Soft Computing for Smart Environments Mohamed Abdel-Basset,Ripon Chakraborty,Abduallah Gamal,2023-04-05 This book applies both industrial engineering and computational intelligence to demonstrate intelligent machines that solve real-world problems in various smart environments. It presents fundamental concepts and the latest advances in multi-criteria decision-making (MCDM) techniques and their application to smart environments. Though managers and engineers often use multi-criteria analysis in making complex decisions, many core problems are too difficult to model mathematically or have simply not yet been modeled. In response, as well as discussing AI-based approaches, *Soft Computing for Smart Environments* covers various optimization techniques, decision analytics, and data science in applying soft computing techniques to a defined set of smart environments, including smart and sustainable cities, disaster response systems, and smart campuses. This state-of-the-art book will be essential reading for both undergraduate and graduate students, researchers, practitioners, and decision-makers interested in advanced MCDM techniques for management and engineering in relation to smart environments.

Priorities and Pathways in Services Reform Christopher Findlay,2014 Services markets remain highly regulated and international trade and investment is restricted. Previous works have identified the scope for significant gains from trade, yet those results are often debated and the progress on reform has been slow. Parts I and II in *Priorities and Pathways in Services Reform* help fill the gap in the research around this debate. Part I *Quantitative Studies* contains up-to-date assessment and evaluations of the impact of policy in a range of services markets in different countries (through cross-country modelling of the impacts of a reform program). Part II *Political Economy Studies* builds on this to address the understanding of what makes a reform successful, going beyond a quantification of the benefits of reform. This book fills that gap by reporting and reviewing the experience of reform across different sectors and countries. Ten key lessons are identified for successful reform. Readers will find fresh insights into managing complex issues in services reform.

Wrestling with God Steven T. Katz,Shlomo Biderman,Gershon Greenberg,2007-01-04 This volume presents a wide-ranging selection of Jewish theological responses to the Holocaust. It will be the most complete anthology of its sort, bringing together for the first time: (1) a large sample of ultra-orthodox writings, translated from the Hebrew and Yiddish; (2) a substantial selection of essays by Israeli authors, also translated from the Hebrew; (3) a broad sampling of works written in English by American and European authors. These diverse selections represent virtually every significant theological position that has been articulated by a Jewish thinker in response to the Holocaust. Included are rarely studied responses that were written while the Holocaust was happening.

Human-Computer Interaction – INTERACT 2017 Regina Bernhaupt,Girish Dalvi,Anirudha Joshi,Devanuj K. Balkrishan,Jacki O'Neill,Marco Winckler,2017-09-20 The four-volume set LNCS 10513–10516 constitutes the proceedings of the 16th IFIP TC 13 International Conference on Human-Computer Interaction, INTERACT 2017, held in Mumbai, India, in September 2017. The total of 68 papers presented in these books was carefully reviewed and selected from 221 submissions. The contributions are organized in topical sections named: Part I: adaptive design and mobile applications; aging and disabilities; assistive technology for blind users; audience engagement; co-design studies; cultural differences and communication technology; design rationale and camera-control. Part II: digital inclusion; games; human perception, cognition and behavior; information on demand, on the move, and gesture interaction; interaction at the workplace; interaction with children. Part III: mediated communication in health; methods and tools for user interface evaluation; multi-touch interaction; new interaction techniques; personalization and visualization; persuasive technology and rehabilitation; and pointing and target selection. Part IV: security and trust; social media and design innovation; UX adoption in the organizations; virtual reality and feeling of immersion; case studies; courses; demonstrations; interactive posters; field trips.

Advances in Bioinformatics Miguel P. Rocha,Florentino Fernández Riverola,Hagit Shatkay,Juan Manuel Corchado Rodríguez,2010-05-29 The fields of Bioinformatics and Computational Biology have been growing steadily over the last few years boosted by an increasing need for computational techniques that can efficiently handle the huge amounts of data produced by the new experimental techniques in Biology. This calls for new algorithms and - proaches from fields such as Data Integration, Statistics, Data Mining, Machine Learning, Optimization, Computer Science and Artificial Intelligence. Also, new global approaches, such as Systems Biology, have been emerging replacing the reductionist view that dominated biological research in the last d- ades. Indeed, Biology is more and more a science of information needing tools from the information technology field. The interaction of researchers from diff- ent scientific fields is, more than ever, of foremost importance and we hope this event will contribute to this effort. IWPCBB'10 technical program included a total of 30 papers (26 long papers and 4 short papers) spanning many different sub-fields in Bioinformatics and Computational Biology. Therefore, the technical program of the conference will certainly be diverse, challenging and will promote the interaction among computer scientists, mathematicians, biologists and other researchers. We would like to thank all the contributing authors, as well as the members of the Program Committee and the Organizing Committee for their hard and highly valuable work. Their work has helped to contribute to the success of the IWPCBB'10 event. IWPCBB'10 wouldn't exist without your contribution.

The Origins of Schizophrenia Alan S. Brown,Paul H. Patterson,2011-11-01 The Origins of Schizophrenia synthesizes key findings on a devastating mental disorder that has been increasingly studied over the past decade. Advances in epidemiology, translational neuroscience technology, and molecular and statistical genetics have recast schizophrenia's neurobiological nature, identifying new putative environmental risk factors and candidate susceptibility genes. Providing the latest clinical and neuroscience research developments in a comprehensive volume, this collection by world-renowned investigators answers a pressing need for balanced, thorough information, while pointing to future directions in research and interdisciplinary collaboration. The book, featuring a foreword by Robert Freedman, M.D., thoroughly examines these topics from the vantage points of epidemiologic, clinical, and basic neuroscience approaches, making it an essential resource for researchers in psychiatry, psychology, and neuroscience and for clinical mental health professionals.

Juvenile-Onset Schizophrenia Robert L. Findling,S. Charles Schulz,2005-04-04 Jillian (Jess Weixler), a sardonic, bitter, verbose, hungover, law-school dropout, has a really bad day working on an ice-cream food truck as a favor to a friend. She treats her bizarre customers with the utter lack of respect she thinks they deserve, but the day turns out to be an important one for her as an old relationship comes crashing down, while another one might just be starting up. Jesse Eisenberg and Tippi Hedren co-star in this indie comedy. ~ Perry Seibert, Rovi
