OECD Development Pathways Multi-dimensional Review of El Salvador Strategic Priorities for Robust, Inclusive and Sustainable Development OECD,2023-04-18

El Salvador has made significant development progress in the past 30 years. The end of the civil war in 1992 marked the establishment of a liberal democracy and an open export-led development model, which led to a reduction in poverty and inequality. However, with economic growth averaging a modest 2.4% in the years before the COVID-19 pandemic, and productivity growth of 0.1% over the past decade, the post-war model has not generated the economic momentum or the jobs that the country needs.

The Language of Objects: Deixis in Descriptive Greek Epigrams Federica Scicolone, 2023-10-20 The Language of Objects sheds new light on the sub-genre of Greek descriptive epigram, focusing on deictic reference as a springboard to understand three different approaches to the materiality of texts: imagination-oriented deixis, pointing to referents conjured in the reader's mind; ocular deixis, addressing perceivable referents; displaced deixis, underscoring the subjective response of readers/viewers. Uniquely combining overlooked verse-inscriptions and well-known literary and inscribed texts, which are freshly re-examined through a cognitive lens, this volume explores the evolution of deixis in descriptive epigrams dating from the pre-Hellenistic period to Late Antiquity. With its original analysis, the book pushes forward the study of Greek epigram and current understanding of deixis in ancient poetry.

Sensitive Periods of Brain Development and Preventive Interventions Susan L. Andersen, 2022-06-25 Sensitive periods occur when unique experiences permanently influence brain development either by their presence or absence. This volume covers underlying brain systems and behaviors that are sculpted by the environment in humans and animals in a search for commonalities. The mechanisms involved, the importance of timing in the process, and factors that can change the brain are

discussed in this exciting book. Different chapters examine how experience guides the development of cells, circuits, and function using vision, cortical circuits, and cognition as frameworks. Scientific evidence for effective preventative intervention approaches, including diet, exercise, and music, are included to find ways to maximize child and adolescent development. The adverse effects of early brain injury are also included. As sensitive periods are gaining importance in their application in the real-world, novel statistical approaches for human studies are presented and the importance of sensitive periods are covered by examining the juvenile justice system. The book has interdisciplinary appeal and scholars with an interest in brain resiliency or vulnerability will find it of particular interest.
