Theory of Sample Surveys M. Thompson,1997-08-01 Following the chronological development of sample surveys, this book provides an analysis of the mathematical and statistical theory of the subject. The text begins with the mathematics of randomized sampling designs as well as a general treatment of estimation of population totals through the Horvits-Thompson estimator and its variants. The book then examines approximations and limit theorems for the distribution of the estimators and design-based estimation of other population quantities. It concludes with chapters concerning inference from surveys. Theory of Sample Surveys will assist in a range of applications, including: auditing quality monitoring market research wildlife surveys mining exploration agriculture and business surveys population health studies This book acts as an exceptional resource for survey methodologists in government organizations as well as lecturers and graduate students in statistics and biostatistics.

Colonial Survey and Native Landscapes in Rural South Africa, 1850 - 1913 Lindsay F. Braun,2014-10-16 In Colonial Survey and Native Landscapes in Rural South Africa, 1850 - 1913, Lindsay Frederick Braun explores the technical processes and struggles surrounding the creation and maintenance of boundaries and spaces in South Africa in the nineteenth and early twentieth centuries.

Disability and Equality Law ElizabethF. Emens,2017-07-05 This interdisciplinary collection of essays addresses the theoretical, practical and legal dimensions of equality for persons with disabilities. The issues covered include the central problem of defining disability and impairment; the dilemma of same versus different treatment; the balance between autonomy and external influence and support; linkages to other anti-discrimination categories such as race and sex; the place of disability theory within identity politics; and issues of life, death, and our most intimate relationships. The articles reflect a wealth of international viewpoints and interdisciplinary areas which include philosophy, economics, memoirs, cultural studies, empirical studies and legal scholarship. The selection also includes classic texts which set out foundational ideas such as the social model of disability or the goal of integration, alongside essays that critique these conceptual mainstays. This volume brings into sharp focus a wide range of contentious and complex issues in the field of disability studies and is of interest to researchers and students from a wide range of fields.

Theory of Sample Surveys M. E. Thompson,2013-08-21 This book began about ten years ago as an attempt to fill out the notes for a graduate course in sampling theory. It has become a monograph, intended to supplement rather than replace books already available. For example, there are many good treatments at various levels on the practical problems of survey design, and on the 'how to' of analysis. I have dealt with these issues to some extent, but have focused more on aspects of sampling theory which are not so commonly treated else where. Parts of the book can still be used in teaching, supplemented sufficiently with examples and other material. The book deals with a subject of great vitality. The theory of survey methods is developing fast, with more and more connections to other parts of statistics, as the needs of practitioners change, and as more uses of survey data become possible. As a consequence of increases in computing power and capability, data are easier to manipulate, and computer-intensive methods for analysis can be investigated with reas onable assurance that the better ones will soon be practical.

Teaching the Literature Survey Course Gwynn Dujardin,James M. Lang,John A. Staunton,2018 Teaching the Literature Survey Course makes the case for maintaining--even while re-imagining and re-inventing--the place of the survey as a transformative experience for literature students. Through essays both practical and theoretical, the collection presents survey teachers with an exciting range of new strategies for energizing their teaching and engaging their students in this vital encounter with our evolving literary traditions. From mapping early English literature to a team-based approach to the American survey, and from multimedia galleries to a blank syllabus, contributors propose alternatives to the traditional emphasis on lectures and breadth of coverage. The volume is at once a set of practical suggestions for working teachers (including sample documents like worksheets and syllabi) and a provocative engagement with the question of what introductory courses can and should be.
