The Data Detective Tim Harford,2022-02-01 From “one of the great (greatest?) contemporary popular writers on economics” (Tyler Cowen) comes a smart, lively, and encouraging rethinking of how to use statistics. Today we think statistics are the enemy, numbers used to mislead and confuse us. That’s a mistake, Tim Harford says in *The Data Detective*. We shouldn’t be suspicious of statistics—we need to understand what they mean and how they can improve our lives: they are, at heart, human behavior seen through the prism of numbers and are often “the only way of grasping much of what is going on around us.” If we can toss aside our fears and learn to approach them clearly—understanding how our own preconceptions lead us astray—statistics can point to ways we can live better and work smarter. As “perhaps the best popular economics writer in the world” (New Statesman), Tim Harford is an expert at taking complicated ideas and untangling them for millions of readers. In *The Data Detective*, he uses new research in science and psychology to set out ten strategies for using statistics to erase our

biases and replace them with new ideas that use virtues like patience, curiosity, and good sense to better understand ourselves and the world. As a result, *The Data Detective* is a big-idea book about statistics and human behavior that is fresh, unexpected, and insightful.

Partnership Motives and Ethics in Corporate

Investment in Higher Education Clevenger, Morgan R., MacGregor, Cynthia J., Sturm, Paul, 2021-06-25 The roles that corporate social responsibility (CSR) and business support of democracy play in American higher education are infrequently discussed, though very important. There are many ethical issues that concern both corporate interests as well as higher education, linking the two more than many would think. It is necessary to understand the environment, inter-organizational relationships, and documents holistically to observe the rich history, pluralistic American societal issues, and relevant milestones between corporate America and higher education. *Partnership Motives and Ethics in Corporate Investment in Higher Education* provides comprehensive documentation of business and corporate entanglements with higher education. This work discusses the historic journey of funding from business and U.S. corporate engagement in American higher education. Covering topics such as academy-business relationships, philanthropic partnerships, and transactional partnerships, this work is essential for professors, executives, managers, faculty, fundraisers, leaders in higher education, researchers,

From the Outside In Carolyn T. Adams, 2014-10-31 In *From the Outside In*, Carolyn T. Adams addresses the role of suburban elites in setting development agendas for urban municipalities and their larger metropolitan regions. She shows how major nongovernmental, nonmarket institutions are taking responsibility for reshaping

Philadelphia, led by suburban and state elites who sit on boards and recruit like-minded suburban colleagues to join them. In Philadelphia and other American cities, Third Sector organizations have built and expanded hospitals, universities, research centers, performing arts venues, museums, parks, and waterfronts, creating whole new districts that are expanding outward from the city's historic downtown. The author draws on three decades of scholarship on Philadelphia and her personal experience in the city's nonprofit world to argue that suburban elites have recognized the importance of the central city to their own future and have intervened to redevelop central city land and institutions. Suburban interests and state allies have channeled critical investments in downtown development and K-12 education. Adams contrasts those suburban priorities with transportation infrastructure and neighborhood redevelopment, two policy domains in which suburban elites display less strategic engagement. From the Outside In is a rich examination of the promise and difficulty of governance that is increasingly distinct from elected government and thus divorced from the usual means of democratic control within an urban municipality.
