Therapeutic Cultural Routines to Build Family Relationships Marva L. Lewis, Deborah J.

Weatherston, 2021-12-06 Social workers and Infant and Early Childhood Mental Health (IECMH) helpers need practical, relationship-based clinical tools to support families experiencing stress, separation, and loss. Research reveals key parenting behaviors occur during hair combing interaction (HCI) – lively verbal interaction, sensitive touch, and responsiveness to infant cues. This book explores how the simple routine of combing hair serves as an emotionally powerful, trauma-informed, culturally valid therapeutic tool for use by mental health helpers. HCI offers a low-cost opportunity for IECMH helpers to engage families and sustain attachment relationships. In this book, case studies illustrate the use of HCI with diverse families of color. Each chapter includes questions for reflective supervision to understand sociocultural factors that may shape behaviors during HCI. Topics included in the text: The Observing Professional and the Parent's Ethnobiography Introduction to Reflective Supervision: Through the Lens of Culture, Diversity, Equity, and Inclusion A Case Study in Cross-Racial Practice and Supervision: Reflections in Black and White Tools to Disrupt Legacies of Colorism: Perceptions, Emotions, and Stories of Childhood Racial Features Therapeutic Cultural Routines to Build Family Relationships: Talk, Touch & Listen While Combing Hair© is a unique resource for counselors, psychologists, psychiatrists, home visiting nurses, early

childhood educators, and family therapists who work with military families or multiracial families with bi-racial children. "This book provides practical insights useful for professionals and parents. The authors share compelling experiences using strength-based and rich cultural approaches guided by reflective practice. It deserves to be widely read and become a classic resource." Robert N. Emde, Emeritus Professor of Psychiatry, University of Colorado School of Medicine

Healing Humanity Richard Cohen,2019-03-27

Touch in Social Interaction Asta Cekaite,Lorenza Mondada,2020-07-15 Rooted in multimodal conversation analysis and based on video recordings of naturally occurring social interactions, this book presents a novel analytical perspective for the study of touch. The authors focus on how different forms of touch are interactionally organized in everyday, institutional, and professional practices, showing how touch is multimodally achieved in social interaction, how it acquires its significance, how it is embedded in the current activity and in its social context, and how it is systematically intertwined with talk, facial expressions, and body posture. Including work by a wide range of renowned researchers, this volume provides rich visual illustrations of situations featuring touch as a social and intersubjective practice. The studies make a compelling contribution to the field by clearly examining and demonstrating the social meaning of touch for the participants in social interaction in a broad range of contexts.

Presenting a new methodology for the study of touch, this is key reading for all researchers and scholars working in conversation analysis, multimodality, and related areas.

How to Feel Sushma Subramanian,2021-02-02 We are out of touch. Many people fear that we are trapped inside our screens, becoming less in tune with our bodies and losing our connection to the physical world. But the sense of touch has been undervalued since long before the days of digital isolation. Because of deeply rooted beliefs that favor the cerebral over the corporeal, touch is maligned as dirty or sentimental, in contrast with supposedly more elevated modes of perceiving the world. How

to Feel explores the scientific, physical, emotional, and cultural aspects of touch, reconnecting us to what is arguably our most important sense. Sushma Subramanian introduces readers to the scientists whose groundbreaking research is underscoring the role of touch in our lives. Through vivid individual stories—a man who lost his sense of touch in his late teens, a woman who experiences touch-emotion synesthesia, her own efforts to become less touch averse—Subramanian explains the science of the somatosensory system and our philosophical beliefs about it. She visits labs that are shaping the textures of objects we use every day, from cereal to synthetic fabrics. The book highlights the growing field of haptics, which is trying to incorporate tactile interactions into devices such as phones that touch us back and prosthetic limbs that can feel. How to Feel offers a new appreciation for a vital but misunderstood sense and how we can use it to live more fully.

Healing Heterosexuality Richard Cohen, 2019-03-27
Why do heterosexuals need to be healed? Why is there a 50% divorce rate? Why does research indicate that 33 to 73 percent of men and 26 to 70 percent of women are sexually unfaithful in marriage? Why are men and women getting hooked on porn, spending \$4,000 a second? Why are more and more men being exposed for sexually abusing children, adolescents, and/or adults? Why does the USA, with 5% of the world's population, consume 80% of the world's opioids? Porn, affairs, and addictions are illegitimate attempts to meet legitimate needs for love. Are you looking for

love? Longing to be held? Perhaps settling for sex instead? If you want to experience greater love in your life, Healing Heterosexuality: Time, Touch, and Talk (TTT) will provide you with the keys to fulfill your heart's desire. TTT has solutions that will change your life for good! Each of us needs to belong - family, friends, faith, work, and community. If you did not connect or securely attach with your primary caregivers in childhood, you may need more touch as an adolescent or adult. Perhaps you have used sex to fulfill those primal needs for connection. The problem is that sex never fulfills the basic need because it is that of a child, not an adolescent or adult. In fact, sex obstructs the very thing that you may be looking for - bonding, belonging, and just to be loved for who you are, not what you do, or how you look. All unwanted behaviors are driven by Unhealed Wounds and Unmet Love Needs. TTT will teach you how to heal your heart and create more loving, intimate relationships. TIME: Life-changing skills for your personal healing, family healing, and community healing. TOUCH: Essential exercises for healthy touch to transform your life and the lives of your loved ones. TALK: Communication skills to foster greater intimacy in your personal and professional relationships.

TouchPoints Douglas Conant, Mette Norgaard, 2011-04-12 A fresh, effective, and enduring way to lead—starting with your next interaction Most leaders feel the inevitable interruptions in their jam-packed days are troublesome. But in *TouchPoints*, Conant and Norgaard argue that these—and every point of

contact with other people—are overlooked opportunities for leaders to increase their impact and promote their organization's strategy and values. Through previously untold stories from Conant's tenure as CEO of Campbell Soup Company and Norgaard's vast consulting experience, the authors show that a leader's impact and legacy are built through hundreds, even thousands, of interactive moments in time. The good news is that anyone can develop TouchPoint mastery by focusing on three essential components: head, heart, and hands. TouchPoints speaks to the theory and craft of leadership, promoting a balanced presence of rational, authentic, active, and wise leadership practices. Leadership mastery in the smallest and otherwise ordinary moments can transform aimless activity in individuals and entropy in organizations into focused energy—one magical moment at a time.

How to Talk About Books You Haven't Read Pierre Bayard, 2010-08-10 In this delightfully witty, provocative book, literature professor and psychoanalyst Pierre Bayard argues that not having read a book need not be an impediment to having an interesting conversation about it. (In fact, he says, in certain situations reading the book is the worst thing you could do.) Using examples from such writers as Graham Greene, Oscar Wilde, Montaigne, and Umberto Eco, he describes the varieties of non-reading—from books that you've never heard of to books that you've read and forgotten—and offers advice on how to turn a sticky social situation into an occasion for creative brilliance. Practical, funny, and

thought-provoking, *How to Talk About Books You Haven't Read*-which became a favorite of readers everywhere in the hardcover edition-is in the end a love letter to books, offering a whole new perspective on how we read and absorb them.

Talk Triggers Jay Baer, Daniel Lemin, 2018-10-02
Talk Triggers is the definitive, practical guide on how to use bold operational differentiators to create customer conversations, written by best-selling authors and marketing experts Jay Baer and Daniel Lemin. Word of mouth is directly responsible for 19% of all purchases, and influences as much as 90%. Every human on earth relies on word of mouth to make buying decisions. Yet even today, fewer than 1% of companies have an actual strategy for generating these crucial customer conversations. Talk Triggers provides that strategy in a compelling, relevant, timely book that can be put into practice immediately, by any business. The key to activating customer chatter is the realization that same is lame. Nobody says let me tell you about this perfectly adequate experience I had last night. The strategic, operational differentiator is what gives customers something to tell a story about. Companies (including the 30+ profiled in Talk Triggers) must dare to be different and exceed expectations in one or more palpable ways. That's when word of mouth becomes involuntary: the

customers of these businesses simply MUST tell someone else. Talk Triggers contains: Proprietary research into why and how customers talk More than 30 detailed case studies of extraordinary results from Doubletree Hotels by Hilton and their warm cookie upon arrival, The Cheesecake Factory and their giant menu, Five Guys Burgers and their extra fries in the bag, Penn & Teller and their nightly meet and greet sessions, and a host of delightful small businesses The 4-5-6 learning system (the 4 requirements for a differentiator to be a talk trigger; the 5 types of talk triggers; and the 6-step process for creating talk triggers) Surprises in the text that are (of course) word of mouth propellants Consumers are wired to discuss what is different, and ignore what is average. Talk Triggers not only dares the reader to differentiate, it includes the precise formula for doing it. Combining compelling stories, inspirational examples, and practical how-to, Talk Triggers is the first indispensable book about word of mouth. It's a book that will create conversation about the power of conversation.
