Russia Against Napoleon Dominic Lieven, 2009-10-01 'A compulsive page-turner ... a triumph of brilliant storytelling ... an instant classic that is an awesome, remarkable and exuberant achievement' Simon Sebag Montefiore Winner of the Wolfson History Prize and shortlisted for the Duff Cooper Prize In the summer of 1812 Napoleon, the master of Europe, marched into Russia with the largest army ever assembled, confident that he would sweep everything before him. Yet less than two years later his empire lay in ruins, and Russia had triumphed. This is the first history to explore in depth Russia's crucial role in the Napoleonic Wars, re-creating the epic battle between two empires as never before. Dominic Lieven writes with great panache and insight to describe from the Russians' viewpoint how they went from retreat, defeat and the burning of Moscow to becoming the new liberators of Europe; the consequences of which could not have been more important. Ultimately this book shows, memorably and brilliantly, Russia embarking on its strange, central role in Europe's existence, as both threat and protector - a role that continues, in all its complexity, into our own lifetimes.

Spectrum-Aware Mobile Computing Seyed Eman Mahmoodi, Koduvayur Subbalakshmi, R. N. Uma, 2018-12-20 This book presents solutions to the problems arising in two trends in mobile computing and their intersection: increased mobile traffic driven mainly by sophisticated smart phone applications; and the issue of user demand for lighter phones, which cause more battery power constrained handhelds to offload computations to resource intensive clouds (the second trend exacerbating the bandwidth crunch often experienced over wireless networks). The authors posit a new solution called spectrum aware cognitive mobile computing, which uses dynamic spectrum access and management concepts from wireless networking to offer overall optimized computation offloading and scheduling solutions that achieve optimal trade-offs between the mobile device and

wireless resources. They show how in order to allow these competing goals to meet in the middle, and to meet the promise of 5G mobile computing, it is essential to consider mobile offloading holistically, from end to end and use the power of multi-radio access technologies that have been recently developed. Technologies covered in this book have applications to mobile computing, edge computing, fog computing, vehicular communications, mobile healthcare, mobile application developments such as augmented reality, and virtual reality.

Aquananotechnology David E. Reisner,T.

Pradeep,2014-09-24 The world's fresh water supplies are dwindling rapidly—even wastewater is now considered an asset. By 2025, most of the world's population will be facing serious water stresses and shortages. Aquananotechnology: Global Prospects breaks new ground with its informative and innovative introduction of the application of nanotechnology to the remediation of contaminated water for drinking and industrial use. It provides a comprehensive overview, from a global perspective, of the latest research and developments in the use of nanotechnology for water purification and desalination methods. The book also covers approaches to remediation such as high surface area nanoscale media for adsorption of toxic species, UV treatment of pathogens, and regeneration of saturated media with applications in municipal water supplies, produced water from fracking, ballast water, and more. It also discusses membranes, desalination, sensing, engineered polymers, magnetic nanomaterials, electrospun nanofibers, photocatalysis, endocrine disruptors, and Al₁₃ clusters. It explores physics-based phenomena such as subcritical water and cavitation-induced sonoluminescence, and fog harvesting. With contributions from experts in developed and developing countries, including those

with severe contamination, such as China, India, and Pakistan, the book's content spans a wide range of the subject areas that fall under the aquananotechnology banner, either squarely or tangentially. The book strongly emphasizes sorption media, with broad application to a myriad of contaminants—both geogenic and anthropogenic—keeping in mind that it is not enough for water to be potable, it must also be palatable.

Computer Vision, Imaging and Computer Graphics: Theory and Applications AlpeshKumar Ranchordas,Joao Madeiras Pereira,Hélder J. Araújo,Joao Tavares,2010-08-16 This book includes extended versions of the selected papers from VISIGRAPP 2009, the International Joint Conference on Computer Vision, Imaging and Computer Graphics Theory and Applications, which was held in Lisbon, Portugal, during February 5-8, 2009 and organized by the Institute for Systems and Technologies of Information, Control and Communication (INSTICC). VISIGRAPP comprises three component conferences, namely, the International Conference on Computer Vision Theory and Applications (VISAPP), the International Conference on Computer Graphics Theory and Applications (GRAPP), and the International Conference on Imaging Theory and Applications (IMAGAPP). VISIGRAPP received a total of 422 paper submissions from more than 50 co- tries. From these, and after a rigorous double-blind evaluation method, 72 papers were published as full papers. These figures show that this conference is now an - tablished venue for researchers in the broad fields of computer vision, computer graphics and image analysis. From the full papers, 25 were selected for inclusion in this book. The selection process was based on the scores assigned by the Program Committee reviewers as well as the Session Chairs. After selection, the papers were further revised and extended by the authors. Our gratitude goes to all contributors and referees, without whom this book would not have been possible.

Mobile DNA III Michael Chandler,Martin Gellert,Alan M.

Lambowitz, Phoebe A. Rice, Suzanne B. Sandmeyer, 2020-07-24 An exploration of the raw power of genetic material to refashion itself to any purpose... Virtually all organisms contain multiple mobile DNAs that can move from place to place, and in some organisms, mobile DNA elements make up a significant portion of the genome. Mobile DNA III provides a comprehensive review of recent research, including findings suggesting the important role that mobile elements play in genome evolution and stability. Editor-in-Chief Nancy L. Craig assembled a team of multidisciplinary experts to develop this cutting-edge resource that covers the specific molecular mechanisms involved in recombination, including a detailed structural analysis of the enzymes responsible presents a detailed account of the many different recombination systems that can rearrange genomes examines the tremendous impact of mobile DNA in virtually all organisms Mobile DNA III is valuable as an in-depth supplemental reading for upper level life sciences students and as a reference for investigators exploring new biological systems. Biomedical researchers will find documentation of recent advances in understanding immune-antigen conflict between host and pathogen. It introduces biotechnicians to amazing tools for in vivo control of designer DNAs. It allows specialists to pick and choose advanced reviews of specific elements and to be drawn in by unexpected parallels and contrasts among the elements in diverse organisms. Mobile DNA III provides the most lucid reviews of these complex topics available anywhere.

Advances in Data Science and Computing Technologies

Basabi Chakraborty, Arindam Biswas, Amlan Chakrabarti, 2023-09-29 This book presents selected research papers on current developments in artificial intelligence (AI) and data sciences from the International Conference on Advances in Data Science and Computing Technologies, ADSC 2022. The book covers topics such as soft computing techniques, AI, optical communication systems, application of Internet of Things, hybrid

and renewable energy sources, cloud and mobile computing, deep machine learning, data networks & securities. The book discusses various aspects of these topics, e.g., technological considerations, product implementation, and application issues. The volume will serve as a reference resource for researchers and practitioners in academia and industry.

The Overestimation of Medical Consequences of Low-Dose Exposure to Ionizing Radiation, 2nd Edition Sergei V.

Jargin, 2023-10-16 This book analyzes bias and conflicts of interest in numerous papers exaggerating the medical and biological consequences of low-dose radiation. After the Chernobyl accident, many publications overestimated its medical consequences. Among the motives for doing so were financing, international help, publication pressure, and the pressure to write numerous theses and articles throughout one's scientific career. The accident has been exploited to strangle nuclear energy, thus boosting fossil fuel prices. Nuclear facilities are potential targets in armed conflicts. One of the motives to unleash the war in Ukraine and threats to use nuclear weapons seems to be boosting fossil fuel prices. In more developed countries, antinuclear resentments have been supported by Green activists, well in agreement with the interests of fossil fuel vendors, several companies and certain governments. Today, there are no alternatives to nuclear energy. This book argues that, in the long run, non-renewable fossil fuels will become more expensive, contributing to excessive population growth in oil-producing regions and poverty elsewhere.

Workbook for Radiologic Science for Technologists - E-Book Elizabeth Shields, Stewart C. Bushong, 2020-12-10 Reinforce your understanding of diagnostic imaging and sharpen your radiographic skills! Corresponding to the chapters in Bushong's Radiologic Science for Technologists, 12th Edition, this workbook helps you review key concepts and gain the technical knowledge needed to become an informed and confident radiographer. More

than 100 worksheets include engaging exercises allowing you to assess your comprehension and apply your knowledge to imaging practice. More than 100 worksheets make it easy to review specific topics from the text, and are numbered according to textbook chapter. In-depth coverage of the textbook's topics lets you review medical imaging concepts and apply them to practice. Penguin icons highlight important information from the textbook, making it easier to understand concepts and complete the worksheet exercises. NEW! Closer correlation of worksheets to the textbook simplifies your review of radiologic physics, which can be a difficult subject to understand. NEW! New worksheets on digital radiographic technique and the digital image display correspond to the new content covered in the textbook.

The Practice of Perioperative Transesophageal Echocardiography: Essential Cases Albert C. Perrino, Scott T. Reeves, Kathryn Glas, 2011-11-28 The Practice of Perioperative Transesophageal Echocardiography provides over 100 teaching cases ranging from the most common to the most challenging. Each case is succinctly presented in an easy-to-read question-answer, self-test format comprised of three printed pages of text and echo images. Echocardiography technique, interpretation, and case management are emphasized by internationally recognized experts in the field. The cases cover the gamut of clinical problems, as well as challenges related to image optimization and artifacts. The versatility of TEE is represented by 2-D, 3-D, color flow and spectral Doppler, tissue Doppler imaging, and quantitative assessments of volumes, pressures, and the severity of valvular pathologies. A companion website contains the fully searchable text plus echocardiographic video

clips for each case.

Practical Application of Supercritical Fluid Chromatography for Pharmaceutical Research and Development

,2022-12-02 Practical Application of Supercritical Fluid Chromatography for Pharmaceutical Research and Development provides a valuable “go-to reference for many difficult-to-solve challenges using pertinent chromatographic theory, first-hand case studies, and examples provided from academic and industry experts. This text also enables professors teaching an analytical instrumental course to introduce and instruct students about one of the most sustainable and powerful separation methods currently available. While the text has broad applicability across industrial sectors, it focuses primarily on application in the pharmaceutical industry. The book is designed to allow readers to align current HPLC/UHPLC capabilities with SFC as an orthogonal tool for project specific methods in the pharmaceutical industry. It highlights where SFC falls on the spectrum of useful chromatographic tools for routine and challenging separative methods. Experienced HPLC users who are interested in developing knowledge in orthogonal separation techniques, as well as newcomers to the field of separation science, will find this text particularly useful. Chapters address where SFC may fit the analytical needs of the pharmaceutical industry and alert the readers as to where the technique will not fit. Readers will gain an understanding of how and where SFC may be applied and adapted more routinely across the pharmaceutical industry as a ‘green’ way of undertaking separation opportunities and challenges. Areas within the pharmaceutical industry include early drug discovery, process chemistry, and late stage development and manufacturing. Describes approaches to SFC column and mobile phase selection for method development for both analytical and preparative tasks Gives practical examples of how analytical SFC enables the monitoring of synthetic reactions including unstable

intermediates, chiral and achiral polar reactants and products across small and large modalities Provides need-focused case studies for pharmaceutical analysts, process chemists, and contract chemistry facilities that can benefit from monitoring or purifying polar intermediates, mutagenic impurities, nitrosamines and other reaction by-products including excipients and metabolites

Mobile Platforms, Design, and Apps for Social

Commerce Pelet, Jean-Éric, 2017-05-17 While social interactions were once a personal endeavor, more contact is now done virtually. Mobile technologies are an ever-expanding area of research which can benefit users on the organizational level, as well as the personal level. Mobile Platforms, Design, and Apps for Social Commerce is a critical reference source that overviews the current state of personal digital technologies and experiences. Highlighting fascinating topics such as M-learning applications, social networks, mHealth applications and mobile MOOCs, this publication is designed for all academicians, students, professionals, and researchers that are interested in discovering more about how the use of mobile technologies can aid in human interaction.

Human Services in the Network Society Neil Ballantyne, Walter La Mendola, 2014-07-16 The Internet and the many applications it supports continue to transform and expand the ways in which it is possible to relate, communicate, collaborate, and perform human service work. In this book,

human service researchers and practitioners explore major opportunities and challenges to well being, social justice, and human service work that technology use in everyday life has exposed. Drawing on the latest research their contributions examine issues associated with human service practices in the network society, including: the implications of an expanded capacity to share human service data across agency and national boundaries; ethical issues associated with the use of remote sensing and surveillance technologies (e.g. the satellite tracking of offenders, and telecare services for older people); the risks and benefits of social network sites including issues associated with online privacy, intimacy, and safety; and the influence of technology-mediated services on human relationships and the sense of 'being present' with another person. Human Services in the Network Society will be of considerable interest to human service professionals, academics and researchers who are concerned about the social impact of networked technologies. This book was previously published as a special issue of the Journal of Technology in Human Services.
