Their unique defense mechanisms, predatory tactics, reproductive strategies and ecological adaptations are displayed by a wide range of terrestrial, burrowing and arboreal species. These arachnids are familiar to the general public thanks to horror movies and a growing interest in tarantulas as pets; however, scientific information on the group is scattered throughout the literature and not easily available. This book reviews all major aspects of New World Theraphosid tarantulas and provides in-depth information on their evolution, taxonomy, behavior, physiology, ecology, reproduction, conservation and biogeography. Clearly, this encounter is mean-to-be. Problem: Mr. Wang's aidbot is 200 grams overweight and isn't allowed on any aircraft. **Dawn of the New Everything** Jaron Lanier, 2017-11-21 The guru of virtual reality looks back at the unique experiences that formed his vision for the future of technology With a singular voice and perspective, Lanier who The New York Times calls daringly original . . . a major wizard in the futurist circus. He is the father of virtual reality in the gaudy, reputation-burnishing way that Michael Jackson was the king of pop considers the future of virtual technology in a book that blends memoir with ideas. He tells the wild story of his own relationship with technology by starting from the beginning. The son of Jewish immigrants and concentration camp survivors, raised in the UFO territory of New Mexico, he lost his mother at a young age and built a geodesic dome with his father in the desert. He worked as a goatherd and midwife, attended college before graduating high school, transferred to and failed out of a tony northeast liberal arts college, played music for money on the streets of New York, and eventually landed in Silicon Valley at the dawn of the first tech boom where he suddenly became rich. This crazy course to becoming a world renowned technology guru informs Lanier's optimism about virtual reality--the technology he has been immersed in from its very start. While he has been very critical of social media and other manifestations of technology, he believes that virtual reality can actually make our lives richer and fuller. Dawn of the New Everything is ultimately a look at what it means to be human in the dawn of unprecedented technological possibility.
