Ecological Forest Management Jerry F. Franklin,K. Norman Johnson,Debora L. Johnson,2018-03-19 Fundamental changes have occurred in all aspects of forestry over the last 50 years, including the underlying science, societal expectations of forests and their management, and the evolution of a globalized economy. This textbook is an effort to comprehensively integrate this new knowledge of forest ecosystems and human concerns and needs into a management philosophy that is applicable to the vast majority of global forest lands. Ecological forest management (EFM) is focused on policies and practices that maintain the integrity of forest ecosystems while achieving environmental, economic, and cultural goals of human societies. EFM uses natural ecological models as its basis contrasting it with modern production forestry, which is based on agronomic models and constrained by required return-on-investment. Sections of the book consider: 1) Basic concepts related to forest ecosystems and silviculture based on natural models; 2) Social and political foundations of forestry, including law, economics, and social acceptability; 3) Important current topics including wildfire, biological diversity, and climate change; and 4) Forest planning in an uncertain world from small privately-owned lands to large public ownerships. The book concludes with an overview of how EFM can contribute to resolving major 21st century issues in forestry, including sustaining forest dependent societies.

The 4-Hour Work Week Timothy Ferriss, 2007 Offers techniques and strategies for increasing income while cutting work time in half, and includes advice for leading a more fulfilling life.

Developing Swimmers Michael Brooks, 2019-07-16
Talent, skill, and a passion to compete: These are the characteristics that define elite-level swimmers. But as the sport's best coaches know, even the most gifted of athletes won't develop these traits without a plan—one that recognizes talent, develops skills, and nurtures success. *Developing Swimmers* is the only book to offer a comprehensive, long-term plan beginning at an age-group level. Renowned coach Michael Brooks shares the insights, secrets, and strategies that have transformed his athletes and swim teams from novice competitors to distinguished champions. *Developing Swimmers* will show you how to - evaluate and identify talent in even the youngest swimmers; -establish realistic yet challenging short- and long-term goals for your athletes; -assess and refine strokes for greater power and efficiency; -improve starts, turns, and finishes for faster times; -structure positive and productive practices for swimmers and swim teams; and -foster your swimmers' passion, bolster commitment, and instill winning attitudes. From motivation to meet management to race-day tactics, *Developing Swimmers* covers it all. It is the guide every coach should have on the shelf. With *Developing Swimmers*, you will improve the performance of your swimmers—and your entire team.

Making Waves Shirley Babashoff,Chris
Epting,2016-07-05 In her extraordinary swimming career,
Shirley Babashoff set thirty-nine national records and
eleven world records. Prior to the 1990s, she was the most
successful U.S. female Olympian and, in her prime, was
widely considered to be the greatest female swimmer in the
world. Heading into the 1976 Olympic Games in Montreal,
Babashoff was pictured on the cover of Sports Illustrated
and followed closely by the media. Hopes were high that
she would become “the female Mark Spitz.” All of that
changed once Babashoff questioned the shocking
masculinity of the swimmers on the East German women’s
team. Once celebrated as America’s golden girl, Babashoff
was accused of poor sportsmanship and vilified by the press
with a new nickname: “Surly Shirley.” *Making Waves*
displays the remarkable strength and resilience that made
Babashoff such a dynamic champion. From her difficult
childhood and beginnings as a determined young athlete
growing up in Southern California in the 1960s, through her
triumphs as the greatest female amateur swimmer in the
world, Babashoff tells her story in the same unflinching
manner that made her both the most dominant female
swimmer of her time and one of the most controversial

athletes in Olympic history.

This book tells the story of those early days in the computer industry when General Electric alone had the technical and economic resources to compete effectively in this sophisticated high stakes market. However in 1970, GE's top management decided to sell the computer business to Honeywell--a decision which changed history.
