Rising incidence of life style and age related diseases, side effects of drugs in western medication system and heavy cost for managing these health conditions have turned people more towards natural healthcare system. Today we are experiencing what can be termed as herbal renaissance, which has increased the use of natural or nature-based supplements and drugs for the management of chronic ailments. Researchers acknowledge the utility of traditional herbs and their way of healing, which exists from time immemorial. Turmeric is one of the most popular traditionally used herb and also known as golden spice. It is grown in various parts of India and other Asian countries, and has been held sacred since ancient times. Curcumin is the major and the active ingredient of Turmeric (*Curcuma longa*); also responsible for its yellow color. Turmeric has strong relation with the socio-cultural life of the Indian subcontinent and in Vedic period, people regarded it as herb of the sun [Duggi et al. 2013]. In Ayurveda, the traditional Indian herbal system of medicine, the therapeutic role of turmeric has been described as Dashemani Lekhaniya (emaciating), Kusthagna (anti-dermatosis) and Visaghna (anti-poisonous) [Krup V et al. 2013]. Since ancient time, turmeric has been used as traditional medicine in the treatment of various diseases like asthma, cough, allergic rhinitis, urinary disorders, jaundice, diarrhea, biliary disorders, anorexia, diabetic wounds, sprains and swellings caused by injury. The dried turmeric powder has been used topically for insect stings, chickenpox and smallpox [Ravindran et al. 2007]. In the modern scientific world, Curcumin has been the subject of extensive study into its mechanism of action and therapeutic use in managing several diseases. It has been described to possess antioxidant, anti-inflammatory,

antibacterial, antifungal, antiparasitic, antimutagenic, anticancer and detox properties [Majeed M et al. 1999]. Since the antioxidant activities of Curcumin are not degraded by heat (unlike most vitamins), even using the spice in cooking provide benefits. In other words it is also the spice of life.

Making It Big Andrea Ciani, Marie Caitriona Hyland, Nona Karalashvili, Jennifer L. Keller, Trang Thu Tran, 2020-10-08 Economic and social progress requires a diverse ecosystem of firms that play complementary roles. Making It Big: Why Developing Countries Need More Large Firms constitutes one of the most up-to-date assessments of how large firms are created in low- and middle-income countries and their role in development. It argues that large firms advance a range of development objectives in ways that other firms do not: large firms are more likely to innovate, export, and offer training and are more likely to adopt international standards of quality, among other contributions. Their particularities are closely associated with productivity advantages and translate into improved outcomes not only for their owners but also for their workers and for smaller enterprises in their value chains. The challenge for economic development, however, is that production does not reach economic scale in low- and middle-income countries. Why are large firms scarcer in developing countries? Drawing on a rare set of data from public and private sources, as well as proprietary data from the International Finance Corporation and case studies, this book shows that large firms are often born large—or with the attributes of largeness. In other words, what is distinct about them is often in place from day one of their operations. To fill the “missing top” of the firm-size distribution with additional large firms, governments should support the creation of such firms by opening markets to greater competition. In low-income countries, this objective can be achieved through simple policy reorientation, such as breaking oligopolies, removing unnecessary restrictions to international trade and investment, and establishing strong rules to prevent the

abuse of market power. Governments should also strive to ensure that private actors have the skills, technology, intelligence, infrastructure, and finance they need to create large ventures. Additionally, they should actively work to spread the benefits from production at scale across the largest possible number of market participants. This book seeks to bring frontier thinking and evidence on the role and origins of large firms to a wide range of readers, including academics, development practitioners and policy makers.

### **Global Status Report on Noncommunicable Diseases**

**2014** World Health Organization, 2014 This global status report on prevention and control of NCDs (2014), is framed around the nine voluntary global targets. The report provides data on the current situation, identifying bottlenecks as well as opportunities and priority actions for attaining the targets. The 2010 baseline estimates on NCD mortality and risk factors are provided so that countries can report on progress, starting in 2015. In addition, the report also provides the latest available estimates on NCD mortality (2012) and risk factors, 2010-2012. All ministries of health need to set national NCD targets and lead the development and implementation of policies and interventions to attain them. There is no single pathway to attain NCD targets that fits all countries, as they are at different points in their progress in the prevention and control of NCDs and at different levels of socioeconomic development. However all countries can benefit from the comprehensive response to attaining the voluntary global targets presented in this report.--Publisher description.

Future-Oriented Technology Analysis Cristiano Cagnin, Michael Keenan, Ron Johnston, Fabiana Scapolo, Rémi Barré, 2008-07-29 The application of foresight to address the challenges of uncertainty and rapid change has grown dramatically in the past decade. In

that period, the techniques have been greatly refined and the scope has been broadened to encompass future-oriented technology analysis (FTA) and more recently, the concept and practice of strategic intelligence. FTA addresses directly the longer-term future through the active and continuous development of visions, and pathways to realise these visions. It is increasingly seen as a valuable management and policy tool complementing, and extending further into the future, classical strategy, planning, and decision-making approaches. This book charts the development of FTA and provides the first coherent description and analysis of its practical application and impact in the worlds of business, government, education and research in both advanced and developing countries. It draws on papers addressing the application of FTA around the globe which were presented at the Second International Seville Seminar in September 2006. The insights and practical experience will be invaluable for company managers, government ministers and officials, researchers and academics with responsibilities for effective planning and decision-making in an increasingly turbulent and unpredictable world.

He suggests approaches for fostering public health, and discusses future challenges for health promotion and disease prevention around the world. The text can also be used as a reference by those

working in government agencies, international health and development agencies, and NGOs.

*Global Financial Stability Report, April 2015* International Monetary Fund. Monetary and Capital Markets

Department, 2015-04-15 The current report finds that, despite an improvement in economic prospects in some key advanced economies, new challenges to global financial stability have arisen. The global financial system is being buffeted by a series of changes, including lower oil prices and, in some cases, diverging growth patterns and monetary policies. Expectations for rising U.S. policy rates sparked a significant appreciation of the U.S. dollar, while long term bond yields in many advanced economies have decreased—and have turned negative for almost a third of euro area sovereign bonds—on disinflation concerns and the prospect of continued monetary accommodation. Emerging markets are caught in these global cross currents, with some oil exporters and others facing new stability challenges, while others have gained more policy space as a result of lower fuel prices and reduced inflationary pressures. The report also examines changes in international banking since the global financial crisis and finds that these changes are likely to promote more stable bank lending in host countries. Finally, the report finds that the asset management industry needs to strengthen its oversight framework to address financial stability risks from incentive problems between end-investors and portfolio managers and the risk of runs due to liquidity mismatches.

Understanding the Global Energy Crisis Richard A.

Simmons, Eugene D. Coyle, 2014-03-15 We are facing a global energy crisis caused by world population growth, an escalating increase in demand, and continued dependence on fossil-based fuels for generation. It is widely accepted that increases in greenhouse gas concentration levels, if not reversed, will result in major changes to world climate with consequential effects on our society and economy. This is just the kind of intractable problem

that Purdue University's Global Policy Research Institute seeks to address in the Purdue Studies in Public Policy series by promoting the engagement between policy makers and experts in fields such as engineering and technology. Major steps forward in the development and use of technology are required. In order to achieve solutions of the required scale and magnitude within a limited timeline, it is essential that engineers be not only technologically-adept but also aware of the wider social and political issues that policy-makers face. Likewise, it is also imperative that policy makers liaise closely with the academic community in order to realize advances. This book is designed to bridge the gap between these two groups, with a particular emphasis on educating the socially-conscious engineers and technologists of the future. In this accessibly-written volume, central issues in global energy are discussed through interdisciplinary dialogue between experts from both North America and Europe. The first section provides an overview of the nature of the global energy crisis approached from historical, political, and sociocultural perspectives. In the second section, expert contributors outline the technology and policy issues facing the development of major conventional and renewable energy sources. The third and final section explores policy and technology challenges and opportunities in the distribution and consumption of energy, in sectors such as transportation and the built environment. The book's epilogue suggests some future scenarios in energy distribution and use.

**Trading Promises for Results** Mauricio Mesquita

Moreira,Ernesto H. Stein,Kun Li,Federico Merchán,Christian Volpe Martincus,Juan S. Blyde,Danielle Trachtenberg,Jorge Cornick,Jeffrey Frieden,Marisol Rodríguez Chatruc,Rzavan Vlaicu,Víctor Zuluaga,Tomás Bril-Mascarenhas,Sergio Ardila,Piero Ghezzi,Thomas Reardon,2019-09-23 Thirty years after the region embarked on large-scale liberalization, trade policy could have been expected to become all but irrelevant. Instead, a mismatch

between expectations and what could realistically be delivered set the stage for much of the disappointment, skepticism, and fatigue regarding trade policy in the region, particularly in the early 2000s. By setting the bar unrealistically high, governments and analysts made trade policies an easy target for special interests that were hurt by liberalization and for those ideologically opposed to free trade. The most immediate victims were the more tangible growth and welfare gains, whose relevance was lost amid the noise of grandiose visions.

### **Global Monitoring Report 2014/2015** World

Bank;International Monetary Fund,2014-10-21 The Global Monitoring Report 2014/2015: Ending Poverty and Sharing Prosperity was written jointly by the World Bank Group (WBG) and the International Monetary Fund, with substantive inputs from the Organisation for Economic Co-operation and Development. This year's report details, for the first time, progress toward the WBG's twin goals of ending extreme poverty by 2030 and promoting shared prosperity and assesses the state of policies and institutions that are important for achieving them. The report continues to monitor progress on the Millennium Development Goals (MDGs). Also for the first time, the report includes information about high-income countries. It finds that while gaps in living standards have been closing in many countries, the well-being of households in the bottom 40 percent, as measured by the non-income MDGs such as access to education and health services, remains below that of households in the top 60 percent. The focus of this year's report is on three elements needed to make growth more inclusive and sustainable: investment in human capital that favors the poor, the best use of safety nets, and steps to ensure the environmental sustainability of economic growth. These three elements are imperative to all countries' development strategies, and are also fundamental to global efforts to achieve the twin goals, the MDGs, and the Sustainable Development Goals that will succeed the MDGs. Global Monitoring

Report 2014/2015 was prepared in collaboration with regional development banks and other multilateral partners.

**Key Concepts in Event Management** Bernadette

Quinn,2013-03-25 I found this text to be exactly what we were looking for to give our students a good understanding of the contemporary issues that affect the Events industry. I have recommended this as essential reading. It is well written and the format makes it an easy read raising key issues and challenging theory. - Tanya Bellingham, School of Tourism & Hospitality, University of Plymouth An essential events management reference handbook which addresses a number of key issues within the industry. A very interesting read! - Thomas Fletcher, Liverpool John Moores University In recent years we have seen an enormous growth of festivals and event activity and the literature within the field is consequently huge. In order to make sense of this rapid and dynamic development, students are dependent on a book that can lead them through the myriad of theoretical frameworks offered. This book naturally situates itself in the middle of this need, offering a comprehensive and illuminating account of the festival and event field. Written with academic rigour yet accessible at the same time, Quinn proves herself to be an outstanding communicator and stimulator of knowledge. International in content and timely in its up to date coverage of key topics, this will be an invaluable reference source for students from of Event Management, Hospitality Management, Tourism Management, and Sport and Leisure Management.

### **Implementing the Water-Energy-Food- Ecosystems Nexus and Achieving the Sustainable Development Goals**

Cesar Carmona-Moreno,E. Crestaz,Y. Cimmarrusti,F. Farinosi,M. Biedler,A. Amani,A. Mishra,A. Carmona-Gutierrez,2021-09-15 The book's primary intention is to serve as a roadmap for professionals working in developing countries interested in the Nexus Water-Energy-Food-Ecosystems (WEFE) approach. The book shows a multi-disciplinary approach, showcasing the importance of the proper use of Nexus WEFE when implementing certain development programs in regions around the globe. It can be presented as a manual for an individual that either wishes to implement intervention projects following the NEXUS approach or students interested in cooperation and development. The book begins with a general explanation of the theoretical concepts and implementation processes of Nexus WEFE and continues getting into case studies, explaining the importance of proper implementation and potential drawbacks and solutions to them. This book has a particular focus on the European Union cooperation policies when implementing such an approach in developing countries.

### **Measuring the Economic Importance of the Meetings Industry** World Tourism Organization,2006

Lifelines Stephane Hallegatte,Jun Rentschler,Julie Rozenberg,2019-07-16 Infrastructure—electricity, telecommunications, roads, water, and sanitation—are central to people's lives. Without it, they cannot make a living, stay healthy, and maintain a good quality of life. Access to basic infrastructure is also a key driver of economic development. This report lays out a framework for understanding infrastructure resilience - the

ability of infrastructure systems to function and meet users' needs during and after a natural hazard. It focuses on four infrastructure systems that are essential to economic activity and people's well-being: power systems, including the generation, transmission, and distribution of electricity; water and sanitation—especially water utilities; transport systems—multiple modes such as road, rail, waterway, and airports, and multiple scales, including urban transit and rural access; and telecommunications, including telephone and Internet connections.

**Global Financial Development Report 2014** World Bank, World Bank Group, 2013-11-07 The second issue in a new series, Global Financial Development Report 2014 takes a step back and re-examines financial inclusion from the perspective of new global datasets and new evidence. It builds on a critical mass of new research and operational work produced by World Bank Group staff as well as outside researchers and contributors.
