Information Infrastructure Systems for Manufacturing Jan Goossenaerts,Johan C. Wortmann,Fumihiko Kimura,2013-06-05 On the verge of the global information society, enterprises are competing for markets that are becoming global and driven by customer demand, and where growing specialisation is pushing them to focus on core competencies and look for partnerships to provide products and services. Simultaneously the public demands environmentally sustainable industries and urges manufacturers to mind the whole life span of their products and production resources. Information infrastructure systems are anticipated to offer services enabling and catalyzing the strategies of manufacturing companies responding to these challenges: they support the formation of extended enterprises, the mastering of full product and process life cycles, and the digitalization of the development process. Information infrastructure systems would accommodate access to and transformation of information as required by the various authorized stakeholders involved in the life phases of products or production resources. Services should be available to select and present all relevant information for situations involving any kind of players, during any life phase of a product or artifact, at any moment and at any place.

  The Coach's Mind Manual Syed Azmatullah,2013-10-01 The Coach's Mind Manual combines the latest findings from neuroscience, psychology, and mindfulness research to provide an accessible framework to help coaches and leadership development specialists improve their awareness of the mind, enhancing their coaching practice. Syed Azmatullah explains how such knowledge can be used to guide clients on a journey of self-discovery, facilitating transformational changes and enriching their performance and personal lives. Part One considers the mind's management committee, the cerebral cortex, and how its contrasting functions can be accessed to improve problem solving skills. Part Two considers the mind's middle management, the limbic system, balancing executive direction with our social and emotional needs, driving motivation around core values. Part Three examines how the environment, via the body, influences our mental infrastructure at various stages in life, guiding the selection of interventions. Part Four looks at interpersonal dynamics and how to maximise team performance. Part Five considers the power of collaboration for generating the culture needed to improve the sustainability of our global community. Each section contains self-reflection exercises and experiential role-play to help clients derive benefit from their new personal insights. Coaches are encouraged to combine the broad range of concepts presented with their own experience, creating a contextually-driven coaching process. By focusing on the mind as the target for coaching interventions Azmatullah establishes a comprehensive framework for achieving transformational change. The Coach's Mind Manual is ideal for all professionals engaged in adult development including executive coaches, business coaches, human resource development professionals, leadership development professionals, management consultants and organisational development professionals.

  Management by Permission Tony McNulty,Robin Marks,2016-03-10 This book shows that in today's business world managers can only successfully lead with the active cooperation and consent of their staff. It presents a practical, four-pronged approach to successful management, drawing on the authors' combined research, consulting and managerial experience in more than twenty countries. Once a manager gets the four main ingredients right — (1) getting things under control; (2) establishing expectations; (3) running interference; and (4) developing people — everything else falls into place. Far from being unpleasant and stressful, managing others becomes rewarding and even fun. The book concludes by explaining how to use the four ingredients to ensure that your own manager is also managing you effectively. "If you have time for only one management book in your life, Management by Permission would be an outstanding choice." Greg Thompson, President, Markel Specialty In this readable and practical book the authors spell out the key challenges facing managers and how they can address them. The central question is how you win permission to manage — in straightforward language this book shows you how. The Quantified Self in Precarity Phoebe V. Moore,2017-09-11 Humans are accustomed to being tool bearers, but what happens when machines become tool bearers, calculating human labour via the use of big data and people analytics by metrics? The Quantified Self in Precarity highlights how, whether it be in insecure 'gig' work or office work, such digitalisation is not an inevitable process — nor is it one that necessarily improves working conditions. Indeed, through unique research and empirical data, Moore demonstrates how workplace quantification leads to high turnover rates, workplace rationalisation and worker stress and anxiety, with these issues linked to increased rates of subjective and objective precarity. Scientific management asked us to be efficient. Now, we are asked to be agile. But what does this mean for the everyday lives we lead? With a fresh perspective on how technology and the use of technology for management and self-management changes the 'quantified', precarious workplace today, The Quantified Self in Precarity will appeal to undergraduate and postgraduate students interested in fields such as Science and Technology, Organisation Management, Sociology and Politics.
