Auer, Dan Centea, 2021-02-05 This book contains papers in the fields of Interactive, Collaborative, and Blended Learning; Technology-Supported Learning; Education 4.0; Pedagogical and Psychological Issues. The 9th International Conference on Interactive, Collaborative, and Blended Learning: Visions and Concepts for Education 4.0 was conducted in an online format at McMaster University, Canada, from 14th to 15th October 2020, to deliberate and share the innovations and strategies. This conference's main objectives were to discuss guidelines and new concepts for engineering education in higher education institutions, including emerging technologies in learning; to debate new conference format in worldwide pandemic and post-pandemic conditions; and to discuss new technology-based tools and resources that drive the education in non-traditional ways such as Education 4.0. Since its beginning in 2007, this conference is devoted to new learning approaches with a focus on applications and experiences in the fields of interactive, collaborative, and blended learning and related new technologies. **The Joy of Teaching** Peter Filene,2009-11-13 Gathering concepts and techniques borrowed from outstanding college professors, The Joy of Teaching provides helpful guidance for new instructors developing and teaching their first college courses. Award-winning professor Peter Filene proposes that teaching should not be like a baseball game in which the instructor pitches ideas to students to see whether they hit or strike out. Ideally, he says, teaching should resemble a game of Frisbee in which the teacher invites students to catch ideas and pass them on. Rather than prescribe any single model for success, Filene lays out the advantages and disadvantages of various pedagogical strategies, inviting new teachers to make choices based on their own personalities, values, and goals. Filene tackles everything from syllabus writing and lecture planning to class discussions, grading, and teacher-student interactions outside the classroom. The book's down-to-earth, accessible style makes it appropriate for new teachers in all fields. Instructors in the humanities, the social sciences, and the natural sciences will all welcome its invaluable tips for successful teaching and learning.

Student friendly design - M: Business Communication was written and designed with today's student reader in mind. The layout and design provides student visual stimulation they've come to expect. The content was written to focus on the key concepts only The examples provided have been selected for greater student appeal. The writing style is highly readable with today's student reader in mind. ALL END OF CHAPTER MATERIAL IS LOCATED ONLINE ON THE OLC. Study/Prep Cards: these Study Cards are come bound in to each new book. There is 1 Study Card for each chapter. They do not regurgitate information from the text, which allows students to use the card passively. Instead, the front of the card asks the student to write what he/she recalls from each of the learning objectives in the chapter. After completing this step, the student turns to the back to review the learning objectives broken down into bulleted lists, and then completes fill-in-the-blank application questions to test their knowledge beyond basic comprehension. The answers to these application questions are available on the bottom of the card (upside down). The point of these cards is to create useful exercises that actually help students LEARN and remember, as opposed to passively reading (or not reading) the cards.
