ReThink the Internet Trisha Prabhu,2022-05-31 Stop hate. Promote Kindness. Be an Upstander. ReThink the Internet. Do you have to ask someone's permission before posting their photo? How can you tell if something on the internet is true? What should you do if you see someone bullying a friend online (or #IRL)? In a series of fun stories, innovator, inventor, social entrepreneur, and upstanding digital citizen Trisha Prabhu goes through the hows, the whats, and the whys of digital citizenship, showing readers how to lead with kindness and stop internet hate. For people who are just getting their first phone to others who have been scrolling, swiping, clicking and posting for years, this book makes us all consider what our role is in the digital world and how, together, we can make it a force for good.

American Utopia Peter Swirski,2019-07-08 From Black Tuesday to the White House, from Plato to Robert Nozick, from Eugene Debs to Richard Nixon, from Peter Cornelis Plockhoy to the hippie communes of the Sixties, from universal basic income to utopian basic income, from proverbial wisdom to multilevel selection, from Big Data to paleomorality, from Prisoner's Dilemma to social-engineering Israeli kindergartens, from time travel to gene engineering, from the pretzel logic of meritocracy to deaggressing humanity, *American Utopia* maps the pitfalls and windfalls of social reform in the name of the human use of human beings. Interrogating the assumptions behind four outré utopias by Thomas M. Disch, Bernard Malamud, Kurt Vonnegut, and Margaret Atwood, the book interrogates the assumptions that have historically been central to the

utopian project. Whence the seeds of social discontent? Whence our taste for egoism and altruism? For waging war and waging peace? Can we bioengineer human nature to specifications? Should we? Who makes better guardians: humans or machines? And who will guard the guardians?

Death's Acre William Bass, Jon Jefferson, 2004-10-05
“Fans of the forensics-oriented novels of such mystery writers as Kathy Reichs and Patricia Cornwell...not to mention television series like CSI: Crime Scene Investigation, will make an eager audience for this one.”—Booklist On a patch of land in the Tennessee hills, human corpses decompose in the open air, aided by insects, bacteria, and birds, unhindered by coffins or mausoleums. This is Bill Bass’s “Body Farm,” where nature takes its course as bodies buried in shallow graves, submerged in water, or locked in car trunks serve the needs of science and the cause of justice. In *Death’s Acre*, Bass invites readers on an unprecedented journey behind the gates of the Body Farm where he revolutionized forensic anthropology. A master scientist and an engaging storyteller, Bass reveals his most intriguing cases for the first time. He revisits the Lindbergh kidnapping and murder, explores the mystery of a headless corpse whose identity astonished police, divulges how the telltale traces of an insect sent a murderous grandfather to death row—and much more. Critical Listening Skills for Audio Professionals Frederick Alton Everest,2007 Audio productions are made or broken by the quality of the recording engineer's ears. The ability to properly discern sounds, identify subtle problems, and act accordingly to apply the necessary fix makes all the difference in the quality of the final tracks and master. The good news is that these crucial skills can be learned. The ability to instantly identify frequencies, hear hidden distortions, and instinctively reconcile conflicts in the EQ of instruments, audio elements, vocals and more are traits of those who have mastered the art of audio production. The best engineers have trained their ears to immediately recognize audio problems that the consumer and those new to recording arts would likely not hear, but that, if left unresolved, would result in an amateurish final product. For more than two decades, students of F. Alton Everest's Critical Listening and Auditory Perception courses have rapidly developed these skills by using the intense lessons found in this book and on the CD. Unfortunately the books and CDs included with the course were usually too expensive for aspiring engineers to purchase and were often available only in colleges, universities, or school libraries. Now for the first time these indispensable training sessions are available with this release of Critical Listening Skills for Audio Professionals. Through hundreds of illustrations and an accompanying disc containing high-

resolution MP3 files with nearly five hours of narration of the entire course, you can acquire the audio discernment skills of a seasoned recording engineer by studying this course at your own pace, in your own home.

Desperate Passage Ethan Rarick, 2008-02-04 In late October 1846, the last wagon train of that year's westward migration stopped overnight before resuming its arduous climb over the Sierra Nevada Mountains, unaware that a fearsome storm was gathering force. After months of grueling travel, the 81 men, women and children would be trapped for a brutal winter with little food and only primitive shelter. The conclusion is known: by spring of the next year, the Donner Party was synonymous with the most harrowing extremes of human survival. But until now, the full story of what happened, what it tells us about human nature and about America's westward expansion, remained shrouded in myth. Drawing on fresh archaeological evidence, recent research on topics ranging from survival rates to snowfall totals, and heartbreaking letters and diaries made public by descendants a century-and-a-half after the tragedy, Ethan Rarick offers an intimate portrait of the Donner party and their unimaginable ordeal: a mother who must divide her family, a little girl who shines with courage, a devoted wife who refuses to abandon her husband, a man who risks his life merely to keep his word. But Rarick resists both the gruesomely sensationalist accounts of the Donner party as

well as later attempts to turn the survivors into archetypal pioneer heroes. The Donner Party, Rarick writes, is a story of hard decisions that were neither heroic nor villainous. Often, the emigrants displayed a more realistic and typically human mixture of generosity and selfishness, an alloy born of necessity. A fast-paced, heart-wrenching, clear-eyed narrative history, *A Desperate Hope* casts new light on one of America's most horrific encounters between the dream of a better life and the harsh realities such dreams so often must confront.

Black Ants and Buddhists Mary Cowhey, 2023-10-10
What would a classroom look like if understanding and respecting differences in race, culture, beliefs, and opinions were at its heart? If you were inspired to become a teacher because you wanted to develop young minds, but now find yourself limited by teach to the test pressures and state standards, Mary Cowhey's book *Black Ants and Buddhists: Thinking Critically and Teaching Differently in the Primary Grades* will reignite the passion and remind you that educators provide more than test prep. Starting her career as a community activist, Cowhey shares her roots and how they influenced her Peace Class, where she asks her students to think critically, learn through activism and discussion, and view the entire curriculum through the framework of understanding the world, and what they can do to make it a better place. Woven through the book is Mary's unflinching and humorous account of her own roots as well as lessons from her heroes: Gandhi, Eleanor Roosevelt, Helen Keller, Martin Luther King, Jr, and others. Her students learn to make connections between their lives, the books they read, the community leaders they meet, and the larger world. *Black Ants and Buddhists* offers no easy answers, but it does include starting points for conversations about diversity and controversy in your

classroom, as well as in the larger community. Students and teachers investigate problems and issues together, in a multicultural, antiracist classroom.

What Waits in the Woods Kieran Scott, 2015-03-31 Seeing things. You were just seeing things. For city girl Callie Velasquez, nothing sounds more terrifying than a night out in the wilderness. But, wanting to bond with her popular new friends, Lissa and Penelope, she agrees to join them on a camping trip. At least Callie's sweet new boyfriend, Jeremy, will be coming too. But nothing goes as planned. The group loses half their food supply. Then they lose their way. And with strange sounds all around her--the snap of a twig, a sinister laugh--Callie wonders if she's losing her mind. Tensions swirl among the group, with dark secrets suddenly revealed. And then, things take a fatal turn: Callie stumbles upon a cold dead body in the woods. Is the murderer close by, watching them? Kieran Scott weaves a thrilling mystery that explores love, loyalty--and the dangerous decisions we make in order to survive.

Agrarian Dreams Julie Guthman, 2004-08-04 In an era of escalating food politics, many believe organic farming to be the agrarian answer. In this first comprehensive study of organic farming in California, Julie Guthman casts doubt on the current wisdom about organic food and agriculture, at least as it has evolved in the Golden State. Refuting popular portrayals of organic agriculture as a small-scale family farm endeavor in opposition to industrial agriculture, Guthman explains how organic farming has replicated what it set out to oppose.
