Practical Laboratory Automation Matheus C. Carvalho, 2017-06-19 By closing the gap between general programming books and those on laboratory automation, this timely book makes accessible to every laboratory technician or scientist what has traditionally been restricted to highly specialized professionals. Following the idea of learning by doing, the book provides an introduction to scripting using AutoIt, with many workable examples based on real-world scenarios. A large portion of the book tackles the traditionally hard problem of instrument synchronization, including remote, web-based synchronization. Automated result processing, database operation, and creation of graphical user interfaces are also examined. Readers of this book can immediately profit from the new knowledge in terms of both increased efficiency and reduced costs in laboratory operation. Above all, laboratory technicians and scientists will learn that they are free to choose whatever equipment they desire when configuring an automated analytical setup, regardless of manufacturers suggested specifications.

Mobility for Smart Cities and Regional Development - Challenges for Higher Education Michael E. Auer, Hanno Hortsch, Oliver Michler, Thomas Köhler, 2022-01-28 This book presents recent research on interactive collaborative learning. We are currently witnessing a significant transformation in the development of education and especially post-secondary education. To face these challenges, higher education has to find innovative ways to quickly respond to these new needs. On the one hand, there is a pressure by the new situation in regard to the COVID pandemic. On the other hand, the methods and organizational forms of teaching and learning at higher educational institutions have changed rapidly in recent months. Scientifically based statements as well as excellent experiences (best practice) are absolutely necessary. These were the aims connected with the 24th International Conference on Interactive Collaborative Learning (ICL2021), which was held online by Technische Universität Dresden, Germany, on 22-24 September 2021. Since its beginning in 1998, this conference is devoted to new approaches in learning with a focus on collaborative learning in Higher Education. Nowadays, the ICL conferences are a forum of the exchange of relevant trends and research results as well as the presentation of practical experiences in Learning and Engineering Pedagogy. In this way, we try to bridge the gap between 'pure' scientific research and the everyday work of educators. This book contains papers in the fields of Teaching Best Practices Research in Engineering Pedagogy Engineering Pedagogy Education Entrepreneurship in Engineering Education Project-Based Learning Virtual and Augmented Learning Immersive Learning in Healthcare and Medical Education. Interested readership includes policymakers, academics, educators, researchers in pedagogy and learning theory, schoolteachers, learning industry, further and continuing education lecturers, etc

The Computer Genie step-8 will take the child on the final journey in the world of Computers as this is the last book in the series. The child will learn not only how to use a computer but also how to be effective with it. As we all know, information technology is the future, and here is the perfect way how a child can get into the future. In this book, the child will learn how some computer software, devices, programming, and other things like that works. Along with all this, they will learn how to work with different versions of windows, so that if the windows change, the child will not get confused about what to do. Besides, the children will also learn Remote working, Animation, E-commerce, Google Apps, App development, Setting YouTube channels, and Cyber security in the book. These things are not taught to students in other books but here, they will learn the important things like this. This final book is made for them to become a pro at using computers. Everything we teach in the book is represented with graphical illustrations that are shown to make the child engaged while learning. There are engaging puzzles and quizzes in the book that will help the child to learn actively and be creative at the same time, so that is how we can make the child love with education. Don't miss this amazing book if you want your child's creativity and education both elevated.
