By targeting select response groups, online surveys are a great way to help your business, group, or organization get valuable feedback quickly. But with over 40 vendors and hundreds of options available, where do you start? This friendly book walks you step by step through the process of creating, launching, and getting results from an online survey. You'll learn about the tools involved, what results to expect, how to build a compelling survey, tips for identifying the right audience, and how to analyze the results. Discover What a survey is and how to put one together Survey lingo and a sample survey to study How to develop questions and assemble them into an attractive, easy-to-use interface that encourages response Tips for identifying and contacting the respondents you want to hear from The steps involved in making a usable analysis of the results Pitfalls to avoid, things to check out before launching a survey, and best practices With the book, you'll also receive three months of free service from a top survey vendor to get you started.

Surveys That Work Caroline Jarrett, 2021-08-17 *Surveys That Work* explains a seven-step process for designing, running, and reporting on a survey that gets accurate results. In a no-nonsense style with plenty of examples about real-world compromises, the book focuses on reducing the errors that make up Total Survey Error—a key concept in survey methodology. If you are conducting a survey, this book is a must-have.

Lectures and Surveys on G2-Manifolds and Related Topics Spiro Karigiannis, Naichung Conan Leung, Jason D. Lotay, 2020-05-26 This book, one of the first on G2 manifolds in decades, collects introductory lectures and survey articles largely based on talks given at a workshop held at the Fields Institute in August 2017, as part of the major thematic program on geometric analysis. It provides an accessible introduction to various aspects of the geometry of G2 manifolds, including the construction of examples, as well as the intimate relations with calibrated geometry, Yang-Mills gauge theory, and geometric flows. It also features the inclusion of a survey on the new topological and analytic invariants of G2 manifolds that have been recently discovered. The first half of the book, consisting of several introductory lectures, is aimed at experienced graduate students or early career researchers in geometry and topology who wish to familiarize themselves with this burgeoning field. The second half, consisting of numerous survey articles, is intended to be useful to both beginners and experts in the field.

Surveys on Surgery Theory Sylvain E. Cappell, Charles Terence Clegg Wall, Andrew Ranicki, Jonathan Rosenberg, 2000-01-10 Surgery theory, the basis for the classification theory of manifolds, is now about forty years old. There have been some extraordinary accomplishments in that time, which have led to enormously varied interactions with algebra, analysis, and geometry. Workers in many of these areas have often lamented the lack of a single source that surveys surgery theory and its applications. Indeed, no one person could write such a survey. The sixtieth birthday of C. T. C. Wall, one of the leaders of the founding generation of surgery theory, provided an opportunity to rectify the situation and produce a comprehensive book on the subject. Experts have written state-of-the-art reports that will be of broad interest to all those interested in topology, not only graduate students and mathematicians, but mathematical physicists as well. Contributors include J. Milnor, S. Novikov, W. Browder, T. Lance, E. Brown, M. Kreck, J. Klein, M. Davis, J. Davis, I. Hambleton, L. Taylor, C. Stark, E. Pedersen, W. Mio, J. Levine, K. Orr, J. Roe, J. Milgram, and C. Thomas.

The SAGE Handbook of Online Research Methods Nigel G Fielding, Raymond M Lee, Grant Blank, 2016-09-30 This best-selling handbook has been brought fully up-to-date with coverage of recent developments in the field including social media, big data, data visualization and CAQDAS.

Surveys on Recent Developments in Algebraic Geometry Izzet Coskun, Tommaso de Fernex, Angela Gibney, 2017-07-12 The algebraic geometry community has a tradition of running a summer research institute every ten years. During these influential meetings a large number of mathematicians from around the world convene to overview the developments of the past decade and to outline the most fundamental and far-reaching problems for the next. The meeting is preceded by a Bootcamp aimed at graduate students and young researchers. This volume collects ten surveys that grew out of the Bootcamp, held July 6-10, 2015, at University of Utah, Salt Lake City, Utah. These papers give succinct and thorough introductions to some of the most important and exciting developments in algebraic geometry in the last decade. Included are descriptions of the striking advances in the Minimal Model Program, moduli spaces, derived categories, Bridgeland stability, motivic homotopy theory, methods in characteristic and Hodge theory. Surveys contain many examples, exercises and open problems, which will make this volume an invaluable and enduring resource for researchers looking for new directions.

Doing Surveys Online Vera Toepoel, 2015-11-02 Vera Toepoel's practical, how-to guide to doing surveys online takes you through the entire process of using surveys, from systematically recruiting respondents, to designing the internet survey, to processing the survey data and writing it up. This book helps students and researchers in identifying possible strategies to make the best use of online surveys, providing pro's and con's, and do's and don'ts for each strategy. It also explores the latest opportunities and developments that have arisen in the field of online surveys, including using social networks, and provides expert guidance and examples of best practice throughout. Suitable for those starting a research project or conducting a survey in a professional capacity, this book is the ideal go-to reference for anyone using internet surveys, be it a beginner or a more experienced survey researcher.

Handbook of Web Surveys Jelke Bethlehem, Silvia Biffignandi, 2011-09-26 BEST PRACTICES TO CREATE AND IMPLEMENT HIGHLY EFFECTIVE WEBSURVEYS Exclusively combining design and sampling issues, Handbook of Web Surveys presents a theoretical yet practical approach to creating and conducting web surveys. From the history of websurveys to various modes of data collection to tips for detecting error, this book thoroughly introduces readers to the this cutting-edge technique and offers tips for creating successful websurveys. The authors provide a history of web surveys and go on to explore the advantages and disadvantages of this mode of data collection. Common challenges involving under-coverage, self-selection, and measurement errors are discussed as well as topics including: Sampling designs and estimation procedures Comparing web surveys to face-to-face, telephone, and mail surveys Errors in web surveys Mixed-mode surveys Weighting techniques including post-stratification, generalized regression estimation, and raking ratio estimation Use of propensity scores to correct bias Web panels Real-world examples illustrate the discussed concepts, methods, and techniques, with related data freely available on the book's Website. Handbook of Web Surveys is an essential reference for researchers in the fields of government, business, economics, and the social sciences who utilize technology to gather, analyze, and draw results from data. It is also a suitable supplement for survey methods courses at the upper-undergraduate and graduate levels.

Overseas Research II Christopher B. Barrett,Jeffrey Cason,2010-04-05 Researchers in developing countries often find that the particular country in which they work presents a range of unforeseen challenges. Indeed, their ability to carry out effective scholarship is often highly dependent on these factors. The great differences between working in countries as varied as India, China, Bolivia and Kenya can often come as a shock to the system. An ability to negotiate a bewildering array of cultural and logistical obstacles is therefore essential. *Overseas Research II: A Practical Guide* distils essential lessons learned by scores of students and scholars who have collected data and done fieldwork abroad. The authors fill the reader in on the many crucial pieces of advice: how to prepare for the field, how and where to find funding for one's fieldwork, issues of personal safety and security, and myriad logistical and relational issues that often define one's research experience abroad. As Christopher B. Barrett and Jeffrey Cason suggest, Fieldwork is a sequence of decisions, some about the conduct of research, some about the conduct of life. The book focuses new field researchers' attention on that productive intersection, and includes many real-life accounts from experienced professionals whose own work abroad can inform those facing the field for the first time.

Overseas Research Christopher B. Barrett, Jeffrey Cason, Erin C. Lentz, 2020-03-06 When conducting research in developing countries, an ability to negotiate a bewildering array of cultural and logistical obstacles is essential. Overseas Research: A Practical Guide distills essential lessons from scores of students and scholars who have collected data and done fieldwork abroad, including how to prepare for the field, how and where to find funding for one's fieldwork, issues of personal safety and security, and myriad logistical and relational issues. By encouraging researchers to think through the challenges of research before they begin it, Overseas Research will help prepare fieldworkers for the practical, logistical, and psychological considerations of very demanding work, help save valuable time, make the most of scarce financial resources, and enhance the quality of the field research. This third edition contains new material on social media, including representation of research subjects/collaborators, students' digital branding and image, and representing universities abroad when posting publicly. It also covers emerging technologies such as solar panels for power in remote locations, new ways of digitally sending and receiving money, and incorporates more perspectives of women, LGBTQ+ people, and people of color researching abroad. The book will be of interest to overseas fieldworkers, and also to undergraduates in subjects such as anthropology, economics, geography, history, international studies, politics, sociology, and development studies.
