World poverty Townsend, Peter,Gordon, David,2002-09-25 World poverty is an important book offering fresh insights into how to tackle poverty worldwide. With contributions from leading scholars in the field both internationally and in the UK, the book asks whether existing international and national policies are likely to succeed in reducing poverty across the world. It concludes that they are not and that a radically different international strategy is needed. This book is a companion volume to Breadline Europe: The measurement of poverty (The Policy Press, 2001). The focus of World poverty is on anti-poverty policies rather than the scale, causes and measurement of poverty. A wide range of countries is discussed including countries such as China and India, which have rarely been covered elsewhere. The interests of the industrialised and developing world are given equal attention and are analysed together. Policies intended to operate at different levels - international, regional, national and sub-national - ranging from the policies of international agencies like the UN and the World Bank through to national governments, groups of governments and local and city authorities - are examined. Key aspects of social policy, like 'targeting' and means-testing, de-regulation and privatisation, are considered in detail. World poverty will become a definitive point of reference for anyone working, studying or researching in the poverty field. Studies in poverty, inequality and social exclusion series Series Editor: David Gordon, Director, Townsend Centre for International Poverty Research. Poverty, inequality and social exclusion remain the most fundamental problems that humanity faces in the 21st century. This exciting series, published in association with the Townsend Centre for International Poverty Research at the University of Bristol, aims to make cutting-edge poverty related research more widely available. RuPedagogies of Realness Lindsay Bryde,Tommy Mayberry,2022-02-01 Pencils down--graphite and eyebrow--and eyes to front of the room for this one-of-a-kind lesson. Since debuting over a decade ago, the world of RuPaul's Drag Race has steadily collected both popular and academic interests. This collection of original essays presents insightful analyses and a range of critical perspectives on Drag Race from across the globe. Topics covered include language and linguistics, cultural appropriation, racism, health, wealth, the realities of reality television, digital drag and naked bodies. Though varied in topical focus, each essay centers public pedagogy to examine what and how Drag Race teaches its audience. The goal of this book is to frame Drag Race as a classroom, one that is helpful for both teachers and students alike. With an academic-yet-accessible tone and an interdisciplinary approach, essays celebrate and examine the show and its spin-offs from the earliest seasons to the very start of the coronavirus pandemic in 2020.

Uniting a Divided City Jo Beall,Owen Crankshaw,Susan Parnell,2014-10-14 For many, Johannesburg resembles the imagined spectre of the urban future. Global anxieties about catastrophic urban explosion, social fracture, environmental degradation, escalating crime and violence, and rampant consumerism alongside grinding poverty, are projected onto this city as a microcosm of things to come. Decision-makers in cities worldwide have attempted to balance harsh fiscal and administrative realities with growing demands for political, economic and social justice. This book investigates pragmatic approaches to urban economic development, service delivery, spatial restructuring, environmental sustainability and institutional reform in Johannesburg. It explores the conditions and processes that are determining the city's transformation into a cosmopolitan metropole and magnet for the continent.

Race, Racial Attitudes and Stratification Beliefs Matthew O. Hunt,George Wilson,2011-05-20 Barack Obama's election as the forty-fourth president of the United States reinvigorated discussions of race, ideology and inequality in America. This debate occurs in an era when scholarly attention on the intersections in these key areas has been growing in tandem with the expanding racial and ethnic diversity of American society. To broaden our understanding of these complex convergences, this volume of the ANNALS continues the discussion by showcasing a set of cutting-edge papers by leading scholars of race and inequality, with special focus on racial attitudes and stratification beliefs research. Utilizing a mix of methodological and theoretical approaches, the contributors highlight four primary themes: (1) intersections of race, inequality, and ideology in specific institutional domains (e.g., crime, religion, work, immigration/national inclusion); (2) the meaning, measurement, and implications of racial resentment; (3) the role of social context and stereotypes in shaping racial (and non-racial) policy support; and (4) the operation of racial prejudice and stratification ideology in the context of Obama's presidency. This volume will appeal to a multidisciplinary scholarly audience, including policy-makers interested in current public opinion regarding the American occupational structure and its associated inequalities.
