known to even amateur gardeners who can recognize a cornflower, nasturtiums, Virginia stock and Candytuft. These are very beautiful in themselves, but every gardener is growing them in his garden.
