Helen Lester

Talking to Robots David Ewing Duncan, 2019-07-16 Award-winning journalist David Ewing Duncan considers 24 visions of possible human-robot futures—Incredible scenarios from Teddy Bots to Warrior Bots, and Politician Bots to Sex Bots—Grounded in real technologies and possibilities and inspired by our imagination. What robot and AI systems are being built and imagined right now? What do they say about us, their creators? Will they usher in a fantastic new future, or destroy us? What do some of our greatest thinkers, from physicist Brian Greene and futurist Kevin Kelly to inventor Dean Kamen, geneticist George Church, and filmmaker Tiffany Shlain, anticipate about our human-robot future? For even as robots and A.I. intrigue us and make us anxious about the future, our fascination with robots has always been about more than the potential of the technology—it's also about what robots tell us about being human.

I, Robot Cuadrado Raúl, 2020-05-20T00:00:00+02:00 What do we mean when we talk about artificial intelligence? Are we talking about beings more intelligent than humans? Wiser? Would we be able to coexist with such beings and overcome our presumption of superiority? These and other questions are what Isaac Asimov explores in his legendary stories of robots. And what Raúl Cuadrado has now dared to illustrate.

Robots Izzi Howell, 2018-08 Robots were once only futuristic ideas, but the future is here! Discover how robots help humans, from exploring space and destroying bombs to performing surgery and cleaning houses. See how robots use sensors to explore and interact with the world around them and learn how programmers write codes to instruct robots how to behave.

The Helpful Robots Robert Shea, 2011-05-16 The story of Rankin, who prided himself on knowing how to handle robots, but did not realize that the robots of the Clearchan Confederacy were subject to a higher law than implicit obedience to man. Short story Excerpt They had come to pass judgment on him. He had violated their law--willfully, ignorantly, and very deliberately. Our people will be arriving to visit us today, the robot said. Shut up! snapped Rod Rankin. He jumped, wiry and quick, out of the chair on his verandah and stared at a cloud of dust in the distance. Our people-- the ten-foot, cylinder-bodied robot grated, when Rod Rankin interrupted him. I don't care about your fool people, said Rankin. He squinted at the cloud of dust getting bigger and closer beyond the wall of kesh trees that surrounded the rolling acres of his plantation. That damned new neighbor of mine is coming over here again. He gestured widely, taking in the dozens of robots with their shiny, cylindrical bodies and pipestem arms and legs laboring in his fields. Get all your people together and go hide in the wood, fast. It is not right, said the robot. We were made to serve all. Well, there are only a hundred of you, and I'm not sharing you with anybody, said Rankin. It is not right, the robot repeated. Don't talk to me about what's right, said Rankin. You're built to follow orders, nothing else. I know a thing or two about how you robots work. You've got one law, to follow orders, and until that neighbor of mine sees you to give you orders, you work for me. Now get into those woods and hide till he goes away. We will go to greet those who visit us today, said the robot.

Roby and The Superhero Robots Eva Jo Sombathy, 2020-03-18 When Roby the robot is only 10-years-old he discovers that his special xray robot vision is getting blurry. With the help of a superhero robot Roby's vision is restored, and he even has Laser robot vision now. Roby learns that the gift of life is given by special robots that chose to be an organ, tissue and eye donor. This fully illustrated childrens book will introduce the topic of donation to even the youngest of readers.
