Safari 101 Hunting Africa: the Ultimate Adventure David L. Brown, 2012-04-01 Mbogo, the Black Death, which manifests itself in the African Cape buffalo, now stood less than 12 feet away from me. The cow and calf were too close for me to have time to be scared. I would only have time to react on instinct if they came closer. That is the type of excitement that every hunter dreams of and it is still possible in Africa today. It is also one that I was fortunate enough to experience without any permanent ill effects. Eighty percent or more of American hunters think that Africa is too expensive or off-limits and that they will never have a chance to experience their own, up-close-and-personal adventure in the African bushveld. Safari 101 proves just the opposite. Safari 101 is written for the hunter that has always considered Africa out of reach, someone who has a spark of desire just waiting to be fanned into a flame. American hunters spend thousands of dollars every year hunting at home. Almost none of them know that, for the price of a guided elk hunt in the western United States, they can take an African Safari. The myths of being too expensive and too difficult are firmly entrenched in many hunters minds. Safari 101 has forty-six hints dispersed throughout 11 chapters and proves these myths false. Personal experiences are used to illustrate the value of each hint and to make each one easy to remember. Safari 101 takes the author's experiences, and what he learned from professional hunters and outfitters, and puts the information in a logical progression that is entertaining as well as informative. Safari 101 will help fan the spark into a flame.

A Task Model-based Approach for Design and Evaluation of Innovative User Interfaces Carmen Santoro, 2005 Nowadays, the advent of the wireless Internet and the rapid expanding of novel technologies on the mass market have represented a tremendous stimulus for pushing the development of interactive systems able to encompass support for a larger and larger variety of users, tasks, devices and contexts. In this thesis we present the benefits of using task models in the various steps of the lifecycle of an interactive application. Indeed, we show how they can play an important role in the requirements elicitation phase for example, by requiring precise definition of temporal relationships between the different activities that should be performed, so avoiding any ambiguities. Furthermore, we describe how task models may be exploited in software development beyond early analysis as they can provide valuable information for the design of interactive applications through a number of criteria specifying how to use the data contained in

task models to drive the design of the user interface. Additionally, we analyse how they can be used for verification purposes, in order to check some properties of the modelled system (in combination with other models), so improving the level of confidence towards the system, which can be relevant especially in safety-critical contexts. Lastly, we show the benefits that can be gained from using task models in the usability evaluation phase, through a systematic analysis of the impact that the deviations from an expected task plan could have on the quality of the overall system.

The Making of Taxi Driver Geoffrey Macnab,2005-01-01 In Travis Bickle (Robert De Niro), the Vietnam vet turned New York taxi driver, Scorsese created a character who summed up perfectly the seething discontents of an American still traumatised by Vietnam and Watergate. In the context of director Martin Scorsese's many influences that led to Taxi Driver, from Dostoevsky novels to John Ford westerns and film noir thrillers, and the film's subsequent impact on the work of countless later directors, The Making Of Taxi Driver explores how this modern classic came together. And, looking at some of the myths surrounding the movie, asks why, 30 years on it still has such resonance with contemporary audiences.

Equal Is Unfair Don Watkins,Yaron Brook,2016-03-29 We’ve all heard that the American Dream is vanishing, and that the cause is rising income inequality. The rich are getting richer by rigging the system in their favor, leaving the rest of us to struggle just to keep our heads above water. To save the American Dream, we’re told that we need to fight inequality through tax hikes, wealth redistribution schemes, and a far higher minimum wage. But what if that narrative is wrong? What if the real threat to the American Dream isn’t rising income inequality—but an all-out war on success? In *Equal is Unfair*, a timely and thought-provoking work, Don Watkins and Yaron Brook reveal that almost everything we’ve been taught about inequality is wrong. You’ll discover: • why successful CEOs make so much money—and deserve to • how the minimum wage hurts the very people it claims to help • why middle-class stagnation is a myth • how the little-known history of Sweden reveals the dangers of forced equality • the disturbing philosophy behind Obama’s economic agenda. The critics of inequality are right about one thing: the American Dream is under attack. But instead of fighting to make America a place where anyone can achieve success, they are fighting to tear down those who already have. The real key to making America a freer,

fairer, more prosperous nation is to protect and celebrate the pursuit of success—not pull down the high fliers in the name of equality.

Taxis and private hire vehicles Great Britain: Parliament: House of Commons: Transport Committee,2011-07-19 Rules governing taxis and private hire vehicles need urgent and wholesale reform. The problems posed by taxis and private hire vehicles (PHVs) operating outside of the district in which they are licensed - the phenomenon called 'cross-border hire' - cannot be solved without new legislation. In this report the Transport Committee puts forward its recommendations for such new legislation: listen to the views of users; keep it simple; keep it local: licensing should remain a local function; permit tighter restrictions on cross border hire; increase the potential for local authorities to work together to create larger licensing districts; and develop
