Swimming Studies Leanne Shapton, 2012-07-05 Winner of the 2012 National Book Critics Circle Award, Autobiography *Swimming Studies* is a brilliantly original, meditative memoir that explores the worlds of competitive and recreational swimming. From her training for the Olympic trials as a teenager to enjoying pools and beaches around the world as an adult, Leanne Shapton offers a fascinating glimpse into the private, often solitary, realm of swimming. Her spare and elegant writing reveals an intimate narrative of suburban adolescence, spent underwater in a discipline that continues to inspire Shapton's work as an artist and author. Her illustrations throughout the book offer an intuitive perspective on the landscapes and imagery of the sport. Shapton's emphasis is on the smaller moments of athletic pursuit rather than its triumphs. For the accomplished athlete, aspiring amateur, or habitual practicer, this remarkable work of written and visual sketches

propels the reader through a beautifully personal and universally appealing exercise in reflection.

Conversion of the Zero-point Energy of the Quantum Vacuum Into Classical Mechanical Energy Claus Wilhelm Turtur,2009-12 A perpetual motion machine - this can never exist. But energy sources nearly disregarded up to now - they exist. These are energy sources, which have been hardly under investigation, so that mankind did not yet learn how to get benefit from them. Most part of the universe consists of such energy, which is still called invisible. A part of this energy is to be found within the so called zero-point oscillations of the quantum vacuum, thus within the empty void from the perspective of quantum physics. The author of the book is physicist. He theoretically developed and then experimentally verified a method for the conversion of vacuum energy into classical mechanical energy. His technique is one of the very few approaches known up to now. The approaches to convert vacuum energy are described in this book in many scientific details, and they are compared with other known proposals for the use of vacuum energy.

como uma dádiva recebida nesta longa
viagem não se preocupe com o destino pois
ele é incerto apenas aproveite a paisagem
