Hypertext/hypermedia Handbook Emily Berk, Joseph Devlin, 1991 HyperText or HyperMedia is electronic documentation that does not proceed from start to finish in a linear fashion. This book is the first comprehensive handbook on the methods and techniques of using a hypertext, with emphasis on designing and implementing hypertext projects.

Terminological Approaches in the European Context Paola Faini, 2017-03-07 This volume provides a picture of state-of-the-art studies on terminology at the European level. Addressing a range of linguistic and cultural topics, it illustrates the diversity of terminological approaches, uses and solutions. A variety of national contexts and areas, from economics and law through to gender, environment and education, is explored to illustrate emerging national issues and practices in view of measuring and assessing them against European standards. The book discusses the selection of languages and cultural attitudes that characterize European Union countries, challenging and productive as they can be. It highlights the need to acknowledge differences in specific domains and the necessity to evaluate national policies (or indeed lack of policies) regarding terminological issues, and facilitate communication and dissemination of knowledge.

Things Nobody Knows But Me Amra Pajalić, 2019-05-01 When she is four years old Amra Pajalić realises that her mother is different. Fatima is loving but sometimes hears strange voices that tell her to do bizarre things. She is frequently sent to hospital and Amra and her brother are passed around to family friends and foster homes, and for a time live with their grandparents in Bosnia. At sixteen Amra ends up in the school counsellor's office for wagging school. She finally learns the name for the malady that has dogged her mother and affected her own life: bipolar disorder. Amra becomes her mother's confidante and learns the extraordinary story of her life: when she was fifteen years old Fatima visited family friends only to find herself in an arranged marriage. At sixteen she was a migrant, a mother, and mental patient. Surprisingly funny, *Things Nobody Knows But Me* is a tender portrait of family and migration, beautifully told. It captures a wonderful sense of bicultural place and life as it weaves between St Albans in suburban Australia and Bosanska Gradiška in Bosnia. Ultimately it is the heartrending story of a mother and daughter bond fractured and forged by illness and experience. Fatima emerges as a remarkable but wounded woman who learns that her daughter really loves her.

Corpora in Translation and Contrastive Research in the Digital Age Julia Lavid-López, Carmen Maíz-Arévalo, Juan Rafael Zamorano-Mansilla, 2021-12-15 Corpus-based contrastive and translation research are areas that keep evolving in the digital age, as the range of new corpus resources and tools expands, opening up to different approaches and application contexts. The current book contains a selection of papers which focus on corpora and translation research in the digital age, outlining some recent advances and explorations. After an introductory chapter which outlines language technologies applied to translation and interpreting with a view to identifying challenges and research opportunities, the first part of the book is devoted to current advances in the creation of new parallel corpora for under-researched areas, the development of tools to manage parallel corpora or as an alternative to parallel corpora, and new methodologies to improve existing translation memory systems. The contributions in the second part of the book address a number of cutting-edge linguistic issues in the area of contrastive discourse studies and translation analysis on the basis of comparable and parallel corpora in several languages such as English, German, Swedish, French, Italian, Spanish, Portuguese and Turkish, thus showcasing the richness of the linguistic diversity carried out in these recent investigations. Given the multiplicity of topics, methodologies and languages studied in the different chapters, the book will be of interest to a wide audience working in the fields of translation studies, contrastive linguistics and the automatic processing of language.
