**Talking to Robots** David Ewing Duncan,2019-07-16 Award-winning journalist David Ewing Duncan considers 24 visions of possible human-robot futures—Incredible scenarios from Teddy Bots to Warrior Bots, and Politician Bots to Sex Bots—Grounded in real technologies and possibilities and inspired by our imagination. What robot and AI systems are being built and imagined right now? What do they say about us, their creators? Will they usher in a fantastic new future, or destroy us? What do some of our greatest thinkers, from physicist Brian Greene and futurist Kevin Kelly to inventor Dean Kamen, geneticist George Church, and filmmaker Tiffany Shlain, anticipate about our human-robot future? For even as robots and A.I. intrigue us and make us anxious about the future, our fascination with robots has always been about more than the potential of the technology—it's also about what robots tell us about being human.

Not All Robots #1 Mark Russell,2021-08-04 In the year 2056, robots have replaced human beings in the workforce. An uneasy co-existence develops between the newly intelligent robots and the ten billion humans living on Earth. Every human family is assigned a robot upon whom they are completely reliant. What could possibly go wrong? Meet the Walters, a human family whose robot, Razorball, ominously spends his free time in the garage working on machines which they're pretty sure are designed to kill them in this sci-fi satire from Mark Russell (The Flintstones, Second Coming) and Mike Deodato Jr. (The Amazing Spider-Man, The Resistance).

**The Heart and the Chip: Our Bright Future with Robots** Daniela Rus,Gregory Mone,2024-03-05 Daniela Rus, a leading roboticist and computer scientist, explores how we can use a new generation of smart machines to help humankind. There is a robotics revolution underway. A record 3.1 million robots are working in factories right now, doing everything from assembling computers to packing goods and monitoring air quality and performance. A far greater number of smart machines impact our lives in countless other ways—improving the precision of surgeons, cleaning our homes, extending our reach to distant worlds—and we’re on the cusp of even more exciting opportunities. In The Heart and the Chip, roboticist Daniela Rus and science writer Gregory Mone provide an overview of the interconnected fields of robotics, artificial intelligence, and machine learning, and reframe the way we think about intelligent machines while weighing the moral and ethical consequences of their role in society. Robots aren’t going to steal our jobs: they’re going to make us more capable, productive, and precise. At once optimistic and realistic, Rus and Mone envision a world in which these technologies augment and enhance our skills and talents, both as individuals and as a species—a world in which the proliferation of robots allows us all to be more human.

**I, Robot** Isaac Asimov,2004-06-01 This classic science fiction masterwork by Isaac Asimov weaves stories about robots, humanity, and the deep questions of existence into a novel of shocking intelligence and heart. “A must-read for science-fiction buffs and literature enjoyers alike.”—The Guardian I, Robot, the first and most widely read book in Asimov’s Robot series, forever changed the world’s perception of artificial intelligence. Here are stories of robots gone mad, of mind-reading robots, and robots with a sense of humor. Of robot politicians, and robots who secretly run the world—all told with the dramatic blend of science fact and science fiction that has become Asimov’s trademark. The Three Laws of Robotics: 1) A robot may not injure a human being or, through inaction, allow a human being to come to harm. 2) A robot must obey orders given to it by human beings except where such orders would conflict with the First Law. 3) A robot must protect its own existence as long as such protection does not conflict with the First or Second Law. With these three, simple directives, Isaac Asimov formulated the laws governing robots’ behavior. In I, Robot, Asimov chronicles the development of the robot from its primitive origins in the present to its ultimate perfection in the not-so-distant future—a future in which humanity itself may be rendered obsolete. “Tremendously exciting and entertaining . . . Asimov dramatizes an interesting question: How can we live with machines that, generation by generation, grow more intelligent than their creators and not eventually clash with our own invention?”—The Chicago Tribune

**Voice Lessons** Rob Paulsen,2019-10-08 Rob Paulsen is one of Hollywood’s busiest, most talented, and most passionate performers. If you don’t know him by name, you will know him by the many characters he has brought to life: Pinky from Pinky and the Brain, Yakko from Animaniacs, the tough but loveable Raphael from the original animated Teenage Mutant Ninja Turtles, and many more. So you can imagine how terrifying it must have been when Rob was diagnosed with throat cancer, putting his entire livelihood in jeopardy and threatening to rob the world of all his loveable characters that filled our youths and adulthoods with humor and delight. Voice Lessons tells the heartwarming and life-affirming story of Rob’s experience with an aggressive cancer treatment and recovery regimen, which luckily led to a full recovery. Rob quickly returned to doing what he loves most, but with a much deeper appreciation of what he came so close to losing. His new lease on life inspired him to rededicate himself to his fans, particularly the new friends he made along the way: hundreds of sick children and their families. Rob said it best himself: “I can not only continue to make a living, but make a difference, and I can’t wait to use that on the biggest scale that I can.”

**Social Robotics** Abdulaziz Al Ali,John-John Cabibihan,Nader Meskin,Silvia Rossi,Wanyue Jiang,Hongsheng He,Shuzhi Sam Ge,2024-01-03 The two-volume set LNAI 14453 and 14454 constitutes the refereed post-conference proceedings of the 15th International Conference on Social Robotics, ICSR 2023, held in Doha, Qatar, during December 4–7, 2023.
