Bangkok Design Brian Mertens, Robert McLeod, 2007 Global design is being spiced up by fresh flavours from Bangkok. Today's young Thai designers create contemporary furniture and interior textiles that appeal to the most sophisticated international tastes, but using tropical Asian accents. The Thais' favourite ingredients are natural materials, fine craftsmanship and inspiration from local culture, which they mix using the kind of eclecticism that makes Thai cooking so delicious. This elegant book goes beyond conventional guides on interior design style to focus on the designers themselves, their philosophies, and how they interpret their unique culture in design. Bangkok DESIGN is the first book of its kind, exploring the acclaimed new furnishings from Thailand and the inspiration behind them. This

book profiles 36 of the best Thai designers, showing how they translate their own culture and personal experiences into original products. This group explores a wide variety of styles - minimal, expressionist, modernist, neo-traditional, retro and pop - but each designer has an individual signature. The profiles include several studio artists whose work either has decorative characteristics or else comments on design-related issues like cultural identity and sustainability. This inspiring book, beautifully photographed by Robert McLeod and Lucidly written by award-winning author Brian Mertens, will appeal to interior designers, architects and collectors.

Energy, Governance and Security in Thailand and Myanmar (Burma) Adam Simpson, 2016-04-29 Across the world states are seeking out new and secure supplies of energy but this search is manifesting itself most visibly in Asia where rapid industrialisation in states such as China and India is fomenting a frantic scramble for energy resources. Due to entrenched societal inequities and widespread authoritarian governance, however, the pursuit of national energy security through transnational energy projects has resulted in devastating impacts on the human and environmental security of local populations. These effects are particularly evident in both Thailand and Myanmar (Burma), which, located at the crossroads of Asia, are increasingly engaged in the cross-border energy trade. Based on extensive fieldwork and theoretical analysis this ground-breaking book proposes a new critical approach to energy and environmental security and explores the important role that both local and transnational environmental movements are playing, in the absence of effective and democratic governments, in providing 'activist environmental governance' for energy projects throughout the region. By comparing the nature of this activism under two very different political regimes it delivers crucial theoretical insights with both academic and policy implications for the sustainable and equitable development of the South's natural resources.

Art from Thailand Robert L. Brown,1999 This volume provides an overview of Thailand's rich artistic variety. Art found in Thailand (previously named Siam) stretches over more than two millennia. Of great importance and of special interest is a long and intimate relationship between Thailand and India of cultures and artistic traditions, Buddhist and Hindu. The book spans the fourth-nineteenth centuries, from the earliest Indian-related art up until the modern Bangkok period. Though widely studied, the art history of Thailand today is highly contentious and revisionist, and the articles here present recent research and opinions. The study of art from Thailand has progressed rapidly in the last decades. Scholars have new things to say, new theories, new dating, new ideas regarding artistic relationships and influences. This volume is timely as it presents writers who are involved in this rethinking. They include senior scholars and promising young academics.
