Writing the Talking Cure Jeffrey Berman,2019-05-01 A distinguished psychiatrist and psychotherapist, Irvin D. Yalom is also the United States' most well-known author of psychotherapy tales. His first volume of essays, *Love's Executioner*, became an immediate best seller, and his first novel, *When Nietzsche Wept*, continues to enjoy critical and popular success. Yalom has created a subgenre of literature, the therapy story, where the therapist learns as much as, if not more than, the patient; where therapy never proceeds as expected; and where the therapist's apparent failure proves ultimately to be a success. *Writing the Talking Cure* is the first book to explore all of Yalom's major writings. Taking an interdisciplinary approach, Jeffrey Berman comments on Yalom's profound contributions to psychotherapy and literature and emphasizes the recurrent ideas that unify his writings: the importance of the therapeutic relationship, therapist transparency, here-and-now therapy, the prevalence of death anxiety, reciprocal healing, and the idea of the wounded healer. Throughout, Berman discusses what Yalom can teach therapists in particular and the common (and uncommon) reader in general.

Lost Land of the Dodo Anthony Cheke,Julian P. Hume,2009-01-01 The Mascarene islands in the southern Indian Ocean - Mauritius, Réunion and Rodrigues - were once home to an extraordinary range of birds and reptiles. Evolving on these isolated volcanic islands in the absence of mammalian predators or competitors, the land was dominated by giant tortoises, parrots, skinks and geckos, burrowing boas, flightless rails & herons, and of course (in Mauritius) the Dodo. Uninhabited and only discovered in the 1500s, colonisation by European settlers in the 1600s led to dramatic changes in the ecology of the islands; the birds and tortoises were slaughtered indiscriminately while introduced rats, cats, pigs and monkeys destroyed their eggs, the once-extensive forests logged, and invasive introduced plants from all over the tropics devastated the ecosystem. The now-familiar icon of extinction, the Dodo, was gone from Mauritius within 50 years of human settlement, and over the next 150 years many of the Mascarenes' other native vertebrates followed suit. The product of over 30 years research by Anthony Cheke, *Lost Land of the Dodo* provides a comprehensive yet hugely enjoyable account of the story of the islands' changing ecology, interspersed with human stories, the islands' biogeographical anomalies, and much else. Many French publications, old and new, especially for Réunion, are discussed and referenced in English for the first time. The book is richly illustrated with maps and contemporary illustrations of the animals and their environment, many of which have rarely been reprinted before. Illustrated box texts look in detail at each extinct vertebrate species, while Julian Hume's superb colour plates bring many of the extinct birds to life. *Lost Land of the Dodo* provides the definitive account of this tragic yet remarkable fauna, and is a must-read for anyone interested in islands, their ecology and the history of our relationship with the world around us.

The Stigma Effect Patrick W. Corrigan,2018-10-02 Despite efforts to redress the prejudice and discrimination faced by people with mental illness, a pervasive stigma remains. Many well-meant programs have attempted to counter stigma with affirming attitudes of recovery and self-determination. Yet the results of these efforts have been mixed. In *The Stigma Effect*, psychologist Patrick W. Corrigan examines the unintended consequences of mental health campaigns and proposes new policies in their place. Corrigan analyzes the agendas of government agencies, mental health care providers, and social service agencies that work with people with mental illness, dissecting how their best intentions can misfire. For example, a campaign to change the language around mental illness by replacing supposedly stigmatizing words with empowering ones has made little difference in how people with mental health conditions are viewed. Educational programs that frame mental illness as a brain disorder have made the general public less likely to blame people for their illnesses, but also skeptical that such conditions can be cured. Ultimately, Corrigan argues that effective strategies require leadership by those with lived experience, as their recovery stories replace ideas of incompetence and dangerousness with ones of

hope and empowerment. As an experienced clinical researcher, as an advocate, and as a person who has struggled with such prejudices, Corrigan challenges readers to carefully examine anti-stigma programs and reckon with their true effects.

Children’s Literature and Intergenerational Relationships Justyna Deszcz-Tryhubczak,Irena Barbara Kalla,2021-04-23 Children’s Literature and Intergenerational Relationships: Encounters of the Playful Kind explores ways in which children’s literature becomes the object and catalyst of play that brings younger and older generations closer to one another. Providing examples from diverse cultural and historical contexts, this collection argues that children’s texts promote intergenerational play through the use of literary devices and graphic formats and that they may prompt joint play practices in the real world. The book offers a distinctive contribution to children’s literature scholarship by shifting critical attention away from the difference and conflict between children and adults to the exploration of inter-age interdependencies as equally crucial aspects of human life, presenting a new perspective for all who research and work with children’s culture in times of global aging.

Social Work Practice Research for the Twenty-First Century Anne E. Fortune,Philip McCallion,Katharine Briar-Lawson,2010-09-21 Social work professionals must demonstrate their effectiveness to legislators and governments, not to mention clients and incoming practitioners. A thorough evaluation of the activities, ethics, and outcomes of social work practice is critical to maintaining investment and interest in the profession and improving the lives of underserved populations. Incorporating the concerns of a new century into a consideration of models for practice research, this volume builds on the visionary work of William J. Reid (1928-2003) who transformed social work research through empirically based and task-centered approaches-and, more recently, synthesized intervention knowledge for framing future study. This collection reviews the task-centered model and other contemporary Evidence-Based Practice models for working with individuals, families, groups, communities, and organizations. Essays demonstrate the value of these pragmatic approaches in the United States and international settings. Contributors summarize state-of-the-art methods in several key fields of service, including children and families, aging, substance abuse, and mental health. They also evaluate the research movement itself, outlining an agenda for today's sociopolitical landscape and the profession. This volume inspires practice research to prioritize evidence as a base for the profession.
