Braving the Future Douglas Estes,2018-11-06 Humanity is nearing a technological tipping point. The blistering pace of technological, scientific, and social change is ushering in an era in which human bodies merge with devices, corporations know everything about us, and artificial intelligence develops human and even godlike potential. In possession of the most powerful tools history has ever seen, we will be faced with questions about wisdom, authority, faith, desire, and what it means to be human. In *Braving the Future*, Douglas Estes equips Christians to thoughtfully and prayerfully prepare for a future of technological reign that is rapidly expanding. Drawing on Scripture, Christian tradition, and scientific literature, Estes offers a theology of work, creation, and personhood that is both prophetic and sturdy enough to keep pace with the technology of a future as yet unknown. He helps readers choose trust in God over fearful retreat and following Jesus over uncritical engagement with technology. The future may not look exactly like a science fiction movie, but are we ready to brave a future of limitless tech and boundless change?

Let Them Choose Jillian Douglas, Shannon McKenzie, 2016-10-18 A model for social experiential learning focused on choice. Lecturing on its own is ineffective. But what's the alternative? Combine the best of brain science and learning theory with the power of choice. Deliver meaningful training programs that stimulate your learners, rather than bore them to sleep. *Let Them Choose* shows you how to get participants out of their seats and into station-based activities catered to distinct learning preferences, interaction types, and technology options. Part experiential, part social, and part emotional, the Cafeteria Learning Style model encourages learners to explore and absorb content at their own speed and direction. It puts learners in the best position to succeed. Supercharge the relevance of your content by encouraging learners to act, problem-solve, and construct their own knowledge. Apply content (the ingredients) to a variety of interchangeable activities (the recipes) that result in learning experiences (the meal) that acknowledge their diversity. Allow them to choose

whether to engage with your content through collaboration, competition, movement, or reflection, on their own or with a partner or group. Adult learning experts Shannon McKenzie and Jillian Douglas walk you through designing, facilitating, and measuring a learning experience that's proven to delight your learners. Watch retention and engagement soar as you use this easily replicable model to give your training program participants the freedom to choose.

Technology and the Doctor-Patient Relationship D.C. Lozar, M.D., 2019-08-16 Medicine is an ancient profession that advances as each generation of practitioners passes it down. It remains a distinguished, flawed and rewarding vocation--but it may be coming to an end as we know it. Computer algorithms promise patients better access, safer therapies and more predictable outcomes. Technology reduces costs, helps design more effective and personalized treatments and diminishes fraud and waste. Balanced against these developments is the risk that medical professionals will forget that their primary responsibility is to their patients, not to a template of care. Written for

anyone who has considered a career in health care--and for any patient who has had an office visit where a provider spent more time with data-entry than with them--this book weighs the benefits of emerging technologies against the limitations of traditional systems to envision a future where both doctors and patients are better-informed consumers of health care tools.

Differentiated Instruction Using Technology Amy Benjamin,2014-01-09 Like Amy Benjamin's other books, this one is easy to read and simple to implement. It showcases classroom-tested activities and strategies which are easy to apply in your own classroom.

Assistive Technology for People with Disabilities Denis K. Anson,2018-08-09 How would you make a phone call or send email if you couldn't hear, see, or use your hands? This book shows how assistive technology helps individuals with disabilities perform tasks that people without disabilities may take for granted. Assistive technology can be used in two ways: to help people with disabilities to do things that people without disabilities can do without technology, and to improve access to everyday technology that is not designed for people with disabilities. In both cases, the focus is on matching individuals with the tools best suited to fill their needs. A part of Greenwood's Health and Medical Issues Today series, Assistive Technology for People with Disabilities explores what technologies are available to individuals with disabilities, what they can help them to accomplish, and potential hurdles to their use that must be overcome. It explores this exciting field broadly and in depth while still keeping the people-first mindset that is the hallmark of assistive technology. In addition, it provides guidance and resources for individuals seeking assistive technology for themselves or for a loved one.
