The Victims of Terrorism Bruce Hoffman,Anna-Britt Kasupski,2007 Little attention and analysis have focused on terrorism victims, including survivors. This report focuses on the organized groups of families and friends that have emerged since September 11, 2001, to become a powerful voice in U.S. counterterrorist policy and legislation. These groups were remarkably successful in getting the 9/11 Commission established as well as the enactment of the commission's most important recommendations. This report documents these groups' number and diversity, their wide disparity in mission and services, in addition to the effectiveness of their strategies for achieving their missions. It also compares the 9/11 victims' groups to those formed in response to previous terrorist attacks both in the United States and abroad, highlighting the lessons the 9/11 groups learned from these precedents and the differences between 9/11 groups and those that preceded them.--Rand web site

Preparing for the Psychological Consequences of Terrorism Institute of Medicine,Board on Neuroscience and Behavioral Health,Committee on Responding to the Psychological Consequences of Terrorism,2003-08-26 The Oklahoma City bombing, intentional crashing of airliners on September 11, 2001, and anthrax attacks in the fall of 2001 have made Americans acutely aware of the impacts of terrorism. These events and continued threats of terrorism have raised questions about the impact on the psychological health of the nation and how well the public health infrastructure is able to meet the psychological needs that will likely result. *Preparing for the Psychological Consequences of Terrorism* highlights some of the critical issues in responding to the psychological needs that result from terrorism and provides possible options for intervention. The committee offers an example for a public health strategy that may serve as a base from which plans to prevent and respond to the psychological consequences of a variety of terrorism events can be formulated. The report includes recommendations for the training and education of service providers, ensuring appropriate guidelines for the protection of service providers, and developing public health surveillance for preevent, event, and postevent factors related to psychological consequences.

Victims Of Terrorism Frank M. Ochberg,David A. Soskis,1982-08-02

Surviving Terrorism Jarret B. Wollstein,2002-01-01

Through the Perilous Night Paul Sherbo,2021-05-12 Author Paul Sherbo narrates a fast paced, page-turning, timeline of events as described by U.S. Military survivors of the terrorist attack in Dhahran, Saudi Arabia. The blast destroyed the, Khobar Towers Dormitories, on June 25, 1996, killing 19 Airmen and injuring hundreds more. Survivors share stories of heroic efforts of fellow service members and offer detailed insight into conditions before, during and the aftermath of the bombing of Building 131. The Victims of Terrorism: An Assessment of Their Influence and Growing Role in Policy, Legislation, and the Private Sector, 2007 Little attention and analysis have focused on terrorism victims, including survivors. This report focuses on the organized groups of families and friends that have emerged since September 11, 2001, to become a powerful voice in U.S. counterterrorism policy and legislation. These groups were remarkably successful in getting the 9/11 Commission established as well as the enactment of the commission's most important recommendations. This report documents these groups' number and diversity, their wide disparity in mission and services, in addition to the effectiveness of their strategies for achieving their missions. It also compares the 9/11 victims' groups to those formed in response to previous terrorist attacks both in the United States and abroad, highlighting the lessons the 9/11 groups learned from these precedents and the differences between 9/11 groups and those that preceded them. This is the second release of this Occasional Paper. After completion of RAND's quality-assurance process and first release of the paper, RAND learned of concerns from some readers about the authors' way of describing distinctions among various groups. Some viewed the authors' placement of such groups into a tier system as a ranking of the groups' general influence and importance. This had not been the authors' intent. To address this ambiguity in classification, RAND undertook a second editing of the document. The tier description has been replaced by a categorization of groups -- an approximation based on the groups' own stated agendas and activities -- into national policy reform, state and local policy reform, and victim and family support groups. The paper no longer contains any suggestion of a ranking or scoring of groups' influence. In addition, RAND has amended the dates on which various groups were formed and the types of membership categories of certain groups and their membership numbers.

Life After Terrorism Bruce D. Clayton, 2002-07-01 What do you need to know to protect your family in today's world? To begin, you need to know the history of terrorists - who they are and what methods they use. You need to have some knowledge of chemistry, microbiology, genetics, physiology and anatomy. You must learn about hazardous materials, radiological defense and nuclear weapons effects. You need to know about food and water storage and escape routes from where you live and work. It helps to know what emergency management and disaster response look like from the inside. What you really need is the help of Dr. Bruce Clayton, author of the nuclear-survival classic, *Life After Doomsday*. In *Life After Terrorism* Dr. Clayton takes a look at today's terrorist threats, assesses their dangers realistically and explains in practical terms what you can do to reduce your risks. Hopefully, your family will never be the victims of a terrorist attack, but after September 11, do you want to bet on it? When your loved ones' lives are at stake, you can't afford to be naive or make mistakes. Prepare now for life after terrorism.

Extreme Survival Bill Mattos, Antonio Akkermans, Bob Morrison, Harry Cook, 2013-01-01 This is the ultimate guide to staying alive in extreme situations -- those events we think will never happen to us, but one day might. This book is the key to surviving lifethreatening events, accidents, random attacks and politically motivated insurgencies where we live, work or take holidays. Using the tactics, skills and tricks of the trade taught in this survivors' manual could save your life when danger or terror suddenly strikes -- at home, in the office, in the street, when traveling in unknown and inhospitable situations, or when exposed to the wilderness. Written by experts in the field, this

authoritative book reveals the secrets of wilderness and urban survival, and teaches the essential skills needed to survive any jeopardy. Structured into two sections, the first shows the essential bushcraft skills needed to survive outdoors in every climate and terrain: how to make shelters, how to find drinking water, how to start a fire from scratch, how to stalk and trap animals for food, and how to orienteer without a map. The second section focuses on how to ensure personal safety when everyday situations become life-threatening, including hostage situations, counter-terrorism techniques, selfdefense against personal attacks, and how to deal with car hijacking, house fires, transport accidents and medical emergencies. With its emphasis on teaching practical skills, this survival manual deals with identifying and anticipating risks and hazards early enough so you won't be caught off-guard. Then, if you are faced with extreme disaster or confrontation, you can respond positively and calmly to adversity.

An Immodest Proposal for Ending and Winning the War on Terror Gene Lalor, 2008-03-21 An Immodest Proposal for Ending and Winning the War on Terror: A Curmudgeons Plan for Survival, by Gene Lalor, Ph.D. is a must-read in this momentous election year--for those with an interest in Americas survival. After a detailed examination of why America is in dire straits, the author outlines a 10-point plan for avoiding all-out war with Islam, this war on terrorism which could well represent the early stages of World War Three. Our wars in Iraq and Afghanistan are all but inconsequential, simply two fields of battle, two fronts in our much larger war with Islam and their significance pales in comparison. In the dubious eventuality that the first phase does not succeed, he presents Phase Two, a 10-point plan for decisive victory over terrorism.
