Richard Koch, Greg Lockwood

A Young Innovator's Guide to STEM Gitanjali Rao, 2021-03-16 TIME Magazine's 2020 "Kid of the Year" Innovate and Create Our generation is growing up in a time where we're seeing problems that have never existed before. Older tools and technique don't necessarily work anymore to solve such issues. We need a different approach that builds on the latest developments in science and takes an alternate path to innovation. Now more than ever, it's time to come together to make a difference in society. But how exactly do we make that change? Gitanjali Rao, innovator and America's Top Young Scientist, brings to you an interactive experience to help immerse students in the process of innovation. Recognized by ABC, NBC, CBS, NPR, The Tonight Show with Jimmy Fallon, and Marvel's Hero Project, the accomplished author builds on her experiences and provides a prescriptive step-by-step process for identifying problems and developing solutions. *A Young Innovator's Guide to STEM* strives to impact students, teachers, and educators to adapt to a new learning style—one that can have a positive impact on society. What do you say? Let's come together and create an innovation movement!

Designing for Touch Josh Clark, 2015-10-28 Touch introduces physicality to designs that were once strictly virtual, and puts forth a new test: How does this design feel in the hand? Josh Clark guides you through the touchscreen frontier. Learn about ergonomic demands (and rules of thumb), layout and sizing for all gadgets, an emerging gestural toolkit, and tactics to speed up

interactions and keep gestures discoverable. Get the know-how to design for interfaces that let you touch-stretch, crumple, drag, flick-information itself. It's in your hands.

Black Cuban, Black American Evelio Grillo, 2000-04-30 Arte Público Presss landmark series Recovering the U.S. Hispanic Literary Heritage has traditionally been devoted to long-lost and historic works by Hispanics of decades and even centuries past. The publications of Black Cuban, Black American mark the first original work by a living author to become part of this notable series. The reason for this unprecedented honor can be seen in Evelio Grillos path-breaking life. Ybor City was once a thriving factory town populated by cigar-makers, mostly emigrants from Cuba. Growing up in Ybor City (now part of Tampa) in the early twentieth century, the young Evelio experienced the complexities and sometimes the difficulties of life in a horse-and-buggy society demarcated by both racial and linguistic lines. Life was different depending on whether you were Spanish- or English-speaking, a white or black Cuban, a Cuban American or a native-born U.S. citizen, well off or poor. (Even U.S.-born blacks did not always get along with their Hispanic counterparts.) Grillo captures the joys and sorrows of this unique world that slowly faded away as he grew to adulthood and was absorbed into the African-American community during the Depression. He then tells of his eye-opening experiences as a soldier in an all-black unit serving in the China-Burma-India theatre of operations during World War II. Booklovers may

have read of Ybor City in the novels of Jose Yglesias, but never before has the colorful locale been portrayed from this perspective. The book also contains a fascinating eight-page photo insert.

Fashion and Politics Djurdja Bartlett, 2019-01-01 In this incisive book, leaders from international fashion research and artistic practices probe the nuanced relationship between fashion and politics.

My First Puzzles: Dinosaurs, 2008

Building a WordPress Blog People Want to Read Scott McNulty, 2009-03-30 Having your own blog isn't just for the nerdy anymore. Today, it seems everyone – from multinational corporations to a neighbor up the street – has a blog. They all have one, in part, because the folks at WordPress make it easy to get one. But to actually build a good blog – to create a blog people want to read – takes thought, planning, and some effort. From picking a theme and using tags to choosing widgets and building a community, creating your blog really starts after you set it up. In this book by blogger extraordinaire Scott McNulty, you learn how to: Install and get your WordPress blog running. Set up your site to ensure it can easily grow with you and your readers. Be the master of user accounts. Manage your site with

the WordPress Dashboard and extend its capabilities with plug-ins. Make the most of images. Work with pages, templates, and links and – of course – publish your posts. Deal with comments – if you even want readers commenting at all. Find a theme – or build one yourself. Maintain your site and fix common problems.

Gentrification and Resistance Ilse Helbrecht, 2017-12-06 Gentrification is arguably the most dynamic area of conflict in current urban development policy – it is the process by which poorer populations are displaced by more affluent groups. Although gentrification is well-documented, German and international research largely focuses on improvements in the built environment and social composition of neighbourhoods. The consequences for those who are displaced often remain overlooked. Where do they move? What does it mean to be forced to leave a familiar residential area? What kinds of resistance strategies are developed? How does anti-gentrification work? With a focus on Berlin – the German capital of gentrification – the chapters in this volume use innovative methods to explore these pressing questions.

Dispatches from Blogistan Suzanne Stefanac, 2006-09-20 The term blog wasn't coined until 1999 and yet by 2004, it had become Merriam-Webster's Word of the Year. Globally, the number of blogs is doubling every six months, with more than 50 million blogs online today. Here to offer a unique overview of the emerging phenomenon that even armchair observers will find curiosity-satisfying is *Dispatches from Blogistan: A Travel Guide for the Modern*

Blogger. Filled with practical, easy-to-implement advice for making blogging more enjoyable, useful, and profitable, this book covers everything from blogging and how it fits into the history of journalism to practical tips for planning and managing a blog, attracting and retaining an active readership. Written by noted technology journalist and interactive media veteran Suzanne Stefanac, the book features a fresh and succinct approach; quotes and commentary from noted and celebrity bloggers (author/futurist Bruce Sterling, NPR commentator Farai Chideya, Craig Newmark of craigslist.com, and Cory Doctorow, Boing Boing editor and science fiction author, among others); an accompanying blog site (dispatchesfromblogistan.com); and more. Stefanac explores issues of trust, influence, privacy, discovery, and the power of collaborative discourse, making this is a blog book like no other!

Google Apps: The Missing Manual Nancy Conner, 2008-05-27 Among its many amazing applications, Google now has web-based alternatives to many of the applications in Microsoft Office. This comprehensive and easy-to-follow new book enables you to explore Google's new office applications in detail. Once you do, you'll be in good company -- more than 100,000 small businesses and some corporations are already looking to take advantage of these free Google offerings. Google Apps: The Missing Manual teaches you how to use three relatively new applications from Google: Docs and Spreadsheets, which provide many of the same core tools that you find in Word and Excel; and Google Calendar and Gmail, the applications that offer an alternative to Outlook.

This book demonstrates how these applications together can ease your ability to collaborate with others, and allow you access to your documents, mail and appointments from any computer at any location. Of course, as remarkable as these applications are, Google's office suite is definitely a work-in-progress. Navigating what you can and can't do and -- more importantly -- understanding how to do it isn't always easy. And good luck finding enough help online. Google Apps: The Missing Manual is the one book you need to get the most out of this increasingly useful part of the Google empire. This book: Explains how to create, save and share each of Google's web-based office applications Offers separate sections for Docs and Spreadsheets, Google Calendar, and Gmail Demonstrates how to use these applications in conjunction with one another Gives you crystal-clear and jargon-free explanations that will satisfy users of all technical levels Many of you already use Gmail, but do you know its full potential? Do you know how you can increase its power by using Gmail with Doc and Spreadsheets and Google Calendar? You'll find out with Google Apps: The Missing Manual. You'll also come to understand why large corporations such as General Electric and Proctor & Gamble are taking a long, hard look at these applications.

Thinking Strategically Craig Loehle,1996-08-28 Thinking Strategically provides the necessary tools for dissecting complex problems and for creating innovative solutions.

Black Faces in White Places Randal Pinkett,Jeffrey Robinson,Philana

Patterson,2011 The first African-American winner of The Apprentice explains how black professionals can bust through racial barriers in order to climb the corporate ladder and reach their full potential.

Superconnect Richard Koch,Greg Lockwood,2010-08-24 For readers of Outliers or The Wisdom of Crowds – or internationally bestselling author Richard Koch's many followers – this entertaining book draws on the latest in network science research to show how any of us can increase the chances of success in our personal and work lives. What's so special about the rich and famous? Unusually successful people often think they've done well because of their talent or luck – or simple grit and hard work. But individual characteristics matter far less than the social connections we exploit. And counterintuitively, it's our weak links – your neighbour's landscaper or that ad agency guy you happened to meet at your sister's birthday party last year – that matter most of all. Drawing on research from the fields of sociology, math, and physics, internationally bestselling author and entrepreneur Richard Koch and his co-author Greg Lockwood show how networks impact our everyday lives. Rich with entertaining anecdotes and written in Richard Koch's trademark conversational style, *Superconnect* reveals the hidden patterns behind everyday events. Most importantly, it shows how any of us can increase the chances of happy outcomes in our own lives, careers, or businesses.

Kasey to the Rescue Ellen Rogers,2010-11-02 This is a story of how miracles

DO happen. How courage and a never-give-up spirit can emerge victorious. How an engaging little monkey helped change a family's life. Ellen Rogers considered herself something of a tragedy snob. The single mother of five believed she could weather any storm, that she could keep her family from harm with fortitude and grace. But nothing could have prepared her for the June 2005 car accident that left her son, Ned--then 22 years old--fighting for his life. Ellen refused to give in to despair. We'll get through this, she told herself. We have to. But love and determination can only go so far, and the road home was fraught with obstacles. Ellen and Ned took comfort in family and friends. And they prayed for a miracle. Miracles happen to those who believe, the saying goes, but who would have believed that one family's miracle would weigh in at five pounds sopping wet? Then Helping Hands: Monkey Helpers for the Disabled provided Ned with an affectionate and intelligent service animal with a steadfast devotion to hierarchy, a longing for spa days, and a craving for Gummi Bears. In other words, a diva. Life with Kasey was yet another challenge for this large and lively family, but they persevered as families do, and in time this wise and sensitive animal did more than help Ned cope with his disabilities--she turned the simple tasks of life into a life worth living. Kasey's astonishing intelligence and compassion brought hope and laughter back to a family facing its greatest challenge, and helped them see the world in a new way.

OverSuccess Jim Rubens, James M. Rubens, 2008 Why are one in three American

adults pervasively dissatisfied with their lives? Why is major depression seven times more likely among those born after 1970 than their grandparents? Why are one in four of us addicted to at least one substance or behavior? Why is America drowning in record personal and public debt? Why did over 100,000 people humiliate themselves this year auditioning for Fox's American Idol? Why are 80 percent of women unhappy with their bodies? What is it about contemporary America that connects the swelling incidence of depression, behavioral addictions, eating disorders, debt, materialism, sleep deprivation, family breakdown, rudeness, fame fixation, ethical collapse, mistrust, and monstrous acts of personal violence? Drawing from emerging science in several fields and insights about our transformed social lives, Rubens explains how genes, commercial culture, and global hyper-competition have locked tens of millions of Americans into an unwinnable success benchmarks race and unleashed an epidemic of status defeat. OverSuccess shows how and why the resulting social and psychological pathologies are different for baby boomers, men, and women. Offering hope for our future, Rubens outlines 20 ways that individuals, businesses, and voluntary organizations can satisfy the American drive for recognition and personal achievement without the toxic burdens of OverSuccess. These cures range from holding the door for strangers and somatic cell gene therapy, to responsible displays of wealth and building village-scale social and business organizations.

Google and the Myth of Universal Knowledge Ian Wilson, Jean Noel

Jeanneney, Teresa Lavender Fagan, 2011-08-22 The recent announcement that Google would digitize the holdings of several major libraries sent shock waves through the book industry and academe. Google presented this digital repository as a first step towards a long - dreamed - of universal library, but skeptics were quick to raise a number of concerns about the potential for copyright infrin...

The Survival Imperative William E. Burrows, 2007-04-01 Using Space to Save Earth Veteran science journalist William E Burrows offers a bold new mission for the U.S. space program: to protect the Earth from the ever-growing number of perils that threaten our way of life – and even our very survival. We are living through one of the most dangerous times in human history. Nuclear, chemical, and biological weapons technology are proliferating, and missile technology is falling into more and more hands. Extreme natural disasters like hurricanes, floods, fires, and earthquakes, are becoming increasingly costly – not only in dollars, but in lives – as population expands. Environmental crises threaten to provoke massive famines and widespread social collapse. Asteroids the size of battleships streak within striking distance of the earth every year. One strategy offers the best hope of protecting us from all of these dangers – a revitalized national space program that coordinates efforts in global defense, in environmental protection, in communications, and in military security. The Survival Imperative offers an impassioned argument for this bold initiative. To

demonstrate the urgency of his cause, Burrows presents a vivid scenario: an impact by a moderately large asteroid that triggers a series of nuclear exchanges, environmental devastation, and the slow disintegration of civilization. And he examines the existing space program from the heady days of the Moon landing through the political compromises that have characterized the history of NASA in the 35 years following our retreat from the Moon. Most of all, Burrows warns that the primary obstacle to achieving a true planetary defense program is not financial or scientific, but social—an unwillingness to acknowledge the urgency of the crisis, and to take the political risks needed to address it. The question, says Burrows, is not whether we can do it, but whether we will act before it's too late. At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied.

Say Everything Scott Rosenberg, 2009-06-16 Blogs are everywhere. They have exposed truths and spread rumors. Made and lost fortunes. Brought couples together and torn them apart. Toppled cabinet members and sparked grassroots movements. Immediate, intimate, and influential, they have put the power of personal publishing into everyone's hands. Regularly dismissed as trivial and ephemeral, they have proved that they are here to stay. In *Say Everything*, Scott Rosenberg chronicles blogging's unplanned rise and improbable triumph, tracing its impact on politics, business, the media, and our personal lives. He offers close-ups of innovators such as Blogger founder Evan Williams,

investigative journalist Josh Marshall, exhibitionist diarist Justin Hall, software visionary Dave Winer, mommyblogger Heather Armstrong, and many others. These blogging pioneers were the first to face new dilemmas that have become common in the era of Google and Facebook, and their stories offer vital insights and warnings as we navigate the future. How much of our lives should we reveal on the Web? Is anonymity a boon or a curse? Which voices can we trust? What does authenticity look like on a stage where millions are fighting for attention, yet most only write for a handful? And what happens to our culture now that everyone can say everything? Before blogs, it was easy to believe that the Web would grow up to be a clickable TV-slick, passive, mass-market. Instead, blogging brought the Web's native character into focus—convivial, expressive, democratic. Far from being pajama-clad loners, bloggers have become the curators of our collective experience, testing out their ideas in front of a crowd and linking people in ways that broadcasts can't match. Blogs have created a new kind of public sphere—one in which we can think out loud together. And now that we have begun, Rosenberg writes, it is impossible to imagine us stopping. In his first book, *Dreaming in Code*, Scott Rosenberg brilliantly explored the art of creating software (the first true successor to *The Soul of a New Machine*, wrote James Fallows in *The Atlantic*). In *Say Everything*, Rosenberg brings the same perceptive eye to the blogosphere, capturing as no one else has the birth of a new medium.

When the World Calls Stanley Meisler, 2012-02-07 *When the World Calls* is the

first complete and balanced look at the Peace Corps's first fifty years. Revelatory and candid, journalist Stanley Meisler's engaging narrative exposes Washington infighting, presidential influence, and the Volunteers' unique struggles abroad. He deftly unpacks the complicated history with sharp analysis and memorable anecdotes, taking readers on a global trek starting with the historic first contingent of Volunteers to Ghana on August 30, 1961. In the years since, in spite of setbacks, the ethos of the Peace Corps has endured, largely due to the perseverance of the 200,000 Volunteers themselves, whose shared commitment to effect positive global change has been a constant in one of our most complex—and valued—institutions.

My New iPad Wallace Wang, Wally Wang, 2010-12-15 This simple, patient, and complete guide to the iPad shows readers, step-by-step, how to do what they want to do right away, like surf the Internet, send email, listen to music, take notes, read ebooks, and play with photos.
