Using a Company to Save Tax Nick Braun, 2014-07-14 Using a company could easily save you over 10,000 in tax every year...possibly over 40,000. Why? Firstly, UK corporation tax rates are much lower than income tax rates. Secondly, company owners can pay themselves dividends, which are taxed much less heavily than other forms of income. They can also split their income with their spouse or partner which often produces a lower tax bill. Finally, as a company owner, you have complete control over how much income you withdraw in total. This gives you significant control over your personal tax bill, allowing you to avoid the extortionate tax rates that kick in when income exceeds 41,865, 50,000, 100,000 or 150,000. Sole traders cannot control their income tax bills in this way. This plain English tax guide tells you everything you need to know about the tax benefits of running your business through a company and contains numerous examples and tax-planning tips.

Encouraging Savings Through Tax-preferred Accounts Organisation for Economic Co-operation and Development, 2007 To boost their domestic saving rate, many OECD countries have introduced savings accounts that offer tax advantages, called tax-preferred saving accounts. This report describes and analyses various tax-preferred savings accounts, excluding pension-related accounts, in a cross-section of 11 OECD countries. Based on a comparison of results, the report then answers the following questions: (1) which income groups benefit the most from these accounts; (2) to what extent do these accounts generate additional savings; and (3) how much tax revenue is foregone due to these accounts.
