Digital Transformation and Public Services Anthony Larsson, Robin Teigland, 2019-10-08 Through a series of studies, the overarching aim of this book is to investigate if and how the digitalization/digital transformation process affects various welfare services provided by the public sector, and the ensuing implications thereof. Ultimately, this book seeks to understand if it is conceivable for digital advancement to result in the creation of private/non-governmental alternatives to welfare services, possibly in a manner that transcends national boundaries. This study also investigates the possible ramifications of technological development for the public sector and the Western welfare society at large. This book takes its point of departure from the 2016 Organization for Economic Co-operation and Development (OECD) report that targets specific public service areas in which government needs to adopt new strategies not to fall behind. Specifically, this report emphasizes the focus on digitalization of health care/social care, education, and protection services, including the use of assistive technologies referred to as digital welfare. Hence, this book explores the factors potentially leading to whether state actors could be overrun by other non-governmental actors, disrupting the current status quo of welfare services. The book seeks to provide an innovative, enriching, and controversial take on society at large and how various aspects of the public sector can be, and are, affected by the ongoing digitalization process in a way that is not covered by extant literature on the market. This book takes its point of departure in Sweden given the fact that Sweden is one of the most digitalized countries in Europe, according to the Digital Economy and Society Index (DESI), making it a pertinent research case. However, as digitalization transcends national borders, large parts of the subject matter take on an international angle. This includes cases from several other countries around Europe as well as the United States.

The Hidden Europe Francis Tapon, 2012 For many Westerners, Eastern Europe is about as appealing as a deodorant-free French armpit. That didn't scare Francis Tapon because not only did he learn how to rough it by walking across America four times, but he is also half French, so he kind of smells too. Francis spent nearly 3 years travelling and backpacking in 25 Eastern European countries. It started with a 5-month trip in 2004. He returned in 2008 to spend 3 years exploring all the countries again. The Hidden Europe is Book Two of the WanderLearn Series.

Community Impact Assessment, 1996 This guide was written as a quick primer for transportation professionals and analysts who assess the impacts of proposed transportation actions on communities. It outlines the community impact assessment process, highlights critical areas that must be examined, identifies basic tools and information sources, and stimulates the thought-process related to individual projects. In the past, the consequences of transportation investments on communities have often been ignored or introduced near the end of a planning process, reducing them to reactive considerations at best. The goals of this primer are to increase awareness of the effects of transportation actions on the human environment and emphasize that community impacts deserve serious attention in project planning and development-attention comparable to that given the natural environment. Finally, this guide is intended to provide some tips for facilitating public involvement in the decision making process.

The Operators Michael Hastings, 2012-01-05 The inspiration for the Netflix original movie War Machine, starring Brad Pitt, Tilda Swinton, and Ben Kingsley From the author of The Last Magazine, a shocking behind-the-scenes portrait of our military commanders, their high-stake maneuvers, and the political firestorm that shook the United States. In the shadow of the hunt for Bin Laden and the United States' involvement in the Middle East, General Stanley McChrystal, the commanding general of international and U.S. forces in Afghanistan, was living large. His loyal staff liked to call him a "rock star." During a spring 2010 trip, journalist Michael Hastings looked on as McChrystal and his staff let off steam, partying and openly bashing the Obama administration. When Hastings's article appeared in Rolling Stone, it set off a political firestorm: McChrystal was unceremoniously fired. In The Operators, Hastings picks up where his Rolling Stone coup ended. From patrol missions in the Afghan hinterlands to senior military advisors' late-night bull sessions to hotel bars where spies and expensive hookers participate in nation-building, Hastings presents a shocking behind-the-scenes portrait of what he fears is an unwinnable war. Written in prose that is at once eye-opening and other times uncannily conversational, readers of No Easy Day will take to Hastings' unyielding first-hand account of the Afghan War and its cast of players.

Special Events Joe Goldblatt, 2013-11-25 Providing a comprehensive guide to understanding, planning, promoting, and producing special events, this seventh edition of Special Events, 7th Edition describes the theory and practice of all aspects of event management. Written for current and future event leaders, the text continues to expand its emphasis on the growing globalization of the profession, taking into account the skills leaders need to deal with other cultures, societies, and business practices to plan and deliver successful events. New coverage includes sustainability, technology, security/risk management, and the impact of social media on events and event marketing. 15 all-new case studies have been included, as well as a brief glossary of terms at the end of each chapter to further define the terms used in the chapter.

The Lean Startup Eric Ries, 2011-09-13 Most startups fail. But many of those failures are preventable. The Lean Startup is a new approach being adopted across the globe, changing the way companies are built and new products are launched. Eric Ries defines a startup as an organization dedicated to creating something new under conditions of extreme uncertainty. This is just as true for one person in a garage or a group of seasoned professionals in a Fortune 500 boardroom. What they have in common is a mission to penetrate that fog of uncertainty to discover a successful path to a sustainable business. The Lean Startup approach fosters companies that are both more capital efficient and that leverage human creativity more effectively. Inspired by lessons from lean manufacturing, it relies on "validated learning," rapid scientific experimentation, as well as a number of counter-intuitive practices that shorten product development cycles, measure actual progress without resorting to vanity metrics, and learn what customers really want. It enables a company to shift directions with agility, altering plans inch by inch, minute by minute. Rather than wasting time creating elaborate business plans, The Lean Startup offers entrepreneurs—in companies of all sizes—a way to test their vision continuously, to adapt and adjust before it's too late. Ries provides a scientific approach to creating and managing successful startups in a age when companies need to innovate more than ever.

This Book Is About Travel Andrew Hyde, 2013-02-08 Andrew Hyde spent the last two years on the road traveling to 15 countries with only a backpack of 15 things to his name, this book is a collection of stories as a critique of the world of modern travel. Nobody wishes they worked more on the death bed and those that traveled say it was the highlight of their life. So why don't more people hop on a boat, plane, train to rickshaw and see the world though the lends of another country? Though 'This Book is About Travel' Hyde lays out why travel is something everyone (even you) should do. Just what do you need to take not just take the trip? Hyde wrote the missing manual for modern movement aimed to show you what it is like to be on the road and just how you can join the over 3,000,000 that are currently on trips. A mix of essays written on the road, practical travel hacks to save

you thousands of dollars and countless hours of time and interviews with travelers from around the world doing just what Hyde argues you should be planning on doing: Travel.--Publisher description.

From Lab to Market S.K. Kasscieh,H.R. Radosevich,2013-06-29 The topic of this book, the commercialization of public-sector technology, continues to grow in importance in the United States and similar societies. The issues involved are relevant to many roles including those of policy makers, managers, patent attorneys, licensing agents, and technical staff members of public technology sources. Institutions increasingly involved in the process include federal and other government laboratories and their related agencies, public universities and their state governments, public and private transfer agents and, of course, all the private recipients of public technology. Scarcely a day goes by without a significant event related to technology transfer and commercialization. The popular business press is regularly carrying articles addressing the issues, explaining new initiatives and describing events of notable success or failure.[I] As an example of current important events, the Technology Reinvestment Project (TRP) is formulating its initiatives to transfer public technology and promote technology-based public/private partnerships as a collaboration between the Advanced Research Projects Agency (ARPA), the National Institute of Standards and Technology (NIST), the National Science Foundation (NSF) the National Aeronautics and Space Administration (NASA), and the Department of Energy, Defense Programs (DOE/DP).

The Digital Transformation of Labor Anthony Larsson,Robin Teigland,2019-11-11 Through a series of studies, the overarching aim of this book is to investigate if and how the digitalization/digital transformation process causes (or may cause) the autonomy of various labor functions, and its impact in creating (or stymieing) various job opportunities on the labor market. This book also seeks to illuminate what actors/groups are mostly benefited by the digitalization/digital transformation and which actors/groups that are put at risk by it. This book takes its point of departure from a 2016 OECD report that contends that the impact digitalization has on the future of labor is ambiguous, as on the one hand it is suggested that technological change is labor-saving, but on the other hand, it is suggested that digital technologies have not created new jobs on a scale that it replaces old jobs. Another 2018 OECD report indicated that digitalization and automation as such does not pose a real risk of destroying any significant number of jobs for the foreseeable future, although tasks would by and large change significantly. This would affect welfare, as most of its revenue stems from taxation, and particularly so from the taxation on labor (directly or indirectly). For this reason, this book will set out to explore how the future technological and societal advancements impact labor conditions. The book seeks to provide an innovative, enriching and controversial take on how various aspects of the labor market can be (and are) affected the ongoing digitalization trend in a way that is not covered by extant literature. As such, this book intends to cater to a wider readership, from a general audience and students, to specialized professionals and academics wanting to gain a deeper understanding of the possible future developments of the labor market in light of an accelerating digitalization/digital transformation of society at large.

PostSecret Frank Warren,2005-11-29 The project that captured a nation's imagination. The instructions were simple, but the results were extraordinary. You are invited to anonymously contribute a secret to a group art project. Your secret can be a regret, fear, betrayal, desire, confession, or childhood humiliation. Reveal anything -- as long as it is true and you have never shared it with anyone before. Be brief. Be legible. Be creative. It all began with an idea Frank Warren had for a community art project. He began handing out postcards to strangers and leaving them in public places -- asking people to write down a secret they had never told anyone and mail it to him, anonymously. The response was overwhelming. The secrets were both provocative and profound, and the cards themselves were works of art -- carefully and creatively constructed by hand. Addictively compelling, the cards reveal our deepest fears, desires, regrets, and obsessions. Frank calls them graphic haiku, beautiful, elegant, and small in structure but powerfully emotional. As Frank began posting the cards on his website, PostSecret took on a life of its own, becoming much more than a simple art project. It has grown into a global phenomenon, exposing our individual aspirations, fantasies, and frailties -- our common humanity. Every day dozens of postcards still make their way to Frank, with postmarks from around the world, touching on every aspect of human experience. This extraordinary collection brings together the most powerful, personal, and beautifully intimate secrets Frank Warren has received -- and brilliantly illuminates that human emotions can be unique and universal at the same time.

Russian Trade Policy Sergei Sutyurin,Olga Y. Trofimenko,Alexandra Koval,2019-05-28 This book reveals the key trends in the modern Russian trade policy to provide a deeper understanding of the main challenges and barriers, possible paths and opportunities in its development. An international team of authors investigates specific factors influencing the Russian trade policy evolution; recent trends in Russia's international trade development; and the impact of Russia's participation in the World Trade Organization on the domestic economy. Particular attention is paid to regional integration processes that involve Russia and their outcomes; as well as challenges in the remaining and building commercial relations with Russia's traditional and 'new' trade partners, taking into consideration those alienating the West and economic sanctions regimes. The analysis of key trends is combined with a special focus on selected industries and economic partners of Russia. The book contains a variety of case studies investigating the ways in which political and business actors adapt to the transformation of Russian trade policy, how Russia participates in the WTO dispute settlement mechanism, and what the driving forces and outputs are for the national economic agents. Finally, the authors consider what the reasonable expectations might be regarding the future prospects of Russian trade policy. The book presents a unique, comprehensive and multidimensional analysis of modern Russian trade policy. Filling an important gap in the existing literature, this book will be of value to all those interested in Russia's economic development path.

Chinese Animation Rolf Giesen,2014-12-19 With an output of more than 250,000 minutes annually, and with roughly 5,000 producers and production units, the Chinese are leading the field of animated films. Although it is almost impossible to completely cover 90 years of filmmaking, this book provides a comprehensible introduction to the industry's infancy, its Golden Age (Shanghai Animation Film Studio) and today's Chinese animation (in feature films, television series and student films). There are classics such as *Princess Iron Fan* (made at the time of the Japanese occupation) and the color *Havoc in Heaven*, both starring the Monkey King Sun Wukong, as well as countless TV stars (Blue Cat, Pleasant Goat and Big Big Wolf) and many almost unknown works by young filmmakers who are not focusing on an audience of children (like most of the industry output).

Animation Under the Swastika Rolf Giesen,J.P. Storm,2012-08-02 Among their many idiosyncrasies, Adolf Hitler and Joseph Goebbels, the Nazi minister of propaganda, remained serious cartoon aficionados throughout their lives. They adored animation and their influence on German animation after World War II continues to this day. This study explores Hitler and Goebbels' efforts to establish a German cartoon industry to rival Walt Disney's and their love-hate relationship with American producers, whose films they studied behind locked doors. Despite their ambitious dream, all that remains of their efforts are a few cartoon shorts—advertising and puppet films starring dogs, cats, birds, hedgehogs, insects, Teutonic dwarves, and other fairy-tale ensemble. While these pieces do not hold much propaganda value, they perfectly illustrate Hannah Arendt's controversial description of those who perpetrated the Holocaust: the banality of evil.

Austin Breakfast Tacos Mando Rayo,Jarod Neece,2013-07-09 Discover the savory culture and traditions that have made Austin, Texas, the self-proclaimed Breakfast Taco Capital of the World. Fresh tortillas, fluffy huevos con bacon and spicy salsa—good morning, Austin. Or good afternoon, evening, night—whenever. From taco tailgates to taquerias, there is a taco for every occasion and persuasion. Some say that it was born in the days of cowboys and vaqueros, and others say it was a creation of the Tex-Mex culture, but one thing is certain: The breakfast taco has taken over the Capital City. From South Congress to North Austin, neon and chalkboard signs tempt hungry passersby with their best morning-time handheld bites. With over forty breakfast taco recipes, Mando Rayo and Jarod Neece investigate (and masticate) the history, culture, and traditions of that indelible and delectable Austin treat: the breakfast taco. Includes photos! “Casual, fun, and approachable . . . I'm betting Austin Breakfast Tacos becomes one of
