Pulp Classics John Gregory Betancourt,2004-01-01 A reprint of the June 1931 issue of the classic pulp magazine, GHOST STORIES, which features contributions from Conrad Richter (best known as the author of THE LIGHT IN THE FOREST) and a story by E. and H. Heron (pen name for Mrs. Kenneth and Mr. Hesketh Prichard) featuring their psychic detective, Flaxman Low.

Encyclopedia of American Short Films, 1926-1959 Graham Webb,2020-07-13 Short subject films have a long history in American cinemas. These could be anywhere from 2 to 40 minutes long and were used as a filler in a picture show that would include a cartoon, a newsreel, possibly a serial and a short before launching into the feature film. Shorts could tackle any topic of

interest: an unusual travelogue, a comedy, musical revues, sports, nature or popular vaudeville acts. With the advent of sound-on-film in the mid-to-late 1920s, makers of earlier silent short subjects began experimenting with the short films, using them as a testing ground for the use of sound in feature movies. After the Second World War, and the rising popularity of television, short subject films became far too expensive to produce and they had mostly disappeared from the screens by the late 1950s. This encyclopedia offers comprehensive listings of American short subject films from the 1920s through the 1950s.

Watershed Anika Gauja,Marian Sawyer,Jill Sheppard,2023-08-10 Australia's 2022 federal election played out in ways that few could have expected. Not only did it bring a change of government; it also saw the lowest number of primary votes for the major parties and the election of the greatest number

of Independents to the lower house since the formation of the Australian party system. The success of the Teal Independents and the Greens, along with the appetite voters showed for 'doing politics differently', suggested that the dominant model of electoral competition might no longer be the two-party system of Labor versus Liberal. At the very least, the continued usefulness of the two-party-preferred vote as a way of conceptualising and predicting Australians' voting behaviour has been cast into serious doubt. In Watershed, leading scholars analyse the election from the ground up—focusing on the campaign issues, the actors involved, and the successes and failures of campaign strategy—and show how digital media, visual politics and fake news are changing the way politics is done. Other topics include the impact of COVID-19 and the salience of climate, gender and integrity issues, as well as voting patterns and polling accuracy. This authoritative book is indispensable for understanding the disenchantment with the major parties, the rise of Community Independents, and the role of the Australian Greens and third parties. Watershed is the eighteenth in the ANU Press federal election series and the tenth sponsored by the Academy of the Social Sciences in Australia.

revision notes 2022 - Jul 14 2023
web for practical purposes a rounded
version of the constant can be used
in exams $6.02 \times 10^{23} \text{ mol}^{-1}$ the
reason we have mol^{-1} as the unit is
because this is the number of
entities per mole of substance for
example one mole of sodium Na
contains 6.02×10^{23} atoms of sodium
one mole of hydrogen H_2 contains 6.02×10^{23} molecules of hydrogen
