**Solution-Focused Brief Therapy with Clients Managing Trauma** Adam Froerer,Jacqui von Cziffra-Bergs,Johnny Kim,Elliott Connie,2018-07-24 The topic of trauma has been covered in many books, and there are many publications covering the use of SFBT in different settings and with varied client populations. However, the convergence of these topics has, to date, been covered only minutely. Solution-Focused Brief Therapy with Clients Managing Trauma is a comprehensive overview of how Solution Focused Brief Therapy (SFBT) can be used as a treatment approach for working with clients managing various forms of trauma. It includes an overview of SFBT's basic tenets, a description of the current research supporting SFBT as an evidence-based practice, and a comparison of how SFBT clinicians may approach trauma cases differently than clinicians from other therapeutic approaches. The bulk of the text uniquely includes chapters contributed by skilled SFBT clinicians, with differing clinical expertise, sharing their knowledge and describing their strength-based, resiliency focus of applying SFBT in different traumatic circumstances. Practitioners and even Master's/doctoral students will find this text invaluable in learning how to best help traumatized clients develop a positive future and move toward healing and health.

*Distributed, Ambient and Pervasive Interactions* Norbert Streitz,Shin'ichi Konomi,2019-07-10 This book constitutes the refereed proceedings of the 7th International Conference on Distributed, Ambient and Pervasive Interactions, DAPI 2019, held as part of the 21st International Conference on Human-Computer Interaction, HCII 2019, in Orlando, Florida, USA, in July 2019. **Blended Learning and MOOCs** Manpreet Singh Manna,Balamurugan Balusamy,Meenakshi Sharma,Prithi Samuel,2023-04-21 This book presents a framework for integrating blended learning and massive open online courses (MOOCs) in the Indian education system. It argues that blended teaching and learning is the most suitable approach to education in a post-COVID-19 world. Drawing on case studies used in blended learning practices around the world, the book provides ample resources for beginners to improvise the spread of knowledge around information technology in higher education. It discusses various concepts such as flip learning in blended learning models and examines the self-assessment tools and structures it offers to institutions for building competencies. In addition to addressing the challenges and opportunities of adopting the digital mode of teaching, the book also offers techniques and concepts helpful for designing MOOCs. It covers concepts such as curriculum designing, content flow, teaching behavior, and evaluation patterns, which are important aspects of online teaching. An indispensable guide to navigating the shift from offline to online teaching, this book will be of interest to students, teachers, and researchers of education, education technology, digital education, and information technology. It will also be useful to policymakers, educational institutions, EdTech start-ups, NGOs in the education sector, and online education centers.

*Midnight Radio* Lance White,2000-08 What's the big deal about getting through the night? Is there something I should know? Yes, he mumbled, Don't go to sleep. Welcome to the dark world of Ryan Knox. Six months ago he had it all, a wife, a great job, and plenty of money. But suddenly he found himself alone, out of work, and almost broke. If he didn't find something, and quick, he might lose the only thing he had left...his house. That's why he thought his luck was changing when he got the graveyard shift at K-talk radio. What Ryan didn't know was that there were things at K-talk even stranger than the staff. Dark things. Sinister things. Things that only came out at night...when he was there alone. His luck was about to change all right. For the worse! Midnight Radio gives a whole new meaning to the phrase, 'Killer Job.'

*The Black Lizard Big Book of Black Mask Stories* Otto Penzler,2012-05-09 An unstoppable anthology of crime stories culled from Black Mask magazine the legendary publication that turned a pulp phenomenon into literary mainstream. Black Mask was the apotheosis of noir. It was the magazine where the first hardboiled detective story, which was written by Carroll John Daly appeared. It was the slum in which such American literary titans like Dashiell Hammett and Raymond Chandler got their start, and it was the home of stories with titles like "Murder Is Bad Luck," "Ten Carets of Lead," and "Drop Dead Twice." Collected here is best of the best, the hardest of the hardboiled, and the darkest of the dark of America's finest crime fiction. This masterpiece collection represents a high watermark of America's underbelly. Crime writing gets no better than this. Featuring • Deadly Diamonds • Dancing Rats • A Prize Fighter Fighting for His Life • A Parrot that Wouldn't Talk Including • Dashiell Hammett's The Maltese Falcon as it was originally published • Lester Dent's Luck in print for the first time

*PLENUM* Harlen Campbell,2015-07-10 A sacrifice that altered the course of time Arthur Penn was a sucker for a lost cause. He rescued an old man from an ambush and carried him to a hospital, but he didn't expect a one-way trip. He didn't expect to find himself fighting off an amorous girl a century before the Pilgrims land. And he certainly didn't expect to be drafted into a bloody war raging across a thousand human centuries. Beautiful women. Brave men. Lonely machines. Terrifying aliens lost in a tunnel that connects every point in space and time. A ship that sails a universe so huge it can't be described in human words. A lady who wants to be a mother. A true woman with a disturbing talent with an ax. All hang on courage of a hero who'd rather be in Chicago.

*Interfaces in Language 2* David Hornsby,John Partridge,2011-09-22 This volume presents a collection of papers from the second Interfaces in Language conference, hosted from 5–7 May 2009 at the University of Kent at Canterbury by the University’s Centre for Language and Linguistic Studies (CLLS). Borne of a dissatisfaction with the rigid division of linguistics into sub-disciplines, Interfaces 2 offered specialists a platform to explore links between different approaches, and attracted participation from ten countries on four continents, addressing a wide range of themes. Contributions are arranged under three thematic headings: Categories and Orthodoxies; Contact, Conflict and Repertoire; and Language and Cognition. All, in their different ways, offer a challenge to received thinking or the rigidity of established categories. The papers explore a range of linguistic interfaces, probing the frontiers at the structural level between semantics and pragmatics, or challenging the notion of a clear division between semantics and syntax. A number of papers examine, in different ways, the interface between speech and writing, while other contributors apply the techniques of linguistic analysis to the study of translation, or to the stylistics of literature or journalism. The rejection of rigid modes of thinking has produced, in Interfaces in Language 2, an eclectic collection of thought-provoking papers of rare originality and quality.

*Information Infrastructure Systems for Manufacturing II* John J. Mills,Fumihiko Kimura,2013-03-09 In this global society, manufacturers compete in many ways, and information infrastructures play a critical role in ensuring the right information is available at the right time and the right place to support informed decision making. The traditional approach that assumes all information can be located on a single mainframe and accessed by everybody in the enterprise has fallen by the wayside, and new infrastructures supporting extended or virtual enterprises and globally distributed supply chains are becoming increasingly vital to successful, competitive organizations. Functions, data, and information must be made be available to all without regard to location, accessibility, or the ability to view in a native format. This book is a result of a conference, which brought together a number of leading experts from around the world that work on topics related to the design, implementation, and use of information infrastructures for manufacturing. These experts presented their views on the state of the art, and on a wide variety of topics related to the title. The topics range from the establishment of a generic enterprise framework, which can be used for the design of a supporting information infrastructure to details of how geometric surfaces should be merged together. Although not an exhaustive publication, we believe that the publications in this book represent the state of the art in this research is essential reading for anyone who is attempting the design or development of an information infrastructure for all aspects of Manufacturing.
