Enhancing Instructional Problem Solving John C. Begeny, Ann C. Schulte, Kent Johnson, 2012-05-09 This book presents a schoolwide model of instructional support designed to make the most of available time, resources, and personnel—one that is also fully compatible with other problem-solving models, such as response to intervention. The authors provide a comprehensive and cohesive framework for linking assessment and intervention. They show how to interweave evidence-based instruction with targeted professional development and other components that support improved learning outcomes for all K–8 students. Helpful tables describe dozens of research-based assessments and interventions in reading, writing, and math. In a large-size format with lay-flat binding to facilitate photocopying, the volume includes more than 20 reproducible worksheets and forms. The companion website features additional reproducibles and supplemental materials for use in conjunction with the book. This book is in The Guilford Practical Intervention in the Schools Series.

Stomp Rockets, Catapults, and Kaleidoscopes Curt Gabrielson, 2008-02-01 Kids will learn how things they encounter every day operate by building their own

models with this hands-on activity book. Projects include building a working model of the human hand's muscles, bones, and tendons using drinking straws, tape, and string; using a pair of two-liter bottles and a length of rubber tubing to learn how a toilet flushes; and discovering how musical instruments make sounds by fashioning a harmonica, saxophone, drum, flute, or oboe. All devices are designed to use recycled or nearly free materials and common tools. Kids are encouraged to modify and improve the designs, or create an entirely new device using the concepts explored. Each project includes materials and tools lists, step-by-step instructions with photographs, a summary of the science concept demonstrated, and follow-up questions to gauge student understanding for use in the classroom.

American Passenger Trains and Locomotives Illustrated Mark

Wegman, 2008-11-15 The period from the 1890s to the mid-1950s is generally considered the "golden era" of passenger rail travel in America. It was a time of celebrated locomotives and luxurious passenger service, a time when rail technology saw its greatest advances and railroads became the nation's favored mode of transportation. These glory years come alive in *American Passenger Trains and Locomotives Illustrated, 1889-1971*. For this volume, author and illustrator Mark Wegman has researched original railroad drawings and in some cases even paint chips to render more than 160 profiles, front and top views, and interior layouts depicting the steam, diesel, and electric locomotives, along with passenger cars, of three dozen of the nation's most

celebrated trains of the golden age. Accompanying the author's drawings are histories of each train, period photographs, postcards, menus, luggage stickers, vintage print ads, and detailed captions. The book is a lavishly appointed journey back in time to the bygone heyday of passenger-train travel.
