*Acquired Tastes* Brenda L. Beagan,Gwen E. Chapman,Josée Johnston,Deborah McPhail,Elaine M. Power,Helen Vallianatos,2014-11-15 Magazine articles and self-improvement books tell us that our food choices serve as bold statements about who we are as individuals. *Acquired Tastes* reveals that they say more about where we come from and who we would like to be. Interviews with Canadian families in both rural and urban settings reveal that age, gender, social class, ethnicity, health concerns, food availability, and political and moral concerns shape the meanings that families attach to food. They also influence how parents and teens respond to discourses on health, beauty, and the environment, a finding with profound implications for public health campaigns.

*Salt Taste, Nutrition, and Health* Albertino Bigiani,2021-01-20 Salt (NaCl) is a key component of the human diet because it provides the

sodium ion (Na<sup>+</sup>), an essential mineral for our body. Na<sup>+</sup> regulates extracellular fluid volume and plays a key role in many physiological processes, such as the generation of nerve impulses. Na<sup>+</sup> is lost continuously through the kidneys, intestine, and sweating. Thus, to maintain proper bodily balance, losses have to be balanced with foods containing this cation. The need for salt explains our ability to detect Na<sup>+</sup> in foodstuffs: Na<sup>+</sup> elicits a specific taste sensation called “salty”, and gustatory sensitivity to this cation is crucial for regulating its intake. Indeed, the widespread use of salt in food products for flavoring and to improve their palatability exploits our sense of taste for Na<sup>+</sup>. When consumed in excess, however, salt might be detrimental to health because it may determine an increase in blood pressure—a major risk factor for many cardiovascular diseases. Understanding how salt taste works and how it affects food preference and consumption is therefore of paramount importance for improving human nutrition. This book comprises cutting-edge research dealing with salt taste mechanisms relevant for nutrition and health.

**Acquired Tastes** Benjamin R. Cohen,Michael S. Kideckel,Anna Zeide,2021-08-17 How modern food helped make modern society between 1870 and 1930: stories of power and food, from bananas and beer to bread and fake meat. The modern way of eating—our taste for food that is processed, packaged, and advertised—has its roots as far back as the 1870s. Many food writers trace our eating habits to World War II, but this book shows that our current food system began to coalesce much earlier. Modern food came from and helped to create a

society based on racial hierarchies, colonization, and global integration. *Acquired Tastes* explores these themes through a series of moments in food history—stories of bread, beer, sugar, canned food, cereal, bananas, and more—that shaped how we think about food today. Contributors consider the displacement of native peoples for agricultural development; the invention of Pilsner, the first international beer style; the “long con” of gilded sugar and corn syrup; Josephine Baker’s banana skirt and the rise of celebrity tastemakers; and faith in institutions and experts who produced, among other things, food rankings and fake meat.

is an American TV serial launched by Netflix with multiple main characters, one of them being Eleven. At approximately 12 years old, Eleven was taken away from her mother as a young child and was raised in a laboratory, where multiple experiments and tests were carried out on her. These tests pressured Eleven psychokinetic abilities to develop, making her a human that was out of this world. Due to her background, Eleven has always appeared as a mysterious and extraordinary girl. If one truly assesses her character, Eleven is fun-loving, brave and loyal, and greatly values her friends. Although she may have difficulties in forming relationships with her adopted father, Jim, and knowing how to interact with others due to the number of years she was shut off from society, her friends Mike, Dustin, Lucas, and Will are always there to help her out. At the end of the day, Eleven is a hero who always saves the day and is generally seen as the Chosen One by most people. Having innate psychokinetic abilities while being humble, fair and just at the same time is what makes Eleven a lovable and popular character amongst most Stranger Things fans. And this is exactly why you'll adore our recipes in this cookbook as well. The 30 recipes in 'Excited taste buds with Eleven of Stranger Things' are unique, out of the world and one of a kind, just like Eleven. Although most of the food on Stranger Things were snacks due to the show having a majority of children cast, the importance of food is still present. From the pancakes that were originally seen being eaten by Mike, to the burger Eleven was offered by a kind restaurant owner, food was depicted as a way of expressing your love and concern in the show. Whipping up a few tasty dishes using the recipes in this cookbook can be an excellent way of showing your friends, family, and loved ones that you care about them. Our carefully curated recipes are sure to be adored by

everyone, and suit everyone's taste palette. By using the recipes from *Excited taste buds with Eleven of Stranger Things*, you'll be able to wow your family and guests and leave them wanting for more.

*An Archive of Taste* Lauren F. Klein, 2020-05-12 A

groundbreaking synthesis of food studies, archival theory, and early American literature There is no eating in the archive. This is not only a practical admonition to any would-be researcher but also a methodological challenge, in that there is no eating—or, at least, no food—preserved among the printed records of the early United States. Synthesizing a range of textual artifacts with accounts (both real and imagined) of foods harvested, dishes prepared, and meals consumed, *An Archive of Taste* reveals how a focus on eating allows us to rethink the nature and significance of aesthetics in early America, as well as of its archive. Lauren F. Klein considers eating and early American aesthetics together, reframing the philosophical work of food and its meaning for the people who prepare, serve, and consume it. She tells the story of how eating emerged as an aesthetic activity over the course of the eighteenth century and how it subsequently transformed into a means of expressing both allegiance and resistance to the dominant Enlightenment worldview. Klein offers richly layered accounts of the enslaved men and women who cooked the meals of the nation's founders and, in doing so, directly affected the development of our national culture—from Thomas Jefferson's emancipation agreement with his enslaved chef to Malinda Russell's *Domestic Cookbook*, the first African American-authored culinary text. The first book to examine the gustatory origins of aesthetic taste in early American literature, *An Archive of Taste* shows how thinking about eating can help to tell new stories about the range of people who worked to establish a cultural foundation for the United

States.

Tap, Taste, Heal Marcella Friel, 2019-04-16 A trained chef and body image coach reveals how EFT Tapping can help you get off the diet roller coaster, cultivate self-love, and heal your relationship with food. For many who struggle with food, mindful eating alone is not the answer. In *Tap, Taste, Heal*, natural foods chef and mindful eating mentor Marcella Friel teaches you the neurological repatterning tool of Tapping (also known as Emotional Freedom Techniques or EFT) to help you resolve the traumas that have caused you to reach for those foods you hate to love to eat. Sometimes called “emotional acupressure”, Tapping is an energy-healing based practice which uses gentle self-tapping on points of the body and affirmation-like statements to short-circuit harmful patterns and imprinting. To help you along your journey, *Tap, Taste, Heal* offers written tapping “scripts,” links to online Tapping script audios, and links to online Tapping video demonstrations as well as cooking demonstrations for key healing foods. Let Friel’s step-by-step guide take you deeper than weight loss—and help you accept, honor, and nourish your entire being, whatever the number on the scale.

Bitter Tastes Donna M. Campbell, 2016 Challenging the conventional understandings of literary naturalism defined primarily through its male writers, Donna M. Campbell examines the ways in which American women writers wrote naturalistic fiction and redefined its principles for their own purposes. *Bitter Tastes* looks at examples from Edith Wharton, Kate Chopin, Willa Cather, Ellen Glasgow, and others and positions their work within the naturalistic canon that arose near the turn of the twentieth century. Campbell further places these women writers in a broader context by tracing their relationship to early film, which, like naturalism, claimed the

ability to represent elemental social truths through a documentary method. Women had a significant presence in early film and constituted 40 percent of scenario writers--in many cases they also served as directors and producers. Campbell explores the features of naturalism that assumed special prominence in women's writing and early film and how the work of these early naturalists diverged from that of their male counterparts in important ways.

**A Taste for Poison** Neil Bradbury, Ph.D.,2022-02-01 “A fascinating tale of poisons and poisonous deeds which both educates and entertains.” --Kathy Reichs A brilliant blend of science and crime, **A TASTE FOR POISON** reveals how eleven notorious poisons affect the body--through the murders in which they were used. As any reader of murder mysteries can tell you, poison is one of the most enduring—and popular—weapons of choice for a scheming murderer. It can be slipped into a drink, smeared onto the tip of an arrow or the handle of a door, even filtered through the air we breathe. But how exactly do these poisons work to break our bodies down, and what can we learn from the damage they inflict? In a fascinating blend of popular science, medical history, and true crime, Dr. Neil Bradbury explores this most morbidly captivating method of murder from a cellular level. Alongside real-life accounts of murderers and their crimes—some notorious, some forgotten, some still unsolved—are the equally compelling stories of the poisons involved: eleven molecules of death that work their way through the human body and, paradoxically, illuminate the way in which our bodies function. Drawn from historical records and current news headlines, **A Taste for Poison** weaves together the tales of spurned lovers, shady scientists, medical professionals and political assassins to show how the precise systems of the body can be impaired to lethal effect through

the use of poison. From the deadly origins of the gin & tonic cocktail to the arsenic-laced wallpaper in Napoleon's bedroom, *A Taste for Poison* leads readers on a riveting tour of the intricate, complex systems that keep us alive—or don't.

**Taste Makers: Seven Immigrant Women Who Revolutionized Food in America** Mayukh Sen, 2021-11-16 A New York Times Editors' Choice pick Named a Best Book of the Year by NPR, Los Angeles Times, Vogue, Wall Street Journal, Food Network, KCRW, WBUR Here & Now, Emma Straub, and Globe and Mail One of the Millions's Most Anticipated Books of 2021 America's modern culinary history told through the lives of seven pathbreaking chefs and food writers. Who's really behind America's appetite for foods from around the globe? This group biography from an electric new voice in food writing honors seven extraordinary women, all immigrants, who left an indelible mark on the way Americans eat today. *Taste Makers* stretches from World War II to the present, with absorbing and deeply researched portraits of figures including Mexican-born Elena Zelayeta, a blind chef; Marcella Hazan, the deity of Italian cuisine; and Norma Shirley, a champion of Jamaican dishes. In imaginative, lively prose, Mayukh Sen—a queer, brown child of immigrants—reconstructs the lives of these women in vivid and empathetic detail, daring to ask why some were famous in their own time, but not in ours, and why others shine brightly even today. Weaving together histories of food, immigration, and gender, *Taste Makers* will challenge the way readers look at what's on their plate—and the women whose labor, overlooked for so long, makes those meals possible.

Barbarossa,2020-06-25 The sensation of flavor reflects the complex integration of aroma, taste, texture, and chemesthetic (oral and nasal irritation cues) from a food or food component. Flavor is a major determinant of food palatability—the extent to which a food is accepted or rejected—and can profoundly influence diet selection, nutrition, and health. Despite recent progress, gaps in knowledge still remain regarding how taste and flavor cues are detected at the periphery, conveyed by the brainstem to higher cortical levels, and then interpreted as a conscious sensation. Taste signals are also projected to central feeding centers where they can regulate hunger and fullness. Individual differences in sensory perceptions are also well known and can arise from genetic variation, environmental causes, or a variety of metabolic diseases, such as obesity, metabolic syndrome, and cancer. Genetic taste/smell variation could predispose individuals to these same diseases. Recent findings have opened new avenues of inquiry, suggesting that fatty acids and carbohydrates may provide nutrient-specific signals informing the gut and brain of the nature of the ingested nutrients. This Special Issue, Taste, Nutrition, and Health, presents original research communications and comprehensive reviews on topics of broad interest to researchers and educators in sensory science, nutrition, physiology, public health, and health care.

**Navigating Smell and Taste Disorders** Marjorie Calvert,Dr. Ronald DeVere, MD,2010-08-03 Demos Health and the American Academy of Neurology Present a New Book for Patients with Smell and Taste Disorders Over 200,000 people visit doctors each year for smell and taste problems. Since our ability to smell and taste decreases with age, up to 14 million Americans aged 55 and older may live with these disorders, undiagnosed. Smell and taste disorders affect a person's

ability to enjoy food and drink and may result in decreased appetite, weight loss, and too much added sugar and salt in the diet. In severe cases they may lead to depression. Smell and taste problems can also interfere with personal safety, limiting the ability to notice smoke and potentially harmful chemicals and gases. *Navigating Smell and Taste Disorders* is a unique collaboration between a doctor and a food consultant that both addresses the subject of smell and taste loss and provides food preparation tips and a special recipe section that will appeal to other senses and make food attractive again. This is a must-have reference book for all those living with smell and taste disorders. The book covers the whole disorder including How smell and taste work Causes of smell and taste problems Treatments What you can expect when you visit a specialist Recipes that will appeal to other senses and make food attractive again First-person accounts of coping with this disorder *Navigating Smell and Taste Disorders* is the inaugural book in the series *Neurology Now Books* from the American Academy of Neurology. Inspired by *Neurology Now*, the AAN's leading neurologic patient information magazine, *Neurology Now Books* are written from a multidisciplinary approach, combining the expertise of a neurologist with other related experts and patients and caregivers. Each volume will provide the reader with the most up-to-date information, answers to questions and concerns, and first-person accounts of others who are living with a neurologic disorder.
