Cultures and Globalization Helmut K Anheier,Yudhishtir Raj Isar,2007-03-27 In the age of globalization we are no longer home alone. Migration brings other worlds into our own just as the global reach of the media transmits our world into the hearts and minds of others. Often incommensurate values are crammed together in the same public square. Increasingly we all today live in the kind of 'edge cultures' we used to see only on the frontiers of civilizations in places like Hong Kong or Istanbul. The resulting frictions and fusions are shaping the soul of the coming world order. I can think of no other project with the ambitious scope of defining this emergent reality than The Cultures and Globalization project. I can think of no more capable minds than Raj Isar and Helmut Anheier who can pull it off. - Nathan Gardels, Editor-in-Chief, NPQ, Global Services, Los Angeles Times Syndicate/Tribune Media This series represents an innovative approach to the central issues of globalization, that phenomenon of such undefined contours. - Lupwishi Mbuyumba, Director of the Observatory of Cultural Policies in Africa The world's cultures and their forms of creation, presentation, and preservation are deeply affected by globalization in ways that are inadequately documented and understood. The Cultures and Globalization Series is designed to fill this void in our knowledge. Analyzing the relationship between globalization and cultures is the aim of the Series. In each volume, leading experts as well as young scholars will track cultural trends connected to globalization throughout the world, covering issues ranging from the role of cultural difference in politics and governance to the evolution of the cultural economy and the changing patterns of creativity and artistic expression. Each volume will also include an innovative presentation of newly developed 'indicator suites' on cultures and globalization that will be presented in a user-friendly form with a high graphics content to facilitate accessibility and understanding Like so many phenomena linked to globalization, conflicts over and within the cultural realms crystallize great anxieties and illusions, through misplaced assumptions, inadequate concepts, unwarranted simplifications and instrumental readings. The aim here is to marshal evidence from different disciplines and perspectives about the culture, conflict and globalization relationships in conceptually sensitive ways.

**Losing Control** Louise Williams,Roland Rich,2014-01-10 'A free press is not a luxury. A free press is at the absolute core of equitable development' according to World Bank President James Wolfensohn. A free press is also the key to transparency and good governance and is an indispensable feature of a democracy. So how does Asia rate? In *Losing Control*, leading journalists analyse the state of play in all the countries of North Asia and Southeast Asia. From the herd journalism of Japan to the Stalinist system of North Korea, *Losing Control* provides an inside look at journalism and freedom of the press in each country. One conclusion—a combination of new technology and greater democracy is breaking the shackles that once constrained the press in Asia. 'Brings together Asia's best and brightest observers of the press.' Hamish McDonald, Foreign Editor, The Sydney Morning Herald 'A rare insiders' view exposing the real dynamics behind social and political change in Asia.' Evan Williams, Foreign Correspondent, ABC TV 'A timely and necessary contribution to the debate over the quality of freedom in Asia.' Geoffrey Barker, The Australian Financial Review

Virtual Thailand Glen Lewis,2007-05-07 Written by an established expert on Thailand, this is one of the first books to fully investigate the Thai media's role during the Thaksin government's first term. Incorporating political economy and media theory, the book provides a unique insight into globalization in Southeast Asia, analyzing the role of communications and media in regional cultural politics. Examining the period from the mid 1990s, Lewis makes a sustained comparison between Thailand and its neighbouring countries in relation to the media, business, politics and popular culture. Covering issues including business development, tourism, the Thai movie industry and the war on terror, the book argues that globalization as it relates to media, can be patterned on Thai experiences.

The Asian economic crisis began in Thailand and ended a decade of sustained economic boom. This book identifies the role of policy errors involving both the Thai government and the IMF that lead to the crash of the fastest growing economy in the world. Warr addresses the consequences of the crisis, including sharply increased poverty incidence and a backlog of non- performing loans which clogged the banking system, delaying recovery. Key content includes: \* the Social Consequences of the crisis, and alternatives \* public sector reform \* implications of a floating exchange rate \* education \* urbanisation and the environment.
