Semiotics and Second-Language Pedagogy presents a coherent synthesis of semiotics and second-language pedagogical concepts. In addition to a speculative part, it has an applied part where theoretical insights are made explicit and shown to operate in actual teaching.

Preventing Environmental Damage from Products Eléonore Maitre-Ekern,Carl Dalhammar,Hans Christian Bugge,2018-04-19 How to tackle environmental damage from the throwaway society is one of the defining questions of the twenty-first century. By establishing a circular economy, we can encourage and support sustainable production and consumption. These essays by an international group of leading scholars from a range of disciplines analyse policies and legal instruments and challenge mainstream assumptions, from the choice of a policy mix to the actual effect of imposing standards on the market, and from corporate objectives and priorities to the use of precaution in assessing particularly harmful substances. Each chapter contributes to a better understanding of the current policy and regulatory framework in Europe and identifies the challenges and opportunities ahead. The book breaks new ground by examining how product policies can contribute to important objectives and visions, such as the aims of the circular economy. It is a must-read for researchers as well as for policymakers and practitioners.

Criminal Liability for Serious Traffic Offences Alwin van Dijk,Hein Wolswijk,2017-12-17 The criminal law on serious traffic offenses presents legislators with numerous controversial issues. One such issue is when severe consequences are matched with low moral culpability. How should the law deal with a driver who kills someone because she failed to see the person when looking? Another controversial issue concerns highly culpable behavior that remains without serious consequences. How should the law cope with a driver who nearly kills someone when overtaking recklessly? The traffic context generates many hard cases that call the outermost boundaries of general doctrinal concepts like intent, negligence, or causation into question. This book contains an international collection of essays on criminal liability for serious traffic offenses. With a focus on England/Wales, the Netherlands, France, Germany, and Spain, the book reveals that there are enormous differences in both drafting and interpretation of serious traffic offenses. Additionally, it elaborates on the role of culpability and harm in sentencing, traffic-psychological insights relevant to accident causation, and the concept of conditional intent in relation to extremely dangerous traffic behavior. (Series: Governance & Recht - Vol. 11) [Subject: Criminal Law, Traffic Law, Comparative Law]
