Up Close and Personal? Paul Gamble,2006-05-03 CRM remains the biggest revolution yet in marketing, the power of new technology having swept it to the forefront of management thinking. Although based on apparently simple ideas, involving keeping in touch and responding to customer contacts, many companies still shy away from the daunting task of building a relationship with thousands or even millions of people. Up Close & Personal? provides practical new insights into effective customer relationship marketing. The book explores in depth a variety of issues including *strategies, policies and plans; *measuring the impact; *segmentation; *the implementation programme; *customer loyalty and continuity; *transparent marketing, customer value and process management; *customer knowledge management; *technical systems and data management; *managing good and bad customers; and *establishing ROI and satisfying the board. Based on worldwide research into CRM supported by IBM, Up Close & Personal? brings together the work of four leading experts in the field: Gamble, Stone, Woodcock and Foss.

Wearable Robotics: Challenges and Trends Maria Chiara Carrozza,Silvestro Micera,José L. Pons,2018-10-13 The book reports on advanced topics in the areas of wearable robotics research and practice. It focuses on new technologies, including neural interfaces, soft wearable robots, sensors and actuators technologies, and discusses important regulatory challenges, as well as clinical and ethical issues. Based on the 4th International Symposium on Wearable Robotics, WeRob2018, held October 16-20, 2018, in Pisa, Italy, the book addresses a large audience of academics and professionals working in government, industry, and medical centers, and end-users alike. It provides them with specialized information and with a source of inspiration for new ideas and collaborations. It discusses exemplary case studies highlighting practical challenges related to the implementation of wearable robots in a number of fields. One of the focus is on clinical applications, which was encouraged by the colocation of WeRob2018 with the International Conference on Neurorehabilitation, INCR2018. Additional topics include space applications and assistive technologies in the industry. The book merges together the engineering, medical, ethical and political perspectives, thus offering a multidisciplinary, timely snapshot of the field of wearable technologies.

Guidelines for Implementing Process Safety Management Systems CCPS (Center for Chemical Process Safety),2010-09-29 The causes of catastrophic accidents in the process industries, now recognized as complex and interrelated, need to be matched by multi-faceted technical management systems. This book supplements the systematic approach to process safety management set out in previous CCPS publications -- A CHALLENGE TO COMMITMENT, GUIDELINES FOR TECHNICAL MANAGEMENT OF CHEMICAL PROCESS SAFETY, and PLANT GUIDELINES FOR TECHNICAL MANAGEMENT OF CHEMICAL PROCESS SAFETY.

The Manager's Guide to Systems Practice Frank Stowell,Christine Welch,2012-05-24 This book is an ideal resource on the subject of systems practice for busy managers whose time is scarce. It provides a rapid introduction to straightforward, yet powerful ideas that enable users to address real world problems. Systems theory and practice is predominantly a framework for thinking about the World, in which holistic views are maintained. In this respect it contrasts with some familiar techniques of management science, in which problem situations are broken down into their constituent parts with resultant loss of coherence.

Mantel, Jr.,2017-10-30 Projects continue to grow larger, increasingly strategic, and more complex, with greater collaboration, instant feedback, specialization, and an ever-expanding list of stakeholders. Advanced Information Systems Engineering Bo Steinholtz,Lars Bergman,Arne Sølvberg,1990-04-25 The Nordic Conference on Advanced Information Systems Engineering (CAiSE) is an annual international conference for users, developers and researchers of information systems technology and methodology. A distinctive characteristic of the CAiSE conference series is the objective to appeal to advanced practitioners as well as to researchers, and to promote communication between the two groups. In this second CAiSE conference, the program was divided into two types of sessions that were not run in parallel: Technical Paper sessions, with formally reviewed technical papers, and Practice and Experience sessions, with invited speakers and panel discussions. The proceedings include the formally reviewed technical papers and abstracts of the invited presentations. The technical papers present important international (mainly European) work in Information Systems Engineering within such areas as conceptual modelling, prototyping, requirements engineering, design support, software process modelling, tool design, and tool experiences. The abstracts of invited speakers' presentations give an indication of current best industrial practice.
