Technological Adoption and Trends in Health Sciences Teaching, Learning, and Practice Marcos-Pablos, Samuel,Juanes-Méndez, Juan Antonio,2022-02-11 The use of technology in health sciences has a direct impact on health outcomes, as well as on the quality and the safety of healthcare processes. In addition, the use of new technological developments in medical education has proven to be greatly effective and creates realistic learning environments to experience procedures and devices that will become common in medical practice. However, bringing new technologies into the health sector is a complex task, which is why a comprehensive vision of the health sciences ecosystem (encompassing many different areas of research) is vital. Technological Adoption and Trends in Health Sciences Teaching, Learning, and Practice obtains an overview of the technological trends within the health sciences ecosystem, identifies the strengths and weaknesses of the research presented to date, and depicts possible future research directions within health science education and practice. Covering topics such as artificial intelligence and online laboratories, it is ideal for health sciences educators and practitioners, technological solution providers, health organizations, health and care workers, regulators, governing bodies, researchers, academicians, and students.

Animated Essential Atlas of Anatomy & Physiology Focus Medica,2014-05-15 An Exclusive e-Learning tool that provides engaging ways to learn, review and teach the human anatomical systems and their physiology. *Anatomy and Physiology* J. Gordon Betts,Peter DeSaix,Jody E. Johnson,Oksana Korol,Dean H. Kruse,Brandon Poe,James A. Wise,Mark Womble,Kelly A. Young,2013-04-25 Play and Participation in Contemporary Arts Practices Tim Stott,2015-03-24 This book engages debates in current art criticism concerning the turn toward participatory works of art. In particular, it analyzes ludic participation, in which play and games are used organizationally so that participants actively engage with or complete the work of art through their play. Here Stott explores the complex and systematic organization of works of ludic participation, showing how these correlate with social systems of communication, exhibition, and governance. At a time when the advocacy of play and participation has become widespread in our culture, he addresses the shortage of literature on the use of play and games in modern and contemporary arts practice in order to begin a play theory of organization and governance.

TeamLab Karin G. Oen,Clare Jacobson,Yuki Morishima,2020 The digital collective teamLab, founded in Tokyo in 2001 by Toshiyuki Inoko, breaks established boundaries between the gallery and art world. This group--comprised of more than four hundred people including programmers, designers, and animators--creates immersive digital experiences outside of the realm of the traditional art world, navigating the confluence of art, technology, design, and the natural world. In many cases, it roots its imagery in historical Japanese art but uses the visual language of high-tech rendering and animation. Over the past few years, teamLab's projects have kept pace with technology and have evolved from two-dimensional screen-based animations to room-sized interactive installations. This book is a collection of essays, interviews and photographs exploring both the presence of teamLab's installations and the ideas and processes behind them. With a focus on the development of their work rather than the actual public displays, this book takes readers behind-the-scenes of a fascinating and thoroughly modern take on art. See the teamLab exhibit--the inaugural display in the Asian Art Museum of San Francisco's new 9,500-square-foot exhibition pavilion: April 24 - September 7, 2020.

Fun, Taste & Games John Sharp,L. David Thomas,2019 Reclaiming fun as a meaningful concept for understanding games and play. Fun is somewhat ambiguous. If something is fun, is it pleasant Entertaining Silly A way to trick students into learning Fun also has baggage--it seems inconsequential, embarrassing, child's play. In *Fun, Taste, & Games* , John Sharp and David Thomas reclaim fun as a productive and meaningful tool for understanding and appreciating play and games. They position fun at the heart of the aesthetics of games. As beauty was to art, they argue, fun is to play and games--the aesthetic goal that we measure our experiences and interpretations against. Sharp and Thomas use this fun-centered aesthetic framework to explore a range of games and game issues--from workplace bingo to *Meow Wolf*, from basketball to *Myst* , from the consumer marketplace to Marcel Duchamp. They begin by outlining three elements for understanding the drive, creation, and experience of fun: set-outsideness, ludic forms, and ambiguity. Moving from theory to practice and back again, they explore the complicated relationships among the titular fun, taste, and games. They consider, among other things, the dismissal of fun by game journalists and designers; the seminal but underinfluential game *Myst*, and how tastes change over time; the shattering of the gamer community in Gamergate; and an aesthetics of play that goes beyond games.

Taking the Matter Into Common Hands Johanna Billing,Maria Lind,Lars Nilsson,2007 Taking the Matter into Common Hands maps out the issues surrounding collaborative art from a practitioner's perspective. With contributions from Marion von Osten, Nav Haq, 16 Beaver, Copenhagen Free University, Maria Lind and Lars Nilsson, it examines the working relations between artists and other producers of culture, and explores the future of collective action in the art world. In recent years, the art world has shown a renewed interest in collective work and activity. Collaborations between artists and artists, artists and curators, and artists and outside professionals have begun to rival the traditional focus on the individual artist. This type of collaboration has called into question how we view works of art that are not the voice of a single individual, and how that impacts on the concept of art as a means of self-expression. Taking the Matter Into Common Hands is essential for both academics, practitioners and lay audiences alike 47 colour & b/w illustrations
