The Last Lecture Randy Pausch,2008-04-08 After being diagnosed with terminal cancer, a professor shares the lessons he's learned—about living in the present, building a legacy, and taking full advantage of the time you have—in this life-changing classic. We cannot change the cards we are dealt, just how we play the hand. —Randy Pausch A lot of professors give talks titled The Last Lecture. Professors are asked to consider their demise and to ruminate on what matters most to them. And while they speak, audiences can't help but mull over the same question: What wisdom would we impart to the world if we knew it was our last chance? If we had to vanish tomorrow, what would we want as our legacy? When Randy Pausch, a computer science professor at Carnegie Mellon, was asked to give such a lecture, he didn't have to imagine it as his last, since he had recently been diagnosed with terminal cancer. But the lecture he gave—Really Achieving Your Childhood Dreams—wasn't about dying. It was about the importance of overcoming obstacles, of enabling the dreams of others, of seizing every moment (because time is all you have . . . and you may find one day that you have less than you think). It was a summation of everything Randy had come to believe. It was about living. In this book, Randy Pausch has combined the humor, inspiration and intelligence that made his lecture such a phenomenon and given it an indelible form. It is a book that will be shared for generations to come.

They understand the agony of social awkwardness, the power of the perfect smoky eye, and the arm- (or wing)-flapping terror of having a bee in the car. In fact, these winged characters get into the same sticky situations we all do. They are Penguins with People Problems. So meet your favorite new flightless friends. They're brutally honest (except when they're lying), comically insecure, and totally relatable.

The Art of Eric Carle Eric Carle,2021-03-09 Carle is one of the most beloved illustrators of children's books. This retrospective is more than just an appreciation of his art, however. The book also contains an insightful autobiography illustrated with personal photographs, an anecdotal essay by his longtime editor, a photographic essay on how Carle creates his collages, and writings by Carle and his colleagues. Still, it is the artwork in the oversize volume that seizes the imagination. More than 60 of his full-color collage pictures are handsomely reproduced and serve as a statement of Carle's impressive talent. - Booklist

Talking the Walk & Walking the Talk Marc Shell,2015-09-01 This book argues that we should regard walking and talking in a single rhythmic vision. In doing so, it contributes to the theory of prosody, our understanding of respiration and looking, and, in sum, to the particular links, across the board, between the human characteristics of bipedal walking and meaningful talk. The author first introduces the philosophical, neurological, anthropological, and aesthetic aspects of the subject in historical perspective, then focuses on rhetoric and introduces a tension between the small and large issues of rhythm. He thereupon turns his attention to the roles of breathing in poetry—as a life-and-death matter, with attention to beats and walking poems. This opens onto technical concepts from the classical traditions of rhetoric and philology. Turning to the relationship between prosody and motion, he considers both animals and human beings as both ostensibly able-bodied creatures and presumptively disabled ones. Finally, he looks at dancing and writing as aspects of walking and talking, with special attention to motion in Arabic and Chinese calligraphy. The final chapters of the book provide a series of interrelated representative case studies.

Happy by Design Ben Channon,2023-11-15 Can good design truly make us happier? Given that we spend over 80% of our time in buildings, shouldn't we have a better understanding of how they make us feel? Happy by Design explores the ways in which buildings, spaces and cities affect our moods. It reveals how architecture and design can make us happy and support mental health, and explains how poor design can have the opposite effect. Presented through a series of easy-to-understand design tips and accompanied by beautiful diagrams and illustrations, Happy by Design is a fantastic resource for architects, designers and students, or for anybody who would like to better understand the relationship between buildings and happiness. With the pandemic and cost-of-living crisis, the importance of designing for mental wellbeing has never been higher on the agenda. Whether through low-energy design, designing in better ventilation to avoid passing on pathogens or the realisation of the importance of accessing nature within an environment, this revised edition has been updated to reflect a changed world.

No One Is Talking About This Patricia Lockwood,2022-02-15 FINALIST FOR THE 2021 BOOKER PRIZE & A NEW YORK TIMES TOP 10 BOOK OF 2021 WINNER OF THE DYLAN THOMAS PRIZE “A book that reads like a prose poem, at once sublime, profane, intimate, philosophical, witty and, eventually, deeply moving.” —New York Times Book Review, Editors’ Choice “Wow. I can’t remember the last time I laughed so much reading a book. What an inventive and startling writer...I’m so glad I read this. I really think this book is

remarkable.” —David Sedaris From a formidably gifted writer (The New York Times Book Review), a book that asks: Is there life after the internet? As this urgent, genre-defying book opens, a woman who has recently been elevated to prominence for her social media posts travels around the world to meet her adoring fans. She is overwhelmed by navigating the new language and etiquette of what she terms the portal, where she grapples with an unshakable conviction that a vast chorus of voices is now dictating her thoughts. When existential threats—from climate change and economic precariousness to the rise of an unnamed dictator and an epidemic of loneliness—begin to loom, she posts her way deeper into the portal's void. An avalanche of images, details, and references accumulate to form a landscape that is post-sense, post-irony, post-everything. Are we in hell? the people of the portal ask themselves. Are we all just going to keep doing this until we die? Suddenly, two texts from her mother pierce the fray: Something has gone wrong, and How soon can you get here? As real life and its stakes collide with the increasingly absurd antics of the portal, the woman confronts a world that seems to contain both an abundance of proof that there is goodness, empathy, and justice in the universe, and a deluge of evidence to the contrary. Fragmentary and omniscient, incisive and sincere, *No One Is Talking About This* is at once a love letter to the endless scroll and a profound, modern meditation on love, language, and human connection from a singular voice in American literature.

Ed Futures Stavros Yiannouka, Deena Newaz, Vesta Gheibi, 2019-10-23 Throughout history, we have been trying to grasp, celebrate, and even reject advances in technology. Numerous science fiction films and literary works have paid homage to the possible futures looming. However, such futures and technologies present interesting situations for us in education. The community of educators, policymakers and technologists are worried by thoughts of children interacting with intelligent robots instead of teachers, and facing permanent unemployment because of automation. However, the future cannot be reduced to this fear and *Ed Futures* is an attempt to speculate worlds where education and technology are brought to life by very human connections. These worlds break into parts of society where we least expect it, and aims to open this important conversation on the impact of new technologies on education to a larger audience through storytelling. By speculating various futures in each story and making bare the politics of a changing world, our hope is to create a starting point for anyone and everyone to engage in creating a responsible future of learning. What is your learning future?

Sold on Language Julie Sedivy, Greg Carlson, 2011-05-03 As citizens of capitalist, free-market societies, we tend to celebrate choice and competition. However, in the 21st century, as we have gained more and more choices, we have also become greater targets for persuasive messages from advertisers who want to make those choices for us. In *Sold on Language*, noted language scientists Julie Sedivy and Greg Carlson examine how rampant competition shapes the ways in which commercial and political advertisers speak to us. In an environment saturated with information, advertising messages attempt to compress as much persuasive power into as small a linguistic space as possible. These messages, the authors reveal, might take the form of a brand name whose sound evokes a certain impression, a turn of phrase that gently applies peer pressure, or a subtle accent that zeroes in on a target audience. As more and more techniques of persuasion are aimed squarely at the corner of our mind which automatically takes in information without conscious thought or deliberation, does 'endless choice' actually mean the end of true choice? *Sold on Language* offers thought-provoking insights into the choices we make as consumers and citizens – and the choices that are increasingly being made for us. On a spontaneous visit to the aquarium, straight-laced and proper Elliot discovers his dream pet: a penguin. When he asks his father if he may have one (please and thank you), his father says yes. Between Doctors and Patients Lilian R. Furst, 1998 Although there are many books on the mechanics of doctor-patient interaction, none has previously confronted the philosophical and psychological issues of power and trust that bind these figures. One consequence of their changed relationship, Furst asserts, has been the decrease of interest in patients as individuals. In this time of impersonal HMOs and spiraling health-care costs, she hopes that doctors and patients can learn from the past and eventually find a mutually beneficial balance of power that will see medicine as both a science and an art and will recognize human understanding as an integral element of healing.
