Survey Sampling Principles E.K. Foreman,1991-06-28 An introduction to the essentially mathematical principles of survey sampling as they are applied in practice. Intended for survey sampling theorists and practitioners, as a guide for those who may have to design and conduct a survey, and for those commissioning, organizing, and overseeing survey op

Utilizing Technology, Knowledge, and Smart Systems in Educational Administration and Leadership Durnali, Mehmet,2019-12-06 Within educational organizations, administration and leadership are relied upon for the allocation of resources as well as the optimization of processes that can include data storage, knowledge management, and decision making. To support these expectations, technologies, knowledge, and smart systems must be put into place that allow administrators and leaders to accomplish these tasks as efficiently as possible. Utilizing Technology, Knowledge, and Smart Systems in Educational Administration and Leadership is an academic research book that examines knowledge regarding the scholarly exploration of the technologies, information/knowledge, and smart systems in educational administration and leadership. It provides a holistic, systematic, and comprehensive paradigm. Featuring a wide range of topics such as technology leadership in schools, technology integration in educational administration, and professional development, this book is ideal for school administrators, educational leaders, principals, IT consultants, educational software developers, academicians, researchers, professionals, educational policymakers, educators, and students.

Academia Inc. Jamie Brownlee,2015-05-01T00:00:00Z Canadian universities are being slowly but inexorably corporatized. Casualizing academic labour, remaking students into consumers of education, implementing corporate management models and commercializing academic research all point to the ascendance of business interests and values in Canada’s higher education system. Academia, Inc. examines the tensions that result from the merging of two fundamentally incompatible institutions – the university and the corporation. Brownlee argues that moving from liberal education to corporate job training, public service to profit-making and critical research to commercial invention radically undermines the goals of higher education. Investigating the history, causes and impacts of corporatization, this book explores how this transformation has taken shape and its ramifications for both universities and society as a whole. Brownlee suggests several strategies for resisting this process.
