Swiped Adam Levin,2015-11-24 Identity fraud happens to everyone. So what do you do when it's your turn? Increasingly, identity theft is a fact of life. We might once have hoped to protect ourselves from hackers with airtight passwords and aggressive spam filters, and those are good ideas as far as they go. But with the breaches of huge organizations like Target, AshleyMadison.com, JPMorgan Chase, Sony, Anthem, and even the US Office of Personnel Management, more than a billion personal records have already been stolen, and chances are good that you're already in harm's way. This doesn't mean there's no hope. Your identity may get stolen, but it doesn't have to be a life-changing event. Adam Levin, a longtime consumer advocate and identity fraud expert, provides a method to help you keep hackers, phishers, and spammers from becoming your problem. Levin has seen every scam under the sun: fake companies selling “credit card insurance”; criminal, medical, and child identity theft; emails that promise untold riches for some personal information; catphishers, tax fraud, fake debt collectors who threaten you with legal action to confirm your account numbers; and much more. As Levin shows, these folks get a lot less scary if you see them coming. With a clearheaded, practical approach, *Swiped* is your guide to surviving the identity theft epidemic. Even if you've already become a victim, this strategic book will help you protect yourself, your identity, and your sanity.

**Swipe to Unlock** Neel Mehta, Parth Detroja, Aditya Agashe, 2017 WANT A NON-CODING JOB AT A TECH COMPANY? Interested in product management, marketing, strategy, or business development? The tech industry is the place to be: nontechnical employees at tech companies outnumber their engineering counterparts almost 3 to 1 (Forbes, 2017). You might be worried that your lack of coding skills or tech industry knowledge will hold you back. But here's the secret: you don't need to learn how to code to break into the tech industry. Written by three former Microsoft PMs, Swipe to Unlock gives you a breakdown of the concepts you need to know to crush your interviews, like software development, big data, and internet security. We'll explain how Google's ad targeting algorithm works, but Google probably won't ask you how to explain it in a non-technical interview. But they might ask you how you could increase ad revenue from a particular market segment. And if you know how Google's ad platform works, you'll be in a far stronger position to come up with good growth strategies. We'll show you how Robinhood, an app that lets you trade stocks without commission, makes money by earning interest on the unspent money that users keep in their accounts. No one will ask you to explain this. But if someone asks you to come up with a new monetization strategy for Venmo (which lets you send and receive money without fees), you could pull out the Robinhood anecdote to propose that Venmo earn interest off the money sitting in users' accounts. We'll talk about some business cases like why Microsoft acquired LinkedIn. Microsoft interviewers probably won't ask you about the motive of the purchase, but they might ask you for ideas to improve Microsoft Outlook. From our case study, you'll learn how the Microsoft and LinkedIn ecosystems could work together, which can help you craft creative, impactful answers. You could propose that Outlook use LinkedIn's social graph to give salespeople insights about clients before meeting them. Or you could suggest linking Outlook's organizational tree to LinkedIn to let HR managers analyze their company's hierarchy and figure out what kind of talent they need to add. (We'll further explore both ideas in the book.) Either way, you're sure to impress. Learn the must know concepts of tech from authors who have received job offers for Facebook's Rotational Product Manager, Google's Associate Product Marketing Manager, and Microsoft's Program Manager to get a competitive edge at your interviews!
