Life Cycle Sustainability Assessment (LCSA)

Subramanian Senthilkannan Muthu,2021-09-21 Environmental Life Cycle Assessment (ELCA) that was developed about three decades ago demands a broadening of its scope to include lifecycle costing and social aspects of life cycle assessment as

well, drawing on the three-pillar or 'triple bottom line' model of sustainability, which is the result of the development of the Life Cycle Sustainability Assessment (LCSA). LCSA refers to the evaluation of all environmental, social and economic negative impacts and benefits in decision-making processes towards more sustainable products throughout their life cycle. Combination of environmental and social life cycle assessments along with life cycle costing leads to life cycle sustainability assessment (LCSA). This book highlights various aspects of life cycle sustainability assessment (LCSA).

Smart Food for Healthy, Sustainable and Resilient Food Systems, 2023-06-06 We are no longer able to provide the world population with a healthy diet and, at the same time, sustainably balance our planetary resources to ensure resilient and viable livelihoods for smallholder farmers. For the past fifty years, diets have become less nutritionally balanced, contribute significantly to climate change, and have accelerated the process of biodiversity erosion. We have reduced the number of species that are cultivated for food, and for each species, we are growing fewer varieties. While agriculture has moved towards uniformity, biodiversity is the basis of healthy and nutritious diets, and biodiversity is paramount for adapting crops to climate change. Hence, it is important to build resilient and sustainable food systems by re-introducing diversity into our agricultural systems and introducing “Smart Food” from smart crops into our diets. Smart Food is food that fulfills the criteria for being good for you (nutritious and healthy), good for the planet (environmentally sustainable); and beneficial to the farmers who grow these crops (resilient and viable). The aim of this Research Topic is to provide researchers, research managers, funding agencies, and government agencies with scientifically backed information to foster awareness, increased use, and support for research into Smart Food.
