Proceedings of the Eighth International Symposium on Human Aspects of Information Security & Assurance (HAISA 2014) Nathan Clarke,Steven Furnell,2014 The Human Aspects of Information Security and Assurance (HAISA) symposium specifically addresses information security issues that relate to people. It concerns the methods that inform and guide users' understanding of security, and the technologies that can benefit and support them in achieving protection. This book represents the proceedings from the 2014 event, which was held in Plymouth, UK. A total of 20 reviewed papers are included, spanning a range of topics including the communication of risks to end-users, user-centred security in system development, and technology impacts upon personal privacy. All of the papers were subject to double-blind peer review, with each being reviewed by at least two members of the international programme committee.

Ada-Europe '93 Michel Gauthier,1993-06-07 This volume contains the proceedings of the twelfth Ada-Europe conference, held in France in 1993. The French name Ada sans fronti res (the only French words in the book) symbolizes the unlimitedness and novelty of Ada, as well as Europe-wide interest. Many papers relate to Ada-9X, the new standard that the Ada coimmunity is close to achieving after worldwide consultation and debate about requirements, specification, anddetailed definition. Their focus is on management, real-time, and compiler validation. Part of the conference was on object orientation, together with various issues relating to the general structure of the language, including exceptions to a certain use of genericity and heterogeneous data, efficiency, formal requirements and CASEs, and comparison with a competitor language. A third part relates to real-time, past with performance measurement, present with certification andapplications, and future with the ExTRA project and 9X.

The Digital City and Mediated Urban Ecologies Kristin Scott,2016-10-28 This book examines the phenomenon of the "digital city" in the US by looking at three case studies: New York City, San Antonio, and Seattle. Kristin Scott considers how digital technologies are increasingly built into the logic and organization of urban spaces and argues that while each city articulates ideals such as those of open democracy, civic engagement, efficient governance, and enhanced security, competing capitalist interests attached to many of these digital technological programs make the "digital city" problematic.

The Languages of COVID-19 Piotr Blumczynski,Steven Wilson,2022-11-30 This collection advocates languages-based, translational research to be part of the partnerships and collaborations required to make sense of, and respond to, COVID-19 as one of the major global challenges of our time. Bringing together scholars and practitioners from a wide range of disciplines, this volume is bound by a common thread stressing the importance of linguistic sensitivity, (inter)cultural knowledge and translational mediation in the frontline response to COVID-19. Featuring contributors from around the world and reflecting on the language used to frame COVID-19 in diverse cultural contexts of the Global North and Global South, the book proposes that paying attention to the transmission of ideas, ideologies, narratives and history through processes of translation results in a broadening of social, cultural and medical understandings of COVID-19. Spanning nearly 20 signed and spoken languages, the volume argues that only in going beyond an Anglophone perspective can we better understand the cultural, social and political facets of the pandemic and, in turn, produce a comprehensive, efficient global response to disease management. This book will be of interest to scholars in translation and interpreting studies, modern languages, applied linguistics, cultural studies, Deaf Studies, intercultural communication and medical humanities.

ICT for social welfare Geoghegan, Luke,Lever,

Jason,2004-05-05 Information and Communications Technology (ICT) has the potential to improve services provided by the public and voluntary sectors, empower staff and strengthen the community. Therefore, it is in the interests of those working in social welfare to understand and grapple with key issues. This book analyses the current context and use of ICT in these sectors and builds on this to provide practical guidance for managers and staff. Assuming no technical knowledge, the book provides the ideas, tools and resources to think critically and creatively about current ICT practice and to implement positive change at individual, team and organisational level.

National EHealth Strategy Toolkit World Health Organization,2012 Worldwide the application of information and communication technologies to support national health-care services is rapidly expanding and increasingly important. This is especially so at a time when all health systems face stringent economic challenges and greater demands to provide more and better care especially to those most in need. The National eHealth Strategy Toolkit is an expert practical guide that provides governments their ministries and stakeholders with a solid foundation and method for the development and implementation of a national eHealth vision action plan and monitoring fram.

War of Eagles Tom Clancy,Steve Pieczenik,Jeff Rovin,2005-06-07 The explosion of a Chinese freighter in Charleston Harbor is the first sign that someone is capping Chinese interests abroad. Now under the control of the Pentagon, Op-Center is unsure of its own future-but must root out the cause of the attacks before the entire world is affected.

Emergency Alert and Warning Systems National Academies of Sciences, Engineering, and Medicine,Division on Engineering and Physical Sciences,Computer Science and Telecommunications Board,Committee on the Future of Emergency Alert and Warning Systems: Research Directions,2018-05-19 Following a series of natural disasters, including Hurricane Katrina, that revealed

shortcomings in the nation's ability to effectively alert populations at risk, Congress passed the Warning, Alert, and Response Network (WARN) Act in 2006. Today, new technologies such as smart phones and social media platforms offer new ways to communicate with the public, and the information ecosystem is much broader, including additional official channels, such as government social media accounts, opt-in short message service (SMS)-based alerting systems, and reverse 911 systems; less official channels, such as main stream media outlets and weather applications on connected devices; and unofficial channels, such as first person reports via social media. Traditional media have also taken advantage of these new tools, including their own mobile applications to extend their reach of beyond broadcast radio, television, and cable. Furthermore, private companies have begun to take advantage of the large amounts of data about users they possess to detect events and provide alerts and warnings and other hazard-related information to their users. More than 60 years of research on the public response to alerts and warnings has yielded many insights about how people respond to information that they are at risk and the circumstances under which they are most likely to take appropriate protective action. Some, but not all, of these results have been used to inform the design and operation of alert and warning systems, and new insights continue to emerge. Emergency Alert and Warning Systems reviews the results of past research, considers new possibilities for realizing more effective alert and warning systems, explores how a more effective national alert and warning system might be created and some of the gaps in our present knowledge, and sets forth a research agenda to advance the nation's alert and warning capabilities.

Guide for All-Hazard Emergency Operations Planning Kay C. Goss,1998-05 Meant to aid State & local emergency managers in their efforts to develop & maintain a viable all-hazard emergency operations plan. This guide clarifies the preparedness,

response, & short-term recovery planning elements that warrant inclusion in emergency operations plans. It offers the best judgment & recommendations on how to deal with the entire planning process -- from forming a planning team to writing the plan. Specific topics of discussion include: preliminary considerations, the planning process, emergency operations plan format, basic plan content, functional annex content, hazard-unique planning, & linking Federal & State operations.

Public Response to Alerts and Warnings Using Social Media National Research Council,Division on Engineering and Physical Sciences,Computer Science and Telecommunications Board,Committee on Public Response to Alerts and Warnings Using Social Media: Current Knowledge and Research Gaps,2013-02-04 Following an earlier NRC workshop on public response to alerts and warnings delivered to mobile devices, a related workshop was held on February 28 and 29, 2012 to look at the role of social media in disaster response. This was one of the first workshops convened to look systematically at the use of social media for alerts and warnings-an event that brought together social science researchers, technologists, emergency management professionals, and other experts on how the public and emergency managers use social media in disasters.In addition to exploring how officials monitor social media, as well as the resulting privacy considerations, the workshop focused on such topics as: what is known about how the public responds to alerts and warnings; the implications of what is known about such public responses for the use of social media to provide alerts and warnings to the public; and approaches to enhancing the situational awareness of emergency managers. Public Response to Alerts and Warnings Using Social Media: Report of a Workshop on Current Knowledge and Research Gaps summarizes presentations made by invited speakers, other remarks by workshop participants, and discussions during parallel breakout sessions. It also points to potential topics for future research, as well as possible areas for future research

investment, and it describes some of the challenges facing disaster managers who are seeking to incorporate social media into regular practice.

Evidence-Based Practice for Public Health Emergency Preparedness and Response National Academies of Sciences, Engineering, and Medicine,Health and Medicine Division,Board on Population Health and Public Health Practice,Board on Health Sciences Policy,Committee on Evidence-Based Practices for Public Health Emergency Preparedness and Response,2020-11-28 When communities face complex public health emergencies, state local, tribal, and territorial public health agencies must make difficult decisions regarding how to effectively respond. The public health emergency preparedness and response (PHEPR) system, with its multifaceted mission to prevent, protect against, quickly respond to, and recover from public health emergencies, is inherently complex and encompasses policies, organizations, and programs. Since the events of September 11, 2001, the United States has invested billions of dollars and immeasurable amounts of human capital to develop and enhance public health emergency preparedness and infrastructure to respond to a wide range of public health threats, including infectious diseases, natural disasters, and chemical, biological, radiological, and nuclear events. Despite the investments in research and the growing body of empirical literature on a range of preparedness and response capabilities and functions, there has been no national-level, comprehensive review and grading of evidence for public health emergency preparedness and response practices comparable to those utilized in medicine and other public health fields. Evidence-Based Practice for Public Health Emergency Preparedness and Response reviews the state of the evidence on PHEPR practices and the improvements necessary to move the field forward and to strengthen the PHEPR system. This publication evaluates PHEPR evidence to understand the balance of benefits and harms of PHEPR practices, with a focus on four main areas of PHEPR:

engagement with and training of community-based partners to improve the outcomes of at-risk populations after public health emergencies; activation of a public health emergency operations center; communication of public health alerts and guidance to technical audiences during a public health emergency; and implementation of quarantine to reduce the spread of contagious illness.

Hinge Points Siegfried S. Hecker,2023-01-10 North Korea remains a puzzle to Americans. How did this country—one of the most isolated in the world and in the policy cross hairs of every U.S. administration during the past 30 years—progress from zero nuclear weapons in 2001 to a threatening arsenal of perhaps 50 such weapons in 2021? Hinge Points brings readers literally inside the North Korean nuclear program, joining Siegfried Hecker to see what he saw and hear what he heard in his visits to North Korea from 2004 to 2010. Hecker goes beyond the technical details—described in plain English from his on-the-ground experience at the North's nuclear center at Yongbyon—to put the nuclear program exactly where it belongs, in the context of decades of fateful foreign policy decisions in Pyongyang and Washington. Describing these decisions as hinge points, he traces the consequences of opportunities missed by both sides. The result has been that successive U.S. administrations have been unable to prevent the North, with the weakest of hands, from becoming one of only three countries in the world that might target the United States with nuclear weapons. Hecker's unique ability to marry the technical with the diplomatic is well informed by his interactions with North Korean and U.S. officials over many years, while his years of working with Russian, Chinese, Indian, and Pakistani nuclear officials have given him an unmatched breadth of experience from which to view and interpret the thinking and perspective of the North Koreans.

Library as Safe Haven Deborah D. Halsted,Shari C. Clifton,Daniel T. Wilson,2014 Libraries have always played a

special role in times of disaster by continuing to provide crucial information and services. The Stafford Act of 2011, a federal government directive, designates libraries as among the temporary facilities delivering essential services, making a Continuity of Operations Plan imperative for libraries. Peppered with informative first-person narratives from librarians recounting emergency situations, Halsted, Clifton, and Wilson cover such topics as: An eight-step approach to developing a risk assessment planHow to draft a one-page service continuity planInformation on how to use mobile devices and social media effectively in times of disasterSample disaster plans, along with model exercises, manuals and customizable communicationsPublished in cooperation with the Medical Library Association (MLA), this nuts-and-bolts resource will enable libraries of all kinds to do their best while planning for the worst.

Common Worship: Pastoral Services Church of England,2014-08-19 Offers liturgical material for the journey of each individual through life. For each key element of this journey (birth, marriage, healing, death), it provides both material for key 'public' events and resources for 'private' pastoral care.
