Hippos are big animals that live in Africa. Hippo calves are born underwater. They are strong swimmers. Baby hippos spend most of their time in the water. This title also includes a life cycle diagram, a habitat map, fun facts, a glossary, and more!

Talk, Baby! Harriet Ziefert,1999-09-15 Most of all what Max wanted to know was: When will she talk? Max is thrilled with his new baby sister. He can't wait to talk and play with her! But all the baby seems to do is eat, sleep, and cry. Though Max feels a little impatient, he never stops talking to the baby. And when she finally does speak, her first word is a big surprise for everyone! In this companion to last year's *Waiting for Baby*, Harriet Ziefert and Emily Bolam again capture the happiness and frustration all big brothers

and sisters feel when a new baby comes into their lives. And tucked into the book's last pages, older siblings will find a gift: a folded notecard that they can fill out, with their parents' help, to commemorate their own baby's first word.

Imagining Animals Caroline Case,2014-02-04 Imagining Animals explores the making of animal images in art therapy and child psychotherapy. It examines two contrasting primitive states of mind: the investing of the world about us with life through animism and participation mystique, and the lifeless world of autistic states of mind encountered in children who are hard to reach. Caroline Case examines how the emergence of animal imagery in therapy can act as a powerful catalyst for children in autistic states of mind, or with a background of trauma, abuse or depression. She also looks at animal / human relationships, and animal symbolism, as well as three-dimensional claywork and the development of personality. Subjects covered include: * animals on stage in therapy - anthropomorphic animal objects * the location of self in animals * entangled and confusional children: analytical approaches to psychotic thinking and autistic features in childhood. The book concludes with a compelling extended case study, which describes analytic work with a child with multiple symptoms, using the various therapeutic tools of play and art, painting and clay, and the development of character, plot and narrative.

Imagining Animals offers a unique insight into the role and representation of animal imagery in art therapy and child psychotherapy, which will be of interest to all arts and play therapists working with children as well as adult psychotherapists interested in the use of imagery.

Baby Hippo. It's Time to Sleep Kayleigh Rhatigan, 2020-06-30

The Blue Hippopotamus PAUL EHRLICH, 2012-08-30 Writing The Blue Hippopotamus was great fun sort of reliving my early life and making some incidents even better than they were the first time. What I wanted most of all was to write a page-turner, to give the reader a chance to actually live and feel what I had lived and felt. In a sense, my own life was a page-turner, from day to day, and a wonderful one that I enjoyed and loved even the difficult and painful happenings. I think that I've been tremendously lucky to have had such a almost a charmed life and that's what I wanted to share with the reader. Yes,

there were moments and incidents that were difficult and sometimes very painful, like when I said my final goodbye to Maudi, the love of my life, and what a remarkable love that was several professional authors have called that good-bye heartbreaking, and so it was. It was my heart that was breaking, and Maudis, but we both knew that it had to be that way, and we accepted it. And then of course, many, many years later, we finally met again by chance, or by accident, in Paris, and the closure we had needed for so many years finally arrived. I wrote the book when I was ninety, and I was the last survivor of our group of five. We had all been made to swear that we would never tell. But after seventy years, I felt the story could, and should, be told.
