Mapping Tourism Stephen P. Hanna, Vincent J. Del Casino, 2003 At first glance, the relationships among tourists, tourism maps, and the spaces of tourism seem straightforward enough: tourists use maps to find their way to and through the sites of history, culture, nature, or recreation represented there. Less apparent is how tourism maps and those using them construct such spaces and identities. As the essays in Mapping Tourism clearly demonstrate, the extraordinary interaction of work with leisure and the everyday with the exotic makes tourism maps ideal sites for exploring the contested construction of place and identity. Construction sites in the New Berlin, Alabama's civil rights trail, Quebec City, a California ghost town, and Bangkok's sex trade are among the spaces the essays examined. Taken together, these essays allow us to see tourist space as it truly is: contested, ever changing, and replete with issues of power.

Become a Problem-Solving Crime Analyst Ronald Clarke, John E. Eck, 2014-06-03

Crime analysis has become an increasingly important part of policing and crime prevention, and thousands of specialist crime analysts are now employed by police forces worldwide. This is the first book to set out the principles and practice of crime analysis, and is designed to be used both by crime analysts themselves, by those responsible for the training of crime analysts and teaching its principles, and those teaching this subject as part of broader policing and criminal justice courses. The particular focus of this book is on the adoption of a problem solving approach, showing how crime analysis can be used and developed to support a problem oriented policing approach - based on the idea that the police should concentrate on

identifying patterns of crime and anticipating crimes rather than just reacting to crimes once they have been committed. In his foreword to this book, Nick Ross, presenter of BBC Crime Watch, argues passionately that crime analysts are 'the new face of policing', and have a crucial part to play in the increasingly sophisticated police response to crime and its approach to crime prevention - 'You are the brains, the expert, the specialist, the boffin.'

Handbook for Research in American History Francis Paul Prucha, 1994-01-01
When the Handbook for Research in American History was first published, reviewers called it an excellent tool for historians of all interests and levels of experience . . . simple to use, and concisely worded (Western Historical Quarterly) and an excellent work that fulfills its title in being portable yet well-filled (Reference Reviews). The Journal of American History added, It is not easy to produce a reference work that is utilitarian and enriching and does not duplicate existing works. Professor Prucha has done the job very well. This second, revised edition takes account of the revolution that is occurring in bibliographic science as printed reference works extend to electronic databases, CD-ROMs, and online networks such as the Internet. Focusing on and expanding the major section of the original Handbook, it provides information on traditional printed works, describes new guides and updated versions of old ones, notes the availability of reference works and of some full-text sources in electronic form, and discusses the usefulness to researchers of different kinds of material and the forms in which they are available. Extensive cross-referencing and a detailed index

that includes authors, subjects, and titles enhance the book's usefulness.

Mapping Chengde Philippe Foret,2000-06-01 The imperial residence of Chengde was built by two powerful and ambitious Manchu emperors between 1703 and 1780 in the mountains of Jehol. This volume, the first scholarly publication in English on the Manchu summer capital, reveals how this unlikely architectural and landscape enterprise came to help forge a dynasty's multicultural identity and concretize its claims of political legitimacy. Using both visual and textual materials, the author explores the hidden dimensions of landscape, showing how geographical imagination shaped the aesthetics of Qing court culture while proposing a new interpretation of the mental universe that conceived one of the world's most remarkable examples of imperial architecture.
