Inverse Problems and Imaging Luis L.

Bonilla, 2009-06-19 Nowadays we are facing numerous and important imaging problems: nondestructive testing of materials, monitoring of industrial processes, enhancement of oil production by efficient reservoir characterization, emerging developments in noninvasive imaging techniques for medical purposes - computerized tomography (CT), magnetic resonance imaging (MRI), positron emission tomography (PET), X-ray and ultrasound tomography, etc. In the CIME Summer School on Imaging (Martina Franca, Italy 2002), leading experts in mathematical techniques and applications presented broad and useful introductions for non-experts and practitioners alike to many aspects of this exciting field. The volume contains part of the above lectures completed and updated by additional contributions on other related topics.

The Soviet Agrarian Debate Susan Gross Solomon,2019-07-16 The first decade of Soviet cultural life was marked by a pluralism unmatched in the subsequent history of the USSR. In many fields of art and science, Party and non-Party proletarian and bourgeois intellectuals worked side by side, vigorously debating questions of substance and method. In this first major study of a Soviet field of social science in the post-

Revolution period, Dr. Solomon examines the controversy that divided social scientists studying the economy and society of the Soviet peasant during the 1920s. The intellectual disagreements in post-Revolution Soviet rural studies were exacerbated by social, political, and professional differences among the contending scholars. The infighting between the groups was bitter. Yet in contrast to recent studies of other Soviet professions in the 1920s, the author finds that in rural studies Marxists and non-Marxists had much in common. Her findings suggest that the coexistence of the old and the new in Soviet rural studies might have lasted for some time had not external political forces intervened in late 1928, acting as a pressure on the field and eventually causing its demise.

The Fingerprint U. S. Department Justice, 2014-08-02 The idea of The Fingerprint Sourcebook originated during a meeting in April 2002. Individuals representing the fingerprint, academic, and scientific communities met in Chicago, Illinois, for a day and a half to discuss the state of fingerprint identification with a view toward the challenges raised by Daubert issues. The meeting was a joint project between the International Association for Identification (IAI) and West Virginia University (WVU). One recommendation that came out of that meeting was a suggestion to create a sourcebook for friction ridge examiners, that is, a single source of researched information regarding the subject. This sourcebook would provide educational, training, and research information for the international

scientific community.
