Ethnic and Vernacular Music, 1898-1960 Paul Vernon,1995-12-11 Detailed information on almost all ethnic and vernacular recordings from many countries on 78rpm is provided in this seminal work. The current state of discographical research in this wide and varied field is such that a research tool of this nature is badly needed. Jesse Walter Fewkes and Mary Hemenway recorded Native American music as early as 1890; Bela Bartok recorded rural music in the Balkans; Erich von Hornbostel, the grand old man of ethnomusicology in Europe, recorded in Southeast Asia. More than just a discography, this work demonstrates that cultures around the world and over time have more similarities than differences. A necessity for scholars, students, archivists, and individual record collectors and dealers. The goals of this volume are many and varied: to promote thought and discussion toward a concise definition of recorded ethnic music; to assist specialists working on individual discographical projects; to introduce users to the interconnectedness of cultures through regional music; to gather heretofore disparate pieces of information under one cover in a way that for the first time allows specialists to accurately identify all manner of recordings in many languages. The four sections of the volume work together for easy usage through cross referencing. The philosophy behind the volume was expressed by Rodney Gallop when he remarked that music, for him, was often the key to the understanding of other cultures.

Vietnam Studies - RIVERINE OPERATIONS 1966-1969 [Illustrated Edition] Major General William B. Fulton,2014-08-15 [Includes 2 charts, 6 diagrams, 16 maps, and 21 illustrations] “This monograph describes U.S. Army Riverine planning and operations in the Republic of Vietnam during the years 1966 through 1969. Since the personal experience of the author was with preparations for riverine operations and the initial operations themselves, emphasis has been placed on these activities through early 1968. In summarizing operations conducted in the balance of the three-year period, particular attention has been called to significant trends or changes in riverine operations in Vietnam, a co-operative enterprise of the U.S. Army and the U.S. Navy. “Looking back from the vantage point of early 1972, this study attempts to reconstruct the events and describe the situation as it was from 1966 through 1969, using official records, reports, and personal interviews.” The Author - “Major General William Fulton, was intimately involved in the early development of the riverine warfare concept as commander of the 2d Brigade, 9th Infantry Division, which arrived in Vietnam in January 1967 and immediately began combat operations in the Mekong Delta. In March the brigade moved into Dong Tam, the base created by dredging sand from the bottom of an arm of the Mekong River. In early June the brigade teamed with Navy Task Force 117 to form the Mobile Riverine Force. During World War II General Fulton fought in Italy and during the Korean War served on the staff of Army Forces Far East Advance.”

Prescription and over-the-counter drugs help millions of people with devastating diseases and chronic conditions. Pharmacist Suzy Cohen calls these medications drug muggers, and she says it's essential to replenish what a drug mugger steals from your body in order to feel

- How to relieve uncomfortable or potentially serious side effects
- How to remain compliant with your medication and still feel well

Basho Bashō Matsuo, 2008 Matsuo Basho stands today as Japan's most renowned writer, and one of the most revered. Yet despite his stature, Basho's complete haiku have never been collected under one cover. Until now. To render the writer's full body of work in English, Jane Reichhold, an American haiku poet and translator, dedicated over ten years to the present compilation. In *Barbo: The Complete Haiku* she accomplishes the feat with distinction. Dividing the poet's creative output into seven periods of development, Reichhold frames each period with a decisive biographical sketch of the poet's travels, creative influences, and personal triumphs and defeats. Supplementary material includes two hundred pages of scrupulously researched notes, which also contain a literal translation of the poem, the original Japanese, and a Romanized reading. A glossary, chronology, index of first lines, and explanation of Basho's haiku techniques provide additional background information. Finally in the spirit of Basho, elegant semi-e ink drawings by well-known Japanese artist Shiro Tsujimura front each chapter.

Multithreaded Computer Architecture: A Summary of the State of the ART Robert A. Iannucci, Guang R. Gao, Robert H. Halstead Jr., Burton Smith, 2012-12-06 Multithreaded computer architecture has emerged as one of the most promising and exciting avenues for the exploitation of parallelism. This new field represents the confluence of several independent research directions which have united over a common set of issues and techniques. Multithreading draws on recent advances in dataflow, RISC, compiling for fine-grained parallel execution, and dynamic resource management. It offers the hope of dramatic performance increases through parallel execution for a broad spectrum of significant applications based on extensions to 'traditional' approaches. Multithreaded Computer Architecture is divided into four parts, reflecting four major perspectives on the topic. Part I provides the reader with basic background information, definitions, and surveys of work which have in one way or another been pivotal in defining and shaping multithreading as an architectural discipline. Part II examines key elements of multithreading, highlighting the fundamental nature of latency and synchronization. This section presents clever techniques for hiding latency and supporting large synchronization name spaces. Part III looks at three major multithreaded systems, considering issues of machine organization and compilation strategy. Part IV concludes the volume with an analysis of multithreaded architectures, showcasing methodologies and actual measurements. *Multithreaded Computer Architecture: A Summary of the State of the Art* is an excellent reference source and may be used as a text for advanced courses on the subject.

Stress R Us Greeley Miklashek, 2018-04-20 This book is a compilation of what a neuropsychiatrist learned about the causes and cures of human diseases in his 41 year medical practice. I treated 25,000 of my fellows and wrote 1,000,000 Rx in the process. The book is divided into 51 Topics (chapters) and contains over 100 references. It serves as an historical review of the field of stress research as well as animal crowding research, as the two morphed together in my theory of population density stress. Human overpopulation is a fact, as we have far exceeded the earth's carrying capacity for our species and mother nature is attempting to cull our numbers through our multitude of diseases of civilization. Our hunter-gatherer contemporaries, living in their traditional manner in their clan social groups widely distributed in their ecosystem, have none of our diseases. As our extreme gene based altruism has brought us tremendous compassion and technological advances in caring for the diseases of our fellows, it has also brought us tremendous overpopulation and brought us near to ecological collapse. We must face our need to restrict our reproduction or mother nature will do it for us. A case in point: infertility in America has increased 100% in just 34 years, from 1982 to 2016. During the same period, our sperm counts have fallen 60%. No-one is willing to look at the obvious cause: neuro-endocrine inhibition of human reproduction resulting from population density stress. If any of this touches a nerve, please find the time in your busy, stressful day to stop for an hour and read this ground-breaking book. You may never have heard any of this information from any of your healthcare providers or the mass media. Big Pharma rules the minds of your healthcare providers and the mass media. At the end of my career as a practicing psychiatrist, I had become little more than a prescription writing machine and was actually instructed to stop wasting time talking to your patients and just write their prescriptions. So, I retired and spent the next 5 years writing this book. I hope you find it as illuminating as I did doing the research on our epidemic of stress diseases. No wonder that we are ever more anxious and depressed, in spite of taking our 4,300,000,000 Rx every year! The real cure for our diseases of civilization must be a worldwide reduction in family size and a concerted effort to increase the opportunities for women to access education and work, as well as birth control. The alternative is increasing human disease and infertility from population density stress. Please read this book and tell me if you don't agree with my surprising conclusions. Good luck and God bless us one and all!
