Young Children's Play Jeffrey Trawick-Smith,2019-08-16 Young Children's Play: Development, Disabilities, and Diversity is an accessible, comprehensive introduction to play and development from birth to age 8 years that introduces readers to various play types and strategies and helps them determine when intervention might be needed. Skillfully addressing both typically developing children and those with special needs in a single volume, this book covers dramatic play, blocks, games, motor play, artistic play, and non-traditional play forms, such as humor, rough and tumble play, and more. Designed to support contemporary classrooms, this text deliberately interweaves practical strategies for understanding and supporting the play of children with specific disabilities (e.g. autism, Down syndrome, or physically challenging conditions) and those of diverse cultural backgrounds into every chapter. In sections divided by age group, Trawick-Smith explores strategies for engaging children with specific special needs, multicultural backgrounds, and incorporating adult-child play and play intervention. Emphasizing diversity in play behaviors, each chapter includes vignettes featuring children's play and teacher interactions in classrooms to illustrate core concepts in action. Filled with research-based applications for professional practice, this text is an essential resource for students of early childhood and special education, as well as teachers and coaches supporting early grades or inclusive classrooms.

The Future of Schools and Teacher Education Eduardo Andere,2020-04-01 In 100 years as a nation-state, Finland has become the world's benchmark for quality in school education. Despite the fact that Finland is consistently top ranked by international performance measures, the country continues to rapidly change their curriculum and educational policies. This book documents these main curricula changes, telling the story of the future of school education in Finland as it begins to develop in 2016, 2017, and 2018 onwards. Drawing from 14 original case studies, the book presents the stories of 14 principals and 29 teachers with a systematic and methodological uniformity. Intertwining the Finnish example with a greater narrative about how universities are changing their teacher education to face the complex challenges of education in the 21st century, this book documents cutting-edge advancement in the field of international school education.

Helping Children Cope with Loss and Change Amanda Seyderhelm,2019-08-19 Whether it's the grief of bereavement, the strain of divorce or the uncertainty of a new home or school, loss and change affect children in countless ways. Nevertheless, teachers and parents frequently find themselves ill-equipped to help children struggling with the difficult feelings that these situations, and others like them, bring. Helping Children Cope with Loss and Change offers guided support for teachers, health professionals and parents. Designed for use with children aged 4-10, this guide offers: Case studies illustrating various signs of grief and loss, to help the caregiver spot and manage a child's pain. Therapeutic stories designed to be read with the child, and with prompt questions to encourage discussion. Creative activities and exercises that can be developed into a therapeutic 'toolkit' to support the child and the caregiver themselves. With chapters that move from Loss and Change to Resolution and Resilience, addressing the needs of both the child and caregiver, Helping Children Cope with Loss and Change will be an invaluable therapeutic tool.

Using Nature's Shuttle Judith M. Heimann, 2023-11-20 'Using Nature's Shuttle' is a suspenseful, by turns comic or tragic, but always lively account of how young, idealistic scientists - often the first of their families to go to a university - engaged in basic research that led them to make history in the new fields of plant microbiology and molecular biology. The book passes on the true story of what young scientists in a public Belgian university learned about a million-year-old single cell soil bacterium. This bacterium was able to genetically modify certain plants to produce food that only that bacterium strain could eat. These scientists and their colleagues and rivals figured out how to use that knowledge to genetically modify a variety of plants to make them safer and healthier for man, beast, and the environment. Their genetic modifications made plants cheaper and easier for farmers to grow as well as capable of improving the health and welfare of people in the Third World. The author, Judith M. Heimann, a former diplomat and writer of three published non-fiction books and contributor to two TV documentaries based on them, tells this multi-sided story chiefly through the information she gathered by conducting intensive interviews of each of more than two dozen of the scientists involved. She sees this book as presenting the actual science, as opposed to the current rash of anti-science on this subject, and as encouraging a new generation of young people to opt for careers in STEM (Science Technology Engineering Mathematics subjects).

The Hearing Eye, 1946

A long-haul trucker drives an injured butterfly to its breeding ground in Florida, giving them both a much-needed migration. And while struggling with the death of her ex-husband, a single mother questions her place in her family's lives. A Certain Grace is richly told in spare prose and woven with vignettes of a much-loved grandfather's life.

A Girl Like Tilly Helen Bates, 2016-11-21 Tilly is a bit of a puzzle. She's struggling at school, she really doesn't like surprises, she isn't sure if she's a girl or a boy, and she just doesn't want to make new friends. Why is it such hard work to try and understand people, or for them to understand her? This poignant story maps the entire childhood of a bright young girl with autism. Growing up undiagnosed, she finds life increasingly difficult and confusing. Unable to communicate her thoughts and feelings, she retreats further into her own world while her family grows evermore perplexed and concerned. When a psychologist finally explains what makes her special, they can stop focusing on the problems and start to navigate a new way forward for Tilly. With vividly expressive illustrations and minimal words, this story is a valuable and accessible tool for helping children aged 7-13 and their families understand female autism, and will also be immensely helpful to readers interested in understanding better how autism manifests in girls. Honest, positive, and ultimately hopeful, it is inspired by the real childhood of Helen Bates's daughter Rachel, who also writes about her experiences on her blog www.agirlliketilly.com.
