The Future of Investor-State Dispute Settlement Ben Beaumont,Fahira Brodlija,Robert Ashdown,Armand

Terrien,2024-02-13 What makes investor-State dispute settlement (ISDS) as dynamic a field as it is – especially in comparison with international commercial arbitration – is its uncanny ability to engage directly with the most topical and pressing issues of the day, including human rights, regulation of the energy sector, and climate change and the environment more generally. This book provides a deep dive into the reality behind the causes and effects of the expressed concerns regarding ISDS and the extent to which they can and have been addressed by ongoing reform processes at national, regional, and international levels. Deeply informed insights from leading scholars and practitioners on the status quo and perspectives of ISDS shed clear light on such aspects as the following: reform instruments adopted at the UNCITRAL Working Group III; issues surrounding the legitimacy of ISDS; dispute prevention and amicable settlement mechanisms; the proposed multilateral investment court; implications of climate change and energy transition for investment policies and disputes; recent regional trends in policymaking and perspectives; the ICSID-UNCITRAL Code of Conduct; investment protection standards and dispute resolution mechanisms in recent international investment treaties; viability of the modernized Energy Charter Treaty; use of artificial intelligence; and participation of civil society organizations. As an in-depth analysis of the most recent developments in international investment law and dispute resolution, this book offers a realistic view of the reform processes, thus underlining the necessary legal and institutional measures that will translate into real-life effects in the future. With its help, policymakers and government officials will identify ongoing trends and anticipate risks that require intervention, while practitioners and the broader dispute resolution community will find valuable information about the evolving contours of investment protection treaties and ISDS. For academics and civil society organizations interested in the developments and implications of ISDS, the book provides factual, nuanced, and effective analysis of the relevant issues.

Modern Economic Regulation Christopher Decker,2015 This book synthesises the vast literature on economic regulation into a coherent overview of regulatory theory and practice.

World Investment Report 2019 United Nations Conference on Trade and Development,2019-08-09 The 2019 edition of the World Investment Report focuses on special economic zones (SEZs) which are widely used across most developing and many developed economies. Although the performance of many zones remains below expectations, the rate of establishment of new zones is accelerating as governments increasingly compete for internationally mobile industrial activity. Policymakers face not only the traditional challenges to making SEZs succeed, including the need for strategic focus, sound governance models, and effective investment promotion tools, but also new challenges brought about by the sustainable development imperative, the new industrial revolution, and changing patterns of international production. The Report explores the place of SEZs in today's global investment landscape

and provides guidance for policymakers on how to make SEZs work for sustainable development. It presents international investment trends and prospects at global, regional and national levels, as well as the evolution of international production and global value chains. It analyses the latest developments in new policy measures for investment promotion, facilitation and regulation around the world, as well as updates on investment treaties, their reform and investment dispute settlement cases.

EU Electronic Communications Code Handbook Francesco Liberatore,James Konidaris,2021-07-30 Regulation of electronic communications in the EU Member States is increasingly driven by European legislation. This title collects the key European legislation and other instruments pertinent to the electronic communications sector and in some cases is annotated by Francesco Liberatore and his colleagues at global law firm, Squire Patton Boggs. The timing of this title is particularly opportune as it includes: - The new EU Electronic Communications Code Directive - The Commission's Guidelines on market analysis and its recommendation on relevant markets - Significant measures (other Directives, Commission decisions and recommendations) integral to the regulatory framework - The BEREC Common Position on Remedies and other BEREC texts

Global Financial Stability Report, October 2014 International Monetary Fund. Monetary and Capital Markets Department,2014-10-08 The October 2014 issue finds that six years after the start of the crisis, the global economic recovery continues to rely heavily on accommodative monetary policies in advanced economies. Monetary accommodation remains critical in supporting economies by encouraging economic risk taking in the form of increased real spending by households and greater willingness to invest and hire by businesses. However, prolonged monetary ease may also encourage excessive financial risk taking. Analytical chapters examine (1) the growth of shadow banking around the globe, assessing risks and discussing regulatory responses, and calling for a more encompassing (macroprudential) approach to regulation and for enhanced data provision; and (2) how conflicts of interest among bank managers, shareholders, and debt holders can lead to excessive bank risk taking from society's point of view, finding no clear relation between bank risk and the level of executive compensation, but that a better alignment of bankers' pay with long-term outcomes is associated with less risk.

Cross-Border Litigation in Europe Paul Beaumont, Mihail Danov, Katarina Trimmings, Burcu Yüksel, 2017-11-16 This substantial and original book examines how the EU Private International Law (PIL) framework is functioning and considers its impact on the administration of justice in cross-border cases within the EU. It grew out of a major project (ie EUPILLAR: European Union Private International Law: Legal Application in Reality) financially supported by the EU Civil Justice Programme. The research was led by the Centre for Private International Law at the University of Aberdeen and involved partners from the Universities of Freiburg, Antwerp, Wroclaw, Leeds, Milan and Madrid (Complutense). The contributors address the specific features of cross-border disputes in the EU by undertaking a comprehensive analysis of the Court of Justice of the EU (CJEU) and national case law on the Brussels I, Rome I and II, Brussels IIa and Maintenance Regulations. Part I discusses the development of the EU PIL framework. Part II contains the national reports from 26 EU Member States. Parts III (civil and commercial) and IV (family law) contain the CJEU case law analysis and several cross-cutting chapters. Part V briefly sets the agenda for an institutional reform which is necessary to improve the effectiveness of the EU PIL regime. This comprehensive research project book will be of interest to researchers, students, legal practitioners, judges and policy-makers who work, or are interested, in the field of private international law.
