Taiwan John Franklin Copper, 2019-11-13 In this newly revised and updated seventh edition of *Taiwan: Nation-State or Province?* Copper examines Taiwan's geography and history, society and culture, economy, political system and foreign and security politics in the context of Taiwan's uncertain status, as either a sovereign nation or a province of the People's Republic of China. Analyzing possible future scenarios and trends that could affect Taiwan's status, the author argues that Taiwan's very rapid and successful democratization suggests Taiwan should be independent and separate from China, while economic links between Taiwan and China indicate the opposite. New features to this brand-new edition include: The triumph of the Democratic Progressive Party (DPP) in the 2016 elections. The impact of the Trump administration on US-Taiwan relations. The rise of populism. The shift in cross-Strait relations with China given their increased power on the world stage. This revised and fully up-to-date textbook will be essential reading for students of Taiwan, China, US-China relations and democracy.

Chopsticks and Gambling Desmond Lam, 2017-07-28 The Chinese are known throughout the world as avid gamblers with a long history of participation in games of chance. Historians have documented wagering on such games as far back as the early Chinese dynasties. Despite measures by ancient Chinese rulers to contain gambling, it proliferated, and Chinese games have evolved and multiplied since then. Desmond Lam provides a unique look into the little-known world of Chinese gambling from historical, cultural, psychological, and social perspectives. Chinese gamblers regularly patronize casinos in the United States, Canada, and Australia. The recent expansion of gambling in East Asia has attracted much global media attention. Macau, the only place in China where casino gambling is now legal, easily surpasses Las Vegas as the world's largest casino gaming market. Each year, Chinese from mainland China, Hong Kong, and Taiwan

account for almost 90 percent of visitors to Macau. The expansion of the Chinese gambling industry has brought about much harm to Chinese communities, despite all of the development it has also stimulated. This book is the first to examine the beliefs, motivations, attitudes, and behaviors of Chinese gamblers, and will be of interest to students of history and sociology, as well as those studying the history and culture of China.

Colonial Taiwan Pei-yin Lin, 2017-04-03 This book provides a refreshing and comprehensive analysis on colonial Taiwanese literature. It accentuates its thematic and stylistic richness, challenges the reductive “collaboration-resistance” binary, and calls for a multifaceted literary commonwealth.

The Political Economy of the SARS Epidemic Grace Lee, Malcolm Warner, 2007-10-02 This book discusses the political economy of the SARS epidemic and its impact on human resources in East Asia, as it occurred in 2003. The epidemic spread from the People’s Republic of China, to Hong Kong, Singapore and Taiwan, amongst other countries in East Asia and as far away as North America, particularly Canada, the EU and elsewhere. The book looks first at earlier precedents, such as the Black Death and the way in which the potential threats of the recent epidemic were diffused across the world in ‘instant news’ reports; examining why it was dubbed the first ‘global epidemic’ due to its media coverage and how far the threat started a psychological ‘tsunami’ of fear and panic. Next, it examines the anticipated economic consequences arising from this phenomenon and how it affected the business of everyday life, market behaviour and human resources in the Chinese and Overseas Chinese economies. It focuses in particular detail on the cases of the PRC, Hong Kong, Singapore and Taiwan. It concludes with a discussion of the issues involved and lessons to be learnt, and draws conclusions both for theory and practice vis-à-vis future pandemics that may threaten the global economy in the

coming decade and the public policy issues involved

Taiwan's Capital Market Reform Brian Semkow, 1994

Taiwan's Capital Market Reform examines from a unique interdisciplinary financial, legal, and economic framework, the history, current status, and future prospects of capital market reform in Taiwan. Taiwan emerged as a very important regional economy in the Asia Pacific in the 1980s, ranking among the top twenty in the world, and its economy is forecast to double by 2000 AD. This development, along with its eventual admission into GATT, among other bodies, will increase Taiwan's global stature. The system of financial markets has grown commensurably with the economy and substantial steps have been taken to liberalize and internationalize Taiwan's capital markets. This work examines the significance these measures have for domestic and foreign corporations and governments, and individual and institutional investors in Taiwan, Asia, and the rest of the world.

International Harmonization of Competition Laws Chia-Jui Cheng, 2023-10-20 This collection of more than two dozen papers delivered to a symposium on International Harmonization of Competition Laws examines the policies and practices of competition laws in major industrial jurisdictions and emerging industrialized economies such as the host country of the Symposium, the Republic of China on Taiwan. World class scholars and leading enforcement officials contributed to this volume, which examines the difficult issues of harmonizing competition laws. In addition to enhancing the scholarship on a topic of current interest after the Uruguay Round of GATT talks, the book also systematically examines topical issues in competition laws. It thus not only offers policy analysis, but also provides useful discussions of national and regional competition laws. A useful tool on comparative competition laws, this volume should be of interest to academics, practitioners and enforcement officials around the world.

Self-Help Organizations of People with Disabilities in Asia

Joseph Kin Fun Kwok, Raymond K.H. Chan, W. T. Chan, 2002-06-30 This is a comparative analysis of the micro and macro characteristics of self-help organizations of people with disabilities (SHOPs) in seven selected countries and territories in Asia, namely China Mainland, Hong Kong, Japan, the Philippines, Taiwan, Thailand, and Vietnam. Since the 1980s, SHOPs have prospered in this region and were given a major role in the United Nations' forum and the International Year of Disabled Persons in 1981. The analysis shows the differences among the SHOPs in terms of the complexity of their structure, government's affirmative policy, legislation, and leadership qualities. These differences are due to the complex interplay among factors at local, national, and international levels. SHOPs in this region present a rather homogenous perception in their organization,

leadership, social inclusion, and globalization, despite the marked differences in their societies. SHOPS tends to be democratic and consensual in nature, and led by elected members with assistance from paid professional and clerical support. The self-help organizations are positively regarded in these countries.

An introductory essay provides a close examination of the Asian American short story, and the volume closes with a list of works for further reading.

The Lottery Mindset: Investors, Gambling and the Stock Market W. Fong, 2014-12-07 Financial markets are growing in complexity, and there is an increased risk that investors are led to investment products and strategies they do not fully understand. The crisis-ridden decade of the 2000s is a stark reminder of how poorly managed finances can wreak havoc on household finances. Traditional finance assumes that all investors are risk-averse and require a risk premium from investing in risky assets such as stocks. However, recent developments in behavioural finance show that many individual investors often adopt strategies that lead to serious investment missteps, including over-investing in lottery-type stocks and securities. Lottery-type securities in fact attract investors who may be risk-seeking or are strongly influenced by cognitive biases ranging from overconfidence to being over-optimistic about future investment returns, especially

during periods of high sentiment. Drawing on existing and new research, *The Lottery Mindset* summarizes the behavioural motivations and detrimental impact of investment strategies which are popular with individual investors. Wai-Mun Fong provides insight and guidance on behavioural biases, and successful investment. By both reviewing and contributing to exiting literature on this topic, this book will be of use to academics and general readers alike.

Marybeth Rael, J Stephen Wilson, 2005-06-30 The diversity visa lottery is a complex process that can make or break a family's entry into the United States. Each year millions apply for a green card, but many fail because they do not follow the ever-changing requirements or have prior knowledge of the rules. With this in mind, Marybeth Rael and J. With these easy-to-read instructions, entrants will: Submit photographs that meet current State Department requirements, Understand the latest lottery rules to easily register themselves online, Comprehend instructions for registering family members, Determine qualifications for alternate state chargeability, Recognize why lottery entrants are disqualified, Enter multiple applications where instructed, Avoid costly pitfalls that can prevent you from obtaining a visa, Know what to do if out of status and win the lottery, Identify other ways to get a green

card, Pass the visa interview, and much more. Author Marybeth Rael wrote *Win the Green Card Lottery!* based on her experience with the American Green Card Lottery Network, a lottery service she established to help prospective immigrants prepare diversity visa applications. She also wrote the first book dedicated to the visa lottery published by Self-Counsel Press in 2002. J. High School for All in East Asia Shinichi Aizawa, Mei Kagawa, Jeremy Rappleye, 2018-07-24 Although late to industrialize, East Asia has witnessed rapid development whilst maintaining some of the highest educational enrollment rates and indicators of academic achievement globally. From major players, such as China, to small city-states, such as Singapore, economic success and the growth of education have seemingly unfolded simultaneously. This book seeks to better understand the relationship between these powerful economies and their commitment to educational expansion. Exploring the universalization of upper secondary schooling, it assesses the social foundations of the region's economic development. Chapters covering each of the countries of East Asia trace how upper secondary school functions as the support for the mass manufacturing labor force, which has been instrumental in East Asian economic expansion. These analyses then compare the experiences of the different nations along two major axes: the relationship between public and private provision and the balance between general and vocational tracks. Finally, the analyses go on to examine recent trends, including the slowing of social development and declining fertility, and ultimately asks, can East Asia maintain its world leading development and educational

standards in coming decades? Combining a wealth of quantitative data and policy analyses, this book will be useful to students and scholars of Asian and international education.
