**National Action Plans in the Global Governance of Business and Human Rights**

Yannick Poullie, 2022-05-31 Diese Arbeit analysiert Nationale Aktionspläne für Wirtschaft und Menschenrechte als bedeutsamen Schritt in der Entwicklung unternehmerischer Menschenrechtsverantwortung. Angeleitet vom diskursiven Institutionalismus und gerahmt von einer Interpretation des Politikfeldes als Wettbewerb konkurrierender Ideen wird am Beispiel von Schweden und Deutschland detailliert der Einfluss staatlicher und nichtstaatlicher Akteure im Politikprozess beleuchtet und aufgezeigt, unter welchen Bedingungen unternehmerische Menschenrechtsverantwortung größere Verbindlichkeit gewinnt. Die Studie leistet theoretisch und empirisch einen innovativen Beitrag zur politikwissenschaftlichen Menschenrechtsforschung.

*Social Democracy in Sweden* Dimitris Tsarouhas, 2008-09-30 What is the future of social democracy in the age of globalization? The Swedish model, long the paradigm for socially responsible capitalism, was pronounced dead in the 1990s, but a new Swedish model has emerged and is thriving. Europeanisation and globalization were expected to erode social democracy, placing limits on the power of organized labour to negotiate with capital. Here Dimitris Tsarouhas shows why and how this did not happen. Tracing the emergence of the original model to its institutional and political origins, he garners rich empirical evidence to show the resilience of the fundamental nature of Swedish social democracy in the face of changing policies, institutions and labour relations. Social Democracy in Sweden is an important reassessment of European social democracy and the impact of globalization.

**The Eco-Certified Child** Malin Ideland, 2018-11-19 While few could dispute the need for Environmental and Sustainability Education (ESE) for children and young people, this book explores the problems inherent in this educational practice. Despite good intentions, the author highlights how ESE can in fact contribute to a (re)production of harmful norms and possible subjectivities by categorizing various groups as 'threats' to the environment. The author analyzes how these categorizations are entangled in historical discourses on social class, nationality and race, thus resulting in double gestures of inclusion and exclusion. Even as sustainability and environmental engagement becomes a treasured identity for the affluent, the author highlights that despite the best of intentions, the discourse of ESE can reinforce positions of suborder and superiority, which could even impede real change in the long run. This illuminating book will be of interest to students, scholars and practitioners of sustainability education. Foreword by Thomas S. Popkewitz

Capitalists Against Markets Peter A. Swenson, 2002-09-26 Conventional wisdom argues that welfare state builders in the US and Sweden in the 1930s took their cues from labor and labor movements. Swenson makes the startling argument that pragmatic social reformers looked for support not only from below but also from above, taking into account capitalist interests and preferences. Juxtaposing two widely recognized extremes of welfare, the US and Sweden, Swenson shows that employer interests played a role in welfare state development in both countries.

Bystanders to the Holocaust David Cesarani, Paul A. Levine, 2014-06-03 Using accessible archival sources, a team of historians reveal how much the USA, Britain, Switzerland and Sweden knew about the Nazi attempt to murder all the Jews of Europe during World War II.

**The Battle Over Working-Class Voters** Sanna Salo, Jens Rydgren, 2021-05-15

This book examines how social democratic parties have responded to populist radical right parties in the battle for support from working-class voters. It focuses on the paradigmatic examples of social democratic parties in the Nordic countries. Historically these have been the strongest social democratic parties, but they have declined in recent years partly due to the

competition from populist radical right parties. In addition, since populist radical right parties tend to support liberal and conservative parties in parliament or in governmental negotiations, social democratic parties' ability to impact broader policy areas has declined as well. The book provides a detailed empirical account of how social democratic parties – and more broadly, labour movement organisations, including unions – have responded to these challenges across Denmark, Sweden, Finland, and Norway. This volume will be of interest to scholars of party politics, comparative politics, Nordic politics, and the populist radical right.

**Defending the Swedish Model** Gregg Bucken-Knapp, 2009 Across Europe the prospect of a rapidly shrinking workforce has put increased labor migration back on the political agenda. However for many on the political left concerns exist that less restrictive labor migration policies threaten core features of the social democratic project. This is perhaps clearest in Sweden which in late 2008 adopted a liberal approach to third-country national labor migration allowing employers to hire freely from outside the European Union. *Defending the Swedish Model* explores the debate leading up to this reform focusing on the preferences of the Swedish Social Democratic Party (SAP) and the Swedish trade union confederation (LO). While generally positive to the economic potential of increased labor migration these allies remained highly skeptical toward calls from employers and bourgeois parties for liberalization. Gregg Bucken-Knapp argues that the SAP and LO develop their labor migration policy preference on the basis of whether specific reform alternatives are perceived as being consistent with or as undermining the Swedish model. In the case of third-country nationals both allies considered liberalization a threat to full employment aims instead seeking to preserve an influential role for the state labor market board and organized labor. Bucken-Knapp also focuses on the Swedish labor migration debate prior to the 2004 enlargement of the European union showing how SAP concerns over potential abuse of the universal welfare state led to its support for transitional arrangements. *Defending the Swedish Model* illuminates the challenges faced by social democrats and trade unions when considering the need for increased labor migration. **Facing Trajectories from School to Work** Hans-Uwe Otto, Roland Atzmüller, Thierry Berthet, Lavinia Bifulco, Jean-Michel Bonvin, Enrica Chiappero-Martinetti, Valerie Egdell, Björn Halleröd, Christian Christrup Kjeldsen, Marek Kwiek, Regine Schröer, Josiane Vero, Marianna Zieleńska, 2015-01-13 This book promotes a radical alternative impact on youth policy in Europe to overcome the situation of vulnerability and discrimination of a growing number of youngsters in their transition from school to work. It follows a Human Development perspective in using the Capability Approach (CA) as analytical and methodological guiding tool to improve the social conditions of the most socially vulnerable young people in European societies. The mission of the interdisciplinary authors is to expand the actual chances of the young to actively shape their lives in a way they have reason to choose and value. This book is based on the research of the EU Collaborative Project "Making Capabilities Work" (WorkAble), funded by the EU within the Seventh Framework Programme. It is the first empirical project to pursue a justice theory perspective on a European level. It also contributes to a fundamental change in the currently mostly insufficient attempts within the human capital approach to use the labour market to ensure desired lifestyle forms and a secure income for vulnerable youth.

**Good Governance Gone Bad** Darius Ornston, 2018-10-15 If we believe that the small, open economies of Nordic Europe are paragons of good governance, why are they so prone to economic crisis? In *Good Governance Gone Bad*, Darius Ornston provides evidence that adapting flexibly to rapid, technological change and shifting patterns of economic competition may be a great virtue, but it does not prevent countries from making strikingly poor policy choices

and suffering devastating results. Home to three of the big five financial crises in the twentieth century, Nordic Europe in the new millennium has witnessed a housing bubble in Denmark, the collapse of the Finnish ICT industry, and the Icelandic financial crisis. Ornston argues that the reason for these two seemingly contradictory phenomena is one and the same. The dense, cohesive relationships that enable these countries to respond to crisis with radical reform render them vulnerable to policy overshooting and overinvestment. *Good Governance Gone Bad* tests this argument by examining the rise and decline of heavy industry in postwar Sweden, the emergence and disruption of the Finnish ICT industry, and Iceland's impressive but short-lived reign as a financial powerhouse as well as ten similar and contrasting cases across Europe and North America. Ornston demonstrates how small and large states alike can learn from the Nordic experience, providing a valuable corrective to uncritical praise for the Nordic model.

**Restructuring of Arms Production in Western Europe** Stockholm International Peace Research Institute, 1992 Profound changes are occurring in the structure of arms production in Western Europe. Concentration is increasing at a fast pace. Small producers are disappearing and even large ones are opting out of the market. The various national arms industries, long operating in protective environments, are rapidly internationalizing. Three factors combine to bring about this change: East-West detente, the creation of the Single European Market, and the constant pressure of increasingly complex technology. In this book experts describe how the framework for producing arms in Western Europe is altered, and how various actors--firms, governments, and trade unions--are adapting to the new situation. The book presents detailed analyses of all the arms-producing countries in Western Europe. In addition to describing recent changes, the authors speculate on the implications of these for the balance of power in Western Europe, the relations between Western Europe and the United States, arms exports to the

Third World, and problems of converting from military to civilian production. The appendices include the SIPRI list of the 50 largest arms-producing companies in Western Europe; data on mergers and acquisitions, procurement expenditure, and exports of major weapons; selections from treaties and other official documents relevant to current and future regulation of West European arms production; and a select bibliography.
